## McNally Theatre Renewed

The McNally Theatre Auditorium re-opened on Friday, October 8, 2004, following a \$2 million renovation focused on better serving our students and our community. To celebrate the big day, Dr. J. Colin Dodds, President of Saint Mary's University, hosted a formal gathering and reception, where students, faculty, and community members got a first hand look at the remarkable new upgrades.

"With this renewal, we're celebrating our great tradition while building a bright future," said Dr. Dodds in his address.

Other notable speakers at the event were His Grace, Archbishop Terrence Prendergast, SJ, Paul Dyer, Chair Board of Governors, Gabrielle Morrison, Vice President Administration, and Kathleen Lingley, Vice President Academic, Saint Mary's University Students' Association.

The need for a 300-seat, properly equipped teaching space was identified last December by the University's Classroom Strategy Task Force. The Theatre Auditorium had been used on a temporary basis for teaching but lacked proper seating, lighting and ventilation.

The renovation provides the University with a versatile, modern teaching facility which can be easily converted to a conference space with a seating capacity of up to 650, with some 290

*Celebrating the McNally Theatre Renewal (from left to right, front): Chuck Bridges, Vice President (Assoc.) External Affairs; His Grace, Archbishop Terrence Prendergast, SJ; Dr. J. Colin Dodds, President of Saint Mary's; and Paul Dyer, Chair of the Board of Governors. (From left to right, back): Dr. Terry Murphy, Academic Vice President; Gabrielle Morrison, Vice President Administration; and, Kathleen Lingley, Vice President Academic, Saint Mary's University Students' Association.*

permanent seats. The stage and related infrastructure has been re-designed and refurbished in consideration of the needs of the Drama Society. As well, the Theatre will continue to be used as a prime venue for exam writing.

The renovation includes air conditioning; ventilation; upgraded lighting; theatre seating with writing tablets; all new flooring, ceiling and wall surfaces; state of the art technology teaching tools;

and a re-designed stage area and sound/lighting control rooms.

The design, and its reliance on wood, carries the tradition and warmth of the paneling in the McNally Building foyer into the Theatre Auditorium. As well, the ceiling treatment exposing the original arches and the incorporation of the existing church windows pays tribute to the ecclesiastical heritage of the room. The renovation of the

McNally Theatre Auditorium took place over the summer months. The University's Project Steering Committee and Design Team began working with the architectural team of John K. Dobbs & Associates Inc. and Shore Tilbe Irwin & Partners in February of this year. With construction starting the last week of May, the work was substantially completed by Avondale Construction Limited for the start of classes in September. ♦

## Saint Mary's University Establishes the Edmund Morris Memorial Scholarship

*Steven Hiscock (centre), a fourth year political science student at Saint Mary's, is the first recipient of the Edmund Morris Memorial Scholarship. Presenting the scholarship to him are Dr. J. Colin Dodds, President of Saint Mary's (left), and Dr. Donald Naulls, Associate Dean of Arts and Political Science Professor.*

On Tuesday, October 5, Saint Mary's University announced a new scholarship fund in honour of the late Dr. Edmund Morris. Faculty, staff, students, alumni and friends of the University joined the Morris family to celebrate his legacy and the establishment of the new scholarship.

A dedicated public servant, Dr. Morris held the unique distinction of being elected to all three levels of government. He served as Mayor of Halifax, a provincial cabinet minister, and a member of parliament. A former broadcaster, a devoted family man, and interim President of Saint Mary's University, he passed away on January 3, 2003.

Through the leadership of Richard H. MacLean (MA '61), Dr. Garnet Brown (Honorary Doctorate of Laws '01), H.D. MacKeen, Gerald Doucet, and Ian Thompson, \$100,000 was raised in order to the establish the Edmund Morris Memorial Scholarship.

The scholarship will be awarded annually to a full-time undergraduate Political Science student who shows superior academic achievement and leadership in community activities. Steven Hiscock, a fourth year political science student at Saint Mary's, is the first recipient of the award.

"Edmund's enthusiasm for life motivated many of his friends and associates to work harder for our entire community," says Dr. J. Colin Dodds, President of Saint Mary's.

"The scholarship helps in the University's mission of making education accessible to students, and allows Edmund's name to live on forever," adds Dr. Dodds.

MacLean, Dr. Brown, MacKeen, Doucet and Thompson were all formally recognized at this special event for their tireless efforts in raising funds for the scholarship.

"Edmund touched the lives of so many people, both in Nova Scotia and right across Canada," says Dr. Brown. "He was a remarkable citizen and gave so much back to his community, so it's a true honour to have worked on the project."

MacLean states, "On behalf of the Morris family, I want to express my sincere thanks to all those who helped in making the Edmund Morris Memorial Scholarship a reality. We were committed to raising \$100,000. That goal has been reached and surpassed, and is something Edmund would be very proud of."

Dr. Morris held a variety of community, provincial and national offices and received a number of civic and national

# Bullies Beware: Huskies Football Team Kicks Off Their 2004-2005 "Bullies Never Win" Program

The Bullies Never Win Program is an example of "community outreach at its best," says Dr. David Murphy, Director of the Saint Mary's Athletics and Recreation Department.

The Saint Mary's Huskies Football Team scored major points before this year's home opener even began. The Huskies, who have made three consecutive Vanier Cup appearances, officially kicked off their Bullies Never Win Program during a ceremonial kick-off before defeating the St. Francis Xavier X-Men on Friday, September 17. The Huskies defeated the X-Men 37-5 before a crowd of almost 6,000 that evening.

"This is yet another example of community outreach at its best," says Dr. David Murphy, Director of the Athletics and Recreation Department. Saint Mary's University is known across

Canada and around the world for its commitment to community outreach projects.

"Since 2001, the Huskies have delivered their anti-bullying message to more than 15,000 students. This year, they'll also give 200 tickets from each home game to kids," adds Dr. Murphy.

A number of Huskies football players have been bullied themselves, and contend the Bullies Never Win Program is a win-win program for kids and teenagers in the Halifax Regional Municipality (HRM).

Curtis Woodley, a 4th year student and football player at Saint Mary's from Whitby, Ontario, says his eyes "kind of lit up" when he heard about the opportunity.

"I've been bullied before - in elementary school - and I've seen what it does to kids. It's always people who feel like they have self-esteem issues who do most of the bullying, so by knowing that they're bullying for attention and stuff you just kind of just shrug it off," says Woodley.

