Message from the President

Dear Fellow Alumnus:

It is my pleasure to bring you up to date on the activities of your Executive and fellow Santamarians.

The Reunion Weekend, capped off by our Annual Dinner, in Halifax was a resounding success. Attendance grows every year and we have had many positive comments about the dance. The Weekend also provided an excellent opportunity for the grand opening of the University's new digs at McNally East where the old gym has been transformed into classrooms, computer labs and a superior faculty lounge.

David Gray of the Toronto Branch accepted the Branch of the Year Award at our Annual Dinner and promised all alumni a wonderful time in Toronto at the Vanier Cup. Even though the Huskies did not end up in the Vanier, David did live up to his promise. The Toronto Branch held its annual dinner in November with attendance of 125. We in Halifax are happy to see our counterparts doing such a good job of keeping the SMU spirit alive.

At press time, the Executive is just starting to grapple with an improved agenda for our annual meeting to make it as successful as the golf tournament and the Annual Dinner have been. Look for your notice — I'm confident that by mailing time we will have come up with something to grab your interest.

Happy New Year to all!

Sincerely,

Karen Oldfield
President
Saint Mary's University Alumni Association

P.S. Have you received your Saint Mary's MasterCard card?
They look great.

The presentation was made to David at the Annual Dinner at the Halifax Sheraton on Saturday, October 14, 1989. David was also honoured at the Toronto Annual Dinner on November 18, 1989 with a Certificate of Appreciation in recognition of his service as President of the Toronto Branch from 1987-1989.

IF GIVING GIVES YOU
A WARM FEELING
IN YOUR TOES,
WE NEED A LOT
MORE WARM TOES.

The giving begins with you.

Establishment of Saint Mary's University Annual Fund

The overwhelming success of Saint Mary's first Capital Campaign demonstrated to all of us the support and generosity of alumni for the financial well-being of Saint Mary's University.

We also found that through the phone-mail phase of the Campaign, we were able to speak to many alumni who appreciate being personally contacted by students of Saint Mary's and who welcome the opportunity to voice their concerns and support for current programs and policies of the University.

We will continue our fund-raising efforts with an Annual Fund using the phone/mail approach.

The 1989 Annual Fund will contribute over a quarter of a million dollars to the ever-increasing operating costs of the University, scholarships and bursaries, and special funding requests from groups on campus.

This year we are fortunate in having Al Byrne, BComm '68, a senior partner with Doane Raymond, as Annual Fund chair. Currently, Al is president of the Neptune Theatre Foundation, vice-chairman finance of the 1990 World Figure Skating Organizing Committee and chairman of the National Easter Seals Committee.

The Annual Fund mail program employs over two dozen Saint Mary's students providing them with much needed income and the opportunity to gain valuable marketing experience for future careers. 

1964 Football Huskies return to Campus

Atlantic Bowl Weekend saw the return to campus of the gridiron stars of 1964. Organized by Dr. David Murphy, quarterback of the 1964 edition of the Huskies, members of the 1964 Atlantic Bowl Champion Huskies and their families returned to campus. Receptions, brunches and attendance at the 1989 Atlantic Bowl were the order of the day.

Highlighting the weekend was a tribute to Bob Hayes, "the Coach" of that 1964 team. So strong is the appreciation and loyalty to Coach Hayes that the team initiated and dedicated a football scholarship in his name.

Roll Call included the following names: Don Murphy, Bob Ruotolo, Al Keith, Bob Johnston, Larry Matheson, Paul Puma, Wayne O'Brien, Steve Armitage, Frank Garner, Tom Haney, J.B. Murphy, Stu O'Brien, Daryl Burgess, Bill Baldwin, Frank Garner, Tom Haney, J.B. Murphy, Stu O'Brien, Daryl Burgess, and Doc Charlie. Contributions to the Bob Hayes Football Scholarship can be made c/o The Alumni Association. 🌿

David Murphy, BA '66, left, and "Coach" Bob Hayes review memorabilia from the 1964 championship football season.