Launching the Bullies Never Win program recently was a way for the 2001 and 2002 Vanier Cup champions to thank their fans, according to Assistant Coach Steve Sumarah and fellow Assistant Coach, RCMP Const. Joe Taplin. "The team has been receiving a lot more support over the last couple of years and we wanted to give something back to the community," says Const. Taplin.

The Bullies Never Win Program entails team members to visit schools and community centres in the Halifax Regional Municipality and throughout the province.

"Our goal this year is to expand this program throughout Nova Scotia, as it benefits so many kids," says Sumarah.

Const. Taplin is excited about the program, not only as a football coach but also as a police officer. "Bullying is an ongoing issue that's been in the news quite a bit lately. I guess the big message that kids receive from the football players is that everybody struggles in life, and look at the accomplishments that they've made in their life now."

Const. Taplin likes the program because students will be getting more than a police officer's outlook. ♦

## SCHOLARSHIP continued from page 1

awards. He was a dedicated community volunteer who supported the homeless, seniors and the preservation of Halifax's heritage. He volunteered with The Halifax Foundation and Saint Mary's University. He is survived by his wife Lorraine (Ware) and six children. His daughter, Sarah Morris is Coordinator of Counseling Services at Saint Mary's.

Dr. Morris spent seven years as a senior administrator at Saint Mary's. His affiliation with the university began when he attended St. Mary's College High School. He then attended Dalhousie University where he pursued his undergraduate and graduate studies in Political Science.

In 1942, he joined the Wartime Information Board in Ottawa. After the war, he became associate editor of The Chronicle Herald. He later moved to Ottawa as a member of the parliamentary press gallery and in 1950 he returned to Halifax as a news analyst and commentator with the radio station CJCH.

In 1957, he was elected to The House of Commons and was re-elected in two succeeding elections. He returned to Saint Mary's in 1963 when he was appointed assistant to the president and in 1969 he became the Vice-President of Finance and Development. He served as interim President of the university in 1970. Dr. Morris received an honorary Doctor of Civil Law from Saint Mary's University in 1986.

In 1974, he was elected for his first of two terms as Mayor of the City of Halifax. He was re-elected in 1977. In 1980, Dr. Morris was elected to the Nova Scotia Legislative Assembly as the member for Halifax - Needham. He served as Minister of Intergovernmental Affairs, Municipal Affairs, Fisheries, and Social Services. ♦

## Dr. Janet Hill Wins AAU Distinguished Teacher Award

Dr. Janet Hill: "I have a passion for teaching and touching the lives of my students in their journey of learning."

Dr. Janet Hill, an English professor at Saint Mary's University, has been selected to receive a prestigious award from the Association of Atlantic Universities (AAU) for excellence in teaching.

The AAU Distinguished Teacher Award is an honour presented annually to only three professors in Atlantic Canada and the West Indies. Each year, the AAU's 18 member institutions submit nominees for these Awards. The winners are selected by the AAU's Coordinating Committee on Faculty Development.

Margaret-Anne Bennett, Chair of this Committee, states: "Nominees for the AAU Awards are recipients of teaching awards in their respective

institutions so, each year, the Committee has the difficult task of selecting winners from among the best professors in the region. This year was no exception as we discussed, debated and considered nominees from a wide range of disciplines, teaching styles and philosophies."

Nomination letters highlighted Dr. Hill's effective teaching style, her personal attention and individual encouragement which has touched the lives of many students and influenced them in their academic and career choices.

"I'm very pleased to win the AAU Distinguished Teacher Award, particularly because awards such as this acknowledge the importance of teaching and learning in universities," smiles Dr. Hill.

"The real award for me comes from the work I do in the classroom, as I have a passion for teaching and touching the lives of my students in their journey of learning," she adds.

The AAU ([www.atlanticuniversities.ca](http://www.atlanticuniversities.ca)) represents the 17 universities in Atlantic Canada and the University of West Indies. The AAU is an advocate for the important role Atlantic universities play in preparing future leaders of our communities, in path-breaking research and innovation and in contributing to the economic prosperity and quality of life of the Atlantic region. ♦

## Saint Mary's Engineering Professor Earns Big Appointment With NSERC

Dr. Sastry Vankamamidi of the Engineering Division at Saint Mary's University has received a senior appointment with one of Canada's leading research organizations.

The Natural Sciences and Engineering Research Council (NSERC) of Canada has selected Dr. Vankamamidi to serve as a member of its Engineering Scholarship and Fellowships Selection Committee.

"This is truly an exciting opportunity," says Dr. Vankamamidi. "I am honoured to represent Saint Mary's and of course work with my colleagues from other Canadian universities as a member of the NSERC Selection Committee."

Dr. Vankamamidi has been instrumental in the growth of the University's Engineering Division. He has received a large number of research grants from NSERC, and last year won the Canadian Federation of Engineering Students (CFES) Appreciation Award as the "Professor of the Year - 2003." Saint Mary's is home to an innovative and dynamic engineering program, which is widely recognized in the region and across Canada.

Dr. Vankamamidi will serve on NSERC's Engineering Scholarship and Fellowships Selection Committee for one year. NSERC's role is to make investments in people, discovery and innovation for the benefit of all Canadians. They invest in people by supporting more than 17,700 university students and postdoctoral fellows in their advanced studies, and promote discovery by funding more than 10,000 university professors every year. NSERC helps make innovation happen by encouraging more than 500 Canadian companies to invest in university research. In 2004-2005, NSERC will invest \$850 million in university-based research and training in all the natural sciences and engineering. ♦

# Saint Mary's Students Dig Up The Past

## Fieldwork In Archaeology At Grand-Pré National Historic Site

Archaeology students at Saint Mary's University got the chance to travel back in time this summer. And it's a summer trip they won't forget.

For the fourth consecutive summer, Saint Mary's University, in partnership with Parks Canada and the Société Promotion Grand-Pré collaborated on a unique archaeological excavation at Grand-Pré National Historic Site of Canada. The project was offered as a course - Fieldwork in Archaeology - through the Division of Continuing Education at Saint Mary's, during the Second Summer Session.

Students had the unique opportunity to explore the archaeological remains of a pre-Deportation Acadian village. Grand-Pré National Historic Site of Canada occupies a picturesque setting on the Minas Basin, near the centre of Nova Scotia. The site lies at the foot of a gentle slope overlooking the great meadow from which the community of Grand-Pré derives its name.

Acadian French settlers first colonized the Minas Basin in the 1680s, and by the turn of the 18th century, the Minas communities had

become the heartland of old Acadie. Uncertain of the loyalty of its Acadian subjects on the eve of an international war, Britain's colonial government in Nova Scotia ordered the deportation of the entire Acadian population in 1755. British and New England soldiers burned villages and uprooted over ten thousand people.

"Students from Saint Mary's are now unveiling the archaeological picture of Acadian Grand-Pré," said Jonathan Fowler, during an interview at the historic site. "With a little luck, we stand to make some significant discoveries this summer."

Fowler, who is an archaeology professor, spearheaded the summer Field Study course at Saint Mary's in order to shed light on some of the more poorly documented aspects of Acadian history.

"Very few people could read or write during the pre-Deportation period, so archaeology is tremendously important. The artifacts the students are finding serve as informants - like voices from the past - that can tell us what life was like for the Acadians who once lived here," adds Fowler.

The team of archaeology students from Saint Mary's

Jonathan Fowler, an archaeology professor at Saint Mary's (Left), and Guy Allen-Hermanson, a fourth year Arts student at Saint Mary's at Grand Pré.

had a number of tools and sophisticated technology to aid them during the summer dig at Grand-Pré, such as the Geonics EM-38b, a device that has the capacity to 'see' beneath sod and detect archaeological features that would otherwise remain concealed to the human eye.

Partnering with Geophysicist Duncan McNeill, who designed the

instrument, has allowed excavations to be specifically targeted to the areas of highest archaeological potential. According to Fowler, excavations completed to date have uncovered evidence of at least one pre-Deportation Acadian building, which appears to have been destroyed by fire, as well as thousands of artifacts.

"Of special interest in this project is the validity of the tradition marking this as the site of the Acadian parish church of Saint-Charles-des-Mines, established in 1687 and presumably destroyed by New England soldiers in January of 1756," says Fowler. A focal point of community life, this church ironically served as a prison during the Deportation, and has since become a pilgrimage site for the Acadian people. "We are now answering questions that have for too long remained unanswered," he adds.

Grand-Pré was a main attraction between July 31st and August 15th when Nova Scotia played host to the 2004 World Acadian Congress - a province-wide festival that attracted thousands of visitors.

To make the dig even more interesting, some of the students and others participating in the project are actual descendants of the Acadians. Flannery Surette, a fourth year Saint Mary's anthropology student from Boston, Massachusetts, has been working on the summer dig project since 2001. Her great-grandmother was Acadian.

"So much was lost here," she says. "Archaeology is about giving back to the people.... Giving it back to

me, my dad and my grandmother."

During last year's dig, she found a fragment of a wine bottle that was determined to be from the 1700s. After graduating from Saint Mary's, she plans to go on and study archaeology at a graduate school in the United Kingdom (UK).

"I couldn't think of a better way to connect with my past," says Guy Allen-Hermanson, a fourth year Arts student at Saint Mary's. "This dig is allowing the team to find treasures of yesterday," he explains, "and for me, it's a neat way to learn more about how my ancestors lived over three centuries ago."

Hermanson also has plans to continue studying archaeology at the graduate level upon completion of his degree from Saint Mary's. "This project is a phenomenal opportunity for undergraduate students to work in the field, an opportunity traditionally reserved for graduate students," says Heather Harroun, Manager of Summer Sessions, Division of Continuing Education at Saint Mary's.

Fowler is currently editing the surviving 18th century journal of John Winslow, the Massachusetts officer who administered the Deportation of the Grand-Pré Acadians, which he plans to publish next year. ♦

## Saint Mary's Launches "Pride In Our Shared Neighborhood" Program

In August, Saint Mary's University announced a student driven program entitled "It's Our Neighbourhood Too... Saint Mary's Students, Pride in Our Shared Neighbourhood". The program will connect students with information and resources about residential living and raise awareness about students' rights and responsibilities in the communities where they live.

The program has been developed in partnership with the Saint Mary's University Students' Association, the Halifax Regional Municipality, and Service Nova Scotia and Municipal Relations' Residential Tenancies Program.

"It's Our Neighbourhood is a rallying cry for students, from students to raise awareness of our responsibilities as residents and neighbours and to encourage students to take pride in their neighbour-

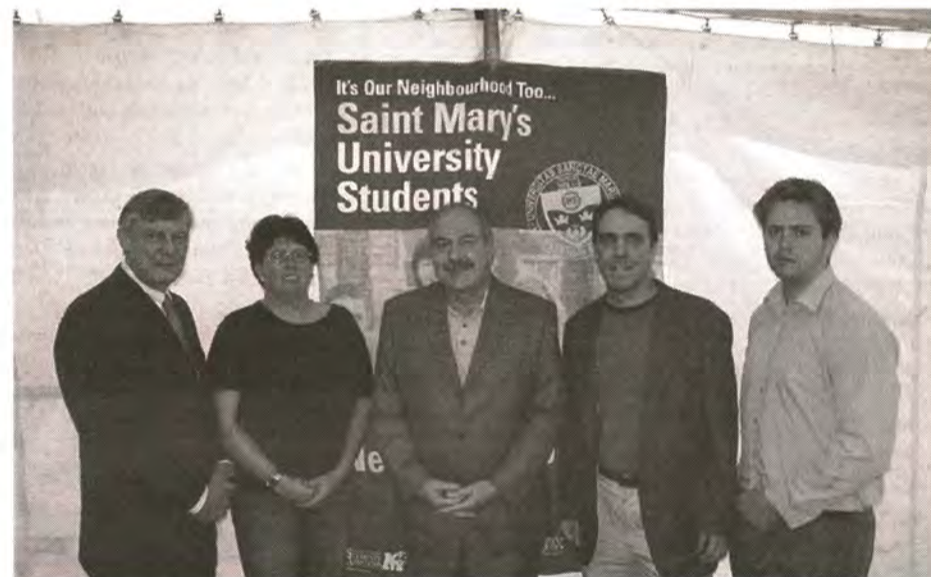

hood," says SMUSA President, Simon Partington. "We want to begin the year by building positive momentum among students that will contribute to the success of the program's other initiatives."

The first phase of the program will focus on raising awareness among students and providing them with resources. "Our program will foster a spirit of cooperation and respect between students and their neighbours," says Saint Mary's University President, Dr. J. Colin Dodds. "With the assistance of our municipal and provincial partners, we will direct students to the information that they need to make choices and act as responsible residents in the neighbourhoods that we all share."

The program acknowledges that students living off-campus must be aware of their responsibilities as residents of the community. Students living in residence

will also be provided with information, attend workshops and participate in the program's activities. Supporting materials have been created including The Good Neighbour Guide which offers tips about being a considerate neighbour and information about municipal by-laws and recycling schedules.

Saint Mary's University and Service Nova Scotia and Municipal Relations' Residential Tenancies Department will provide students with the SMARTenants Guide which outlines what students should know about finding a place to live, signing a lease and renting. Gerald Hashey, Director of the Residential Tenancies Program says, "Student-tenants and landlords may not realize it yet, but this collaboration between Saint Mary's University and the government will save them time, money and distress. The information being made available to

"It's Our Neighbourhood Too... Saint Mary's Students, Pride in Our Shared Neighbourhood" was launched at Saint Mary's in August. Photo, From left to right: Dr. J. Colin Dodds, President of Saint Mary's; Councillor Sue Uteck, Halifax Regional Municipality; John O'Brien, Corporate Communications Officer, Halifax Regional Municipality; Gerald Hashey, Director, Department of Municipal Relations, Residential Tenancies; and Simon Partington, President, Saint Mary's University Students' Association.

students today will help them make better renting decisions, and make it easy for them to be good tenants, neighbours and citizens."

Councillor Sue Uteck has been consulting with Saint Mary's on the program for the past year, "I am pleased

that Saint Mary's has taken the initiative to address the responsibilities and roles of students in the community. Cooperation has been unprecedented and for that I thank them."

This fall, the Good Neighbour Volunteer Initia-

tive will be coordinated through SMUSA's volunteer program. Events will be hosted by students and a town and gown relations committee made up of students and neighbours is being established to deal with specific initiatives of the program. ♦

# Saint Mary's Helps Achieve Computational Milestone

In a 48 hour period between the 15th and 17th of September, members of the Saint Mary's Institute for Computational Astro-

physics joined national partners in performing the Third Canadian Internetworked Scientific Supercomputer (CISS-3) experiment, in which 20 years of standard computation was completed.

Working within a nation wide network known as the Trellis Project, professors from Saint Mary's helped surpass the project's previous milestone of 3.5 years of computation in a single day, which was achieved in November, 2002. "The Trellis Project has developed the technical infrastructure to create virtual supercomputers that span many different universities in Canada," says Dr. Robert Deupree, Saint Mary's Canada Research Chair in Astronomy and Astrophysics, and Director of the Institute for Computational Astrophysics.

The benefits of the virtual supercomputer are far reaching. Modern science and engineering rely on computers as fundamental tools. Computers are used to simulate problems that span the scale from galaxies to the molecules in our bodies. For example, atoms and the interactions of proteins are mathematically modeled to understand their fundamental properties. Computers can also answer 'what if' questions that would be difficult or impossible to control in a physical experiment. However, these simulations would ordinarily require tens of thousands of hours of computation to complete. "The aggregated power of the virtual supercomputer can tackle problems that would otherwise be too large for one research group or one institution," says Dr. Deupree.

Using newer techniques and more sophisticated software than in 2002, the CISS-3 experiment combined the computational power of approximately 4000 computers across Canada, from Victoria to St. John's, to solve two different computational chemistry problems (in protein folding and biological membranes), led by researchers at the Universities of Calgary and Toronto, and the Hospital for Sick Children in Toronto.

The Saint Mary's Institute for Computational Astrophysics is distinguished as one of the few research centers in the world dedicated to investigating frontier research problems in astrophysics through high performance computing. Earlier this year, Saint Mary's received nearly \$3 million in Canada Foundation for Innovation (CFI) funding for high performance computers and visualization tools. That funding will come from \$9,934,611 that was recently awarded by CFI to the Atlantic Computational Excellence Network (ACEnet).

Saint Mary's University is one of several partner institutions of ACEnet. Also in the consortium are ACEnet's lead institution, Memorial University, St. Francis Xavier University, Dalhousie University, the University of New Brunswick, Mount Alison University, and the University of Prince Edward Island. ACEnet has helped put Atlantic Canada on the map in terms of computational power.

In total, the Trellis Project, led by Dr. Paul Lu, University of Alberta, includes the University of Alberta, C3.ca, 19 different universities, six high-performance computing (HPC) consortia (including ACEnet), three research institutions, and several networking partners across Canada.

Researchers in Atlantic Canada are thrilled by regional support for this initiative. From eight different sites in Atlantic Canada, ACEnet has been able to contribute in excess of 750 computer processors towards the CISS-3 experiment and Trellis Project.

## Honouring Legends In Sport

### Sport Hall of Fame Steering Committee announces 2004 inductees, celebrates 10<sup>th</sup> anniversary

The Saint Mary's Sport Hall of Fame Steering Committee has formally announced this year's roster to the Hall. Those being inducted this year are: Les Goodwin, Bill Robinson, Sue Dunbrack-Beazley, and Ross Webb.

"We are all extremely pleased that we have four quality individuals being inducted into the Sport Hall of Fame for our 10th Anniversary," says Paul Puma, Chair of the Saint Mary's Sport Hall of Fame Steering Committee.

"All of our inductees were leaders and builders in the history of sport at Saint Mary's and also in the 30 year history of women and sport at the University," adds Puma.

Dr. David Murphy, Athletics Director at Saint Mary's who also serves as a member of the Sport Hall of Fame Steering Committee, states: "The Selection Committee had a very difficult choice because of the quality of candidates; however, like each year, we have chosen a tremendous team of athletes and a builder to be inducted into our Hall."

The Saint Mary's University Sport Hall of Fame was established in 1994. This year's ceremony will be held at 4:30 PM in The Tower on Friday, October 15, 2004, and the backdrop for this year's event will be the 10th Anniversary Celebrations. The Steering Committee predicts there will be a large turn out for the silver anniversary event.

Goodwin, now deceased, served as coach of the Saint Mary's men's basketball team during the 1960s, taking his team to new heights. His leadership and dedication to the sport had inspired his team to win a number of regional championships and proved to be contenders on the court during national championship games.

Robinson was the star quarterback for the Huskies football

Vanier Cup football signed by the team.

team in the 1970s. His team won the Canadian College Bowl - now called the Vanier Cup - in 1973. Today, Robinson is active in sport, and also serves as Director of the Nova Scotia Sport Hall of Fame.

Dunbrack-Beazley was widely recognized for her talent while playing with the women's basketball and field hockey teams during the 1970s. She was the first female student athlete recruited to Saint Mary's in 1973. A devoted team player during her four years at the University, she was among the top scorers in both sports, both at the regional and national levels, as well as the recipient of a number of prominent awards. She now holds the position as the Athletics Director at Armbrae Academy in Halifax, NS.

Webb was a stellar performer on the field throughout his time with the men's soccer team. In the 1970s he became a household name for his talent in the sport, scoring over 70 goals combined during his five years with the team, a record unmatched in the league. Webb is now a Police Officer with the Halifax Regional Municipality Police Department. ♦

## Saint Mary's Prof Receives \$100,000 Ethics Research Grant

Canada's premier health research funding agency has awarded a Saint Mary's professor in the Faculty of Arts a major grant to study ethical issues in the biotechnology sector.

Dr. Chris MacDonald, a philosophy professor at our south end campus, has received over \$100,000.00 from the Canadian Institute of Health Research (CIHR) for a research project he will be conducting over the next three years: "Biotech Ethics: Corporate Decisions As Key To Better Health And Better Health Policy."

Those from the biotech industry and the general public alike had the chance to learn about this research on Friday, October 1. Dr. MacDonald discussed "Business Ethics for Biotech" as part of a panel at BioPort Atlantic 2004 (part of National Biotech Week). The event headlined a number of prominent speakers from the biotechnology and life sciences industry from across the Atlantic region. The event was hosted by BioNova, Nova Scotia's Biotechnology and Life Sciences Industry Association.

"The problems that rapid advances in biotechnology pose for corporate ethics in the biotech sector overlap with, but are somewhat different from, ethical challenges faced by governments, university-based researchers, health care professionals, or public interest groups," says Dr. MacDonald during an interview from his office on the fifth floor of the University's McNally Building. "This area needs a lot more attention. It's a field at the intersection of two hot, controversial topics: corporate ethics and biotech ethics."

Dr. MacDonald is actively engaged in the study of ethics in the biotechnology sector, and says that attention to the ethical issues that biotechnology poses specifically for corporations is important for two reasons.

"First, attention to questions faced within the confines of biotech boardrooms and corporate labs is important because so

Dr. MacDonald: "The problems that rapid advances in biotechnology pose for corporate ethics in the biotech sector overlap with, but are somewhat different from, ethical challenges faced by governments, university-based researchers, health care professionals, or public interest groups."

many crucial ethical decisions about biotechnology are being made there," he explains. "In a sense, that is where the action is. Given the time-lag between the development of new technologies and even very basic kinds of regulation, corporations will continue to have to make decisions that affect the health of Canadians, largely on their own. It's crucially important that those corporations be helped to make better decisions."

He adds, "Second, attention to the corporate angle is crucial because an adequate understanding of the issues faced by corporations in this domain is essential to formulating good public policy. If governments want to understand how to affect corporate behaviour, they first have to understand the ethical issues that corporations in this sector face."

This past summer, Dr. MacDonald hosted a conference directly relating to this three year project. "Genes and Profits: Business Ethics for the Life Sciences," which was sponsored by the Atlantic Centre for Ethics and Public

Affairs (ACEPA) and the Department of Philosophy, both at Saint Mary's, brought together some of the seminal thinkers in this field to talk to government and business representatives as well as members of the general public - all of whom engaged in the debate over bio-ethics during the two day event.

Dr. MacDonald says he will be busy over the next three years working with students and colleagues through Saint Mary's, ACEPA, and at the international level, on this unique research project. He also plans to host public forums and lectures relating to the study of ethics in biotechnology.

"Biotechnology is the application of basic biological knowledge for the advancement of human health and well-being," he says. "The fact that biotechnology presents challenging ethical and social choices for policy makers and scientists is well known. But the ethical challenges that biotechnology poses for corporations and others in the life sciences are less well understood," he adds. ♦

7:00 p.m. - 9:00 p.m. Opening Reception, Courtside Lounge, The Tower - Honouring 10th & 25th Reunion Years

## Friday, October 15th

Free access for all Alumni to The Tower and its facilities all weekend. (Tickets necessary for Football Game)

### Hours:

6:00 a.m. - 10:30 p.m. Monday-Friday,  
8:00 a.m. - 7:00 p.m. on the Weekend.

8:30 a.m. - 10 a.m. MBA Brunch, with Colleen Moorehead, President E\*TRADE, Canada Securities, Secunda Boardroom, 4th floor, Sobeys Building. For more information, call the MBA Office at 902.420.5002.

11:30 a.m. - 1:30 p.m. Golden Grads Luncheon, 4th Floor Lounge, Sobeys Building, Honouring the Class of 1953 hosted by Dr. Colin & Mrs. Carol Dodds. (BY INVITATION ONLY to "Golden Grads")

4:30 p.m. - 6:00 p.m. Sport Hall of Fame Induction Ceremony, The Tower. All welcome.

4:00 p.m. - 6:00 p.m. 3rd Annual MBA Social, 4th Floor Lounge, Sobeys Building. For more info. Contact Jennifer Johnson at 902.420.5729

7:00 p.m. Alumni Weekend & Homecoming Football Game, SMU vs. Mount Allison. A limited number of tickets for the Patio are available in advance to alumni at \$15, so book early! Tickets purchased at the door are \$25.00 per person.

## Saturday, October 16th

10:00 a.m. - 11:00 a.m. Alumni Field Hockey/Soccer, Huskies Stadium. For more info contact Kathy Mullane (902 420-5551) or Dana Clements, (902 420-5426), The Tower

11:00 a.m. - 12:00 p.m. Alumni Basketball & Volleyball, The Gym, The Tower. For more info contact Kathy Mullane (902 420-5551) or Dana Clements, (902 420-5426), The Tower.

12:30 p.m. - 2:00 p.m. 30th Reunion "Women in Sports," Lunch with Guest Speaker, Courtside Lounge, The Tower, For more info contact Kathy Mullane (902 420-5551) or Dana Clements, (902 420-5426), The Tower

2:00 p.m. Varsity Women's Soccer, SMU vs. MTA - Huskies Stadium

4:00 p.m. Varsity Men's Soccer, SMU vs. MTA - Huskies Stadium

## ANNUAL DINNER - PIER 21

6:00 p.m. Reception, Chrysler Canada Welcome Pavilion

6:45 p.m. Dinner, Kenneth C. Rowe, Heritage Hall

9:00 p.m. Dance - Back by popular demand Halifax local band the "Classics". Tickets for the Annual Alumni Dinner are \$60 per person, or \$110 per couple, \$550/Table of 10. Call 902 420-5420.

## Sunday, October 17th

7:00 p.m. Men's Hockey Huskies Game, SMU vs. Dal at the Halifax Forum

For more information or to purchase tickets for Homecoming 2004, please contact us at: Tel: 902.420.5420, Toll Free: 1.800.SMU.ALUM [www.smualumni.ca](http://www.smualumni.ca)

*Whether you are coming back "home" to Halifax or travelling down the street for Alumni Weekend, this year's events promise to create lasting memories.*

*Alumni Weekend & Homecoming 2004 promises to bring alumni back to Saint Mary's from all corners of the world to the four corners of our campus!*

Visit [www.smualumni.ca](http://www.smualumni.ca)

*This year's event is all about YOU - The diversity you bring and the spirit you contribute. Come and celebrate the International side of Saint Mary's from October 14th - 17th.*

# What's

## New Sobey eJournal Providing Insight On Today's Workplace

*The Workplace Review*, a new electronic journal (eJournal) focusing on all aspects of the workplace, has been launched as an initiative under the Sobey School of Business' "Better Workplaces" umbrella, aimed at developing insights into the balance of factors that encourage positive organizational outcomes.

The eJournal provides research-based analysis and commentary on the issues and challenges being faced by today's organizations. It emphasizes research that is current, managerially relevant, and with high potential for immediate application and impact.

"Our goal is to allow business practitioners and educators to share their ideas and information on best practices at work, workplace challenges, and the host of issues that affect how we do business," says Dr. Albert Mills, Director of the Sobey Ph.D. in Management and editor of *The Workplace Review*.

The Better Workplaces research agenda is aimed at developing insights into improved organizational performance and customer care, employee health and safety, good community-workplace relations, and ethical business practices. The mission of *The Workplace Review* is to become a regional forum where people can explore different perspectives of work.

The new eJournal showcases the strength of the diverse, international faculty at Saint Mary's University, who are in touch with day-to-day workplace challenges. It will reflect developing issues in the functional specialties of marketing, finance, operations, information systems, economics, accounting, and management. It will address issues such as personal staffing and selection, human resource management, leadership and coaching, occupational health, industrial relations, spirituality, diversity management, corporate governance and business ethics. The journal will remain flexible enough to incorporate future or emerging issues. All articles will focus on the central theme of the challenges and opportunities surrounding work, working and the workplace.

*The Workplace Review* can be found by logging on to the Saint Mary's University website at [www.smu.ca](http://www.smu.ca).

## Vibrant Photo Media Displays At Art Gallery

Two Exhibits Running To November 21 As Part Of Halifax Festival Of Photography

Blur

The Saint Mary's University Art Gallery is hosting two photo media exhibits until November 21, as part of *Photopolis: The Halifax Festival of Photography*.

*Exhibit A: Photography from Atlantic Canada*, features the works of nine artists whose lives and artistic practices originated in Atlantic Canada. Rejecting traditional, romantic seascape photography, these artists shift their gazes from sea to land. They examine constructions in landscape - for habitation, worship, industry, or leisure - that offer evidence of life in the region, past or present. The Guest Curator of *Exhibit A* is Scott McLeod, Editor/Publisher of the award-winning magazine *Prefix Photo*. Participating artists include Scott Conarroe, Marlene Creates, Lorraine Field, John Haney, Thaddeus Holownia, Steve Payne, Paulette Phillips, Ned Pratt, and Scott Walden.

*Blur: New Work by Tashia Friesen and Kim Waldron*, brings together the work of two artists who examine notions of beauty and desire through an exploration of their surroundings.

Tashia Friesen and Kim Waldron, both former Nova Scotia College of Art and Design, employ photo based media to register images of place that embody desire, memory, and loss. Waldron collaborates with other individuals to produce matching pairs of photographs of the same locations. Friesen presents a video narrative and text that imply a journey of return to a childhood home.

Both exhibits are free of charge and open to the public at the Saint Mary's University Art Gallery, which is located in the Loyola Building, at 5865 Gorsebrook Avenue. Other *Photopolis* events are located throughout Halifax until the end of October. ♦

Exhibit A

## Annual Summer Sessions Conference Coming To Saint Mary's

From November 7 - 10, Saint Mary's University and the University of Southern Maine will be co-hosting the 41st Annual Conference of the North American Association of Summer Sessions.

This Conference will bring upwards of 200 delegates to Halifax from across North America and abroad. In addition to sharing ideas and information on higher education, delegates will have the opportunity to explore the region's rich and colourful history.

One of the many highlights of this conference will be the Host Institution reception, on Monday, November 7, hosted by Saint Mary's University President, Dr. Colin Dodds. The reception will take place between 6:00-7:00 p.m., in the University Art Gallery, located in the Loyola Building at 5865 Gorsebrook Avenue. ♦

## Rock Around the Block: Saint Mary's Science Professor Co-authors The Urban Cliff Revolution

Why are penthouse apartments the most coveted and expensive? Where did bedbugs live before there were beds? Why do we find cliffs and waterfalls beautiful? A new book co-authored by Dr. Jeremy Lundholm answers these questions by examining the use of cliffs and caves by humans and other organisms over evolutionary time. Dr. Lundholm is a Biology and Environmental Studies professor in the Faculty of Science at Saint Mary's University.

The *Urban Cliff Revolution* argues that cliffs and rock shelters have played a vital role in the origin, evolution and development of the entire human habitat, including modern cities. The authors, an interdisciplinary team led by University of Guelph professor Dr. Douglas Larson, conclude that we still depend on artificial cliffs and rock shelters, much as we have for the past million years.

"It is widely recognized that humans have exploited cave environments throughout our evolutionary history," says Dr. Lundholm, during an interview from his biology laboratory in the University's Science Building. "The 'caveman' is someone we would like to think we have long since evolved beyond, but the history of the built environment suggests otherwise. This new research brings together insights from physical anthropology, architecture, ecology and botany to suggest that not only were cave and cliff environments essential to evolution and successful spread of *Homo sapiens* throughout the world, but that the first buildings explicitly replicated key ecological features of the cave environment that helped us survive and prosper," he says.

He goes on to explain that the development of cities can be traced from the consistent use of rock shelters and caves to their subsequent modification and eventually to the construction of free-standing buildings.

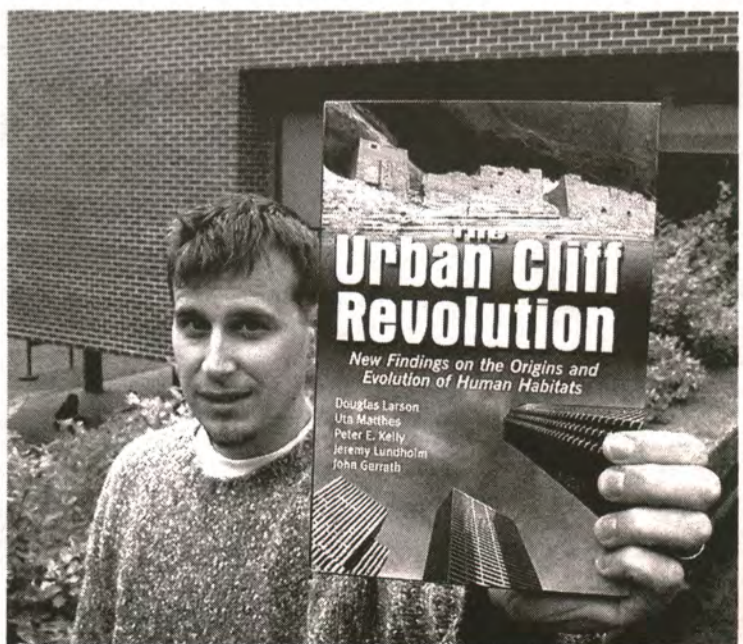

"While cities have frequently been referred to as 'concrete canyons,' this research suggests that urban ecosystems actually do function as good replicas of rock outcrop habitats, both in their suitability for humans and as home for a host of other organisms that have followed us here," he says.

The book shows that people were not the only ones using rock shelters. Over half of the species of plants and animals commonly found in cities have their evolutionary origins in rocky habitats. Dandelions, rats, pigeons and cockroaches, and most of our food plants followed us into urban habitats and farmland as cities grew and cave use diminished. Many of these species are viewed as pests, and the research presented in the book suggests that the reason they have resisted eradication is that we continue propagating their preferred habitat and food sources all around the globe.

The replication of rock outcrop habitats may represent an ecological 'revolution' of importance equal to the agricultural and industrial revolutions, but one that has been largely ignored up to now.

The book also argues that people retain an evolutionary-based spiritual attraction to cliffs to the point that much of modern architecture reiterates those aspects of rock shelters that make us feel the most comfortable and safe.

"The *Urban Cliff Revolution* suggests that we still seek out rock shelters, but that we are largely ignorant of our dependence on a very specific type of habitat," says Dr. Lundholm. "We view ourselves as highly adaptable and opportunistic, but this view must be tempered by the recognition that we are in fact highly ecologically specialized and still maintain our connections with a modern version of our ancestral home," he adds. ♦

But, we're still just like the caveman, argues Dr. Jeremy Lundholm, co-author of *The Urban Cliff Revolution*.

# Scholarly Professional DEVELOPMENT

## PhD

A number of PhD students have been in action this year, presenting and publishing their work. March saw three students – Jim Grant, Margaret McKee, and Ellen Rudderham Gaudet (all 2003 entry) presenting papers at the International Applied Business Research Conference, San Juan, Puerto Rico. In June several PhD students presented their work at the annual meeting of the Administrative Sciences Association of Canada in Quebec City, including Angela Bissonnette (2001 entry), Mary Runte (2001 entry), Kelly Dye (2002 entry), Terrance Weatherbee (2002 entry), Jim Grant (2003 entry), Peggy Wallace (2003 entry) and Margaret McKee (2003 entry). In July Terrance Weatherbee (2002) and Gina Grandy (2000) presented papers at the annual meeting of the European Group for Organization Studies, in Ljubljana, Slovenia. Terry also presented a paper at the annual meeting of the Standing Conference on Organizational Symbolism (SCOS), in Halifax. Other PhD students presenting at SCOS included Kelly Dye (2002), Angela Bissonnette (2001), Mary Runte (2001), Peggy Wallace (2003), Amy Thurlow (2003) and Jim Grant (2003). At the Academy of Management meetings in New Orleans in August Margaret McKee (2003), Terrance Weatherbee (2002) and Kelly Dye (2002) presented papers. Also in August Peggy Wallace (2003), Amy Thurlow (2003), Kelley Dye (2002) and Angela Bissonnette (2001) all took part in a high level symposium at the Third International Conference on the Dialogical Self in Warsaw, Poland.

## This Year's Publications:

McKee, Margaret (in press) "The Study of Ethical Leadership: Emerging Issues" appeared in the *Journal of Business and Economics Research*.

Runte, M., and Mills, A. J. (in press) "Paying the Toll: A Feminist Post-Structural Critique of the Discourse Bridging Work and Family," *Culture and Organization*

Mullen, J.E. (in press). "Factors Influencing Safety Behavior at Work," *Journal of Safety Research*.

Mealiea, Laird, & Ramon Baltazar. "A Strategic Guide for Building Effective Teams," *International Public Management Association for Human Resources Journal*. In press.

Grandy, Gina and Mills, A. J. (2004: in press) "Strategy as Simulacra? A Reflective Look at the Discipline and Practice of Strategy," *Journal of Management Studies*.

## Management

**Albert J. Mills and Jean Helms Mills** were appointed to the editorial board of the new journal, *Management and Organizational History*. This is Helms Mills' second journal appointment, she is currently Editor (Americas) of *Culture and Organization*. It is Mills' fourth editorial board appointment, as he currently serves on Leadership, Organization, and Tamara (*Journal of Critical Postmodern Theory*). Mills, along with Elizabeth Kelley (PhD entry, 2000), is to edit a special issue of Human Relations on 'Management and the Cold War', Mills and Helms Mills are to edit a special issue of *Culture and Organization* on Sensation and Organization.

**Albert J. Mills and Jean Helms Mills'** new book – Identity Politics at Work (London: Routledge) was published in July. It is Mills' 10th book and Helms Mills' third. Jean recently completed a fourth book (due out in early 2005) and has signed a contract on a fifth book, on Organizational Change (written with Kelly Dye, PhD entry 2002) to appear in 2006.

**Albert J. Mills** recently organized the Case Writing competition of the Critical Management Studies Interest Group and the Management Education Division at the annual meeting of the Academy of Management. He also presented a paper – "Psychoanalysis and Sex Discrimination at Work" – with Kelly Dye (PhD entry, 2002), and was part of a symposium on Management and Organizational History.

**Jean Helms Mills** was a finalist in the Academy of Management "Dark Side III" Case Writing Competition. She also was a member of a symposium on Management and Organizational History at the Academy of Management, and presented a paper – "Ethnostatistics, Sensemaking and Business School Rankings" – with Terrance Weatherbee (PhD, 2002 entry): the paper was included in the prestigious Best Paper Proceedings. Earlier this year Jean won Best Paper in the Gender and Diversity in Organizations Division at the annual meeting of the Administrative Sciences Association of Canada.

## SMU United Way Campaign Underway

You can change the future of Halifax by donating to the 2004 United Way Campaign. The Saint Mary's University drive kicked off on October 13, with a free BBQ and tug-of-war at the Tower Courtside

Lounge. The theme of celebration was how the United Way makes our city a better place to live, work and play. (Donations were accepted)

In 2003 the Metro United Way provided funding to over

130 programs and services aimed at improving the quality of life in Halifax. In the aftermath of Hurricane Juan last year, the United Way created a fund - the Neighbourhood Rebuilding

## In the News...

**Dr. J. Colin Dodds**, President of Saint Mary's, spoke about the Pride in Our Shared Neighbourhood Program in the Halifax Herald, the Halifax Daily News and on CBC Canada Now and CBC Radio (Nova Scotia and Canada). As President of the Council of Nova Scotia University Presidents, he spoke to the Halifax Herald and the Halifax Daily News about tuition fees in the region and across Canada.

**Dr. Andrew Harvey**, Economics, was interviewed by the Wall Street Journal about his Time Studies Research project that he is conducting through the Sobey School of Business.

**Dr. David Turner**, Astronomy and Physics, was highlighted in the New York Times, the Denver Post, the Globe and Mail and the Halifax Herald for his research project on the Northern Star.

**Dr. Leonard Preyra**, Political Science, has appeared in the Globe and Mail, the Toronto Star, the Halifax Herald, ATV/CTV News, CBC Radio, CBC TV.

**David Lane**, Astronomy and Physics, appeared on CBC Radio (Nova Scotia and Canada), ATV/CTV, Metro Radio Group, where he spoke about the University partnering with NASA during the Transit of Venus.

**Dr. Terry Murphy**, Academic Vice-President (AVP), was interviewed by the Halifax Herald about the importance of immigration for Nova Scotia and Atlantic Canada. He was also interviewed by Maclean's Magazine where he spoke about the University's Academic Plan he spearheaded since taking the role as AVP.

**Dr. Esther Enns**, Dean of Arts, was interviewed by the Halifax Herald about the growing numbers of new faculty and programs in the Faculty of Arts.

**Dr. Ather Akbari**, is quoted about a conference he is organizing - "Immigration and Outmigration: Atlantic Canada at a Crossroads through the Atlantic Metropolis Atlantique (AMA)" in the *Nova Scotia Business Journal* (carried via the Globe and Mail).

**Dr. Jeremy Lundholm**, Biology and Environmental Science, was on CBC's Quirks and Quarks program, talking about a new book he co-authored - The Urban Cliff Revolution. His book has been receiving attention world wide and has received coverage in prominent publications, such as Nature Magazine and Europe's Focus Magazine.

**Dr. Chris MacDonald**, Philosophy, was highlighted in the Halifax Daily News after receiving \$100,000.00 from the Canadian Institute of Health Research (CIHR) for his research project - "Biotech Ethics: Corporate decisions as key to better health and better health policy."

**Dr. Larry Haiven**, Management, spoke about the National Hockey League (NHL) strike with the Canadian HR Reporter.

**Dr. Judy Haiven**, Management, provided her expertise in labour relations to a number of media outlets, such as ATV/CTV, the Halifax Herald, the Halifax Daily News, and Global TV, during the Aliant strike.

**Blake Nill**, Coach of the Huskies football team, as well as assistant coaches and players, have appeared in the Halifax Herald, the Halifax Daily News and on ATV/CTV News after launching the Bullies Never Win Program.

**Dr. David Murphy**, Director of the Athletics and Recreation Department, spoke to the Halifax Herald and Halifax Daily News about a possible Canadian Football League (CFL) exhibition game being played next summer at Huskies Stadium. He also appeared in the Halifax Daily News and the Halifax Herald talking about the launch of the Sponsor Program, the 1950s Football Reunion, and the Sport Hall of Fame Induction Ceremony.

## Accounting Association Awards SMU Members

The Certified General Accountants (CGA) Association of Nova Scotia recently recognized two members of the Saint Mary's University community. Professor Xiaofei Song, BSC, MSC, MBA, PHD, CGA of the Accounting Department in the Sobey School of Business was awarded the professional accounting designation CGA. Also, at a special reception, Larry Corrigan, Bcomm, MBA, FCGA, Vice-President Finance at Saint Mary's was recognized by the CGA Association for his contributions as a Past President of the CGA Association of Nova Scotia.

Fund to assist those who were hit hardest by the harsh winds and rain.

This year the Saint Mary's Business Development Centre is heading up the Campus Campaign, with your generosity and support we hope to raise even more than last year and exceed our goal of \$26,000. Look for the

thermometers around campus to mark our progress.

Watch for 50/50 draws at three Huskies Basketball games (October 30 and 31, November 14), a penny drive during the week of November 1, and draws for gift baskets.

The United Way has been contributing to a successful

future for Halifax for over 75 years, and needs your help to continue.

Please give generously.

**If you have any questions please contact: Shelley Hessian, Project Manager, SMUBDC, shelley.hessian@smu.ca, (902) 429-4535.**