Record Numbers for Halifax Golf Tournament — Kelly Brothers Trophy Presented

The alumni golf tournament in Halifax, using a team scramble format for the first time, attracted a record 160 golfers and would-be-golfers. Presented for the first time was the Kelly Brothers Trophy for the top team. This truly recognizes the contribution to the golf tournament and the Alumni Association of brothers Carl and Granville Kelly. Pictured above are 1989 champions, left to right: Murray Bishop, BA '66, BEd '68; Roger LaRocque, BA '68, BEd '69; Don Keleher, Dip Eng '69, BSc '70; Rob Legere, MBA '87; and Don Lohnes, Dip Eng '67.

Bermuda Alumni Association Well and Flourishing

On Wednesday, November 22, 1989, the Oleander Room of the Belmont Hotel, Warwick, was the site of a very successful gathering of parents whose offspring are currently enrolled at Saint Mary's University, and members of the Bermuda Alumni Association.

Following registration and an opportunity to mingle with the guests, Registrar Elizabeth A. Chard provided an overview of recent developments at the University, noting the increase in enrollment, the attempts of the University to continue its concern for the individual student, and the continuing efforts to ensure a mix of students at the University (noting that there were 49 Bermudians in attendance at Saint Mary's at the present time). A video followed in which the President of the University welcomed in absentia alumni and parents. Certainly the highlight of the evening was a 20-minute video on Halifax and the University which included a message from the students taped for delivery back to their parents.

The following evening an information session was held at the Hamilton Princess Hotel for students, parents, and other individuals on the Island who were interested in learning more about not only Saint Mary's University but Dalhousie, Mount Saint Vincent, St. Francis Xavier, Acadia, and Mount Allison. The session was extremely well attended with over 200 individuals dropping by to find out more about the academic programmes of the University and also the costs of being educated in Canada. It was most gratifying to the Registrar and Director of Admissions to receive assistance from a number of Bermudian Alumni including Glenn Johnson, the president of the Bermuda Alumni Association; Albert Joell; Derrick and Marie Joell; and also Perry Mason. And last but not least, Malcolm Butterfield, who turned out to be the oldest in terms of year of graduation from Saint Mary's. These people provided invaluable service in being able to indicate to Bermudians exactly the quality of the education which they had received, the quality of life which they experienced at Saint Mary's, and the enthusiasm with which they have maintained their University ties.

The Year In Brief . . .

During 1989, Saint Mary's University:

- *joined forces with the Dartmouth Chamber of Commerce to establish a Business Development Centre to serve businesses in the Burnside Industrial Park. The Saint Mary's University Business Development Centre staffed by MBA and Science students, provides low-cost research and assistance to local businesses.*
- *signed an agreement with the Nova Scotia Research Foundation Council (NSRFC) that is designed to develop closer ties between the University's researchers and private industry in Nova Scotia.*
- *adopted an AIDS (Acquired Immune Deficiency Syndrome) policy developed by the Presidential Committee specifically set-up for that purpose. The policy is based on recommendations from the Canadian Association of University Teachers.*
- *once again hosted the Nova Scotia Special Olympics.*
- *honoured fifteen first-year science and engineering students who were among the first Canada Scholars under a new Federal Government program designed to encourage study in sciences and engineering.*
- *conferred honorary degrees on singer Rita MacNeil and Bank of Montreal Vice President L. Richard O'Hagan at Convocation Ceremonies on May 8, 1989.*
- *established a committee to look at the future of the University. The Committee on the Future of the University, chaired by former Brock University President Dr. Alan Earp, completed its University report in November, 1989. The committee, which was comprised of faculty, students and community members, has listened to and looked closely at the realities and perceptions of our University.*
- *graduated its largest class ever. More than 700 students received degrees and diplomas at Convocation Ceremonies.*
- *Marketing students James Curleigh, Joanie Cunningham, Michelle Foxe and Greg Smith produced a top rated marketing plan to win the NB Tel annual Marketing Competition.*
- *Philosophy Professor Dr. Peter March received the Alumni Association's Fr. William A. Stewart, S.J., Medal for Teaching.*
- *Astronomy Professor Dr. George Mitchell received Saint Mary's first award for Excellence in Research at Convocation Ceremonies in May.*
- *hosted, in the Tower, the AIDS quilt; a giant quilt commemorating AIDS victims.*
- *alumnus Dr. Michael Larsen, BA '66, was appointed Dean of Arts.*
- *Alumni Association Executive elected Karen Oldfield as President of the Association.*
- *opened a new centre at the World Trade & Convention Centre in downtown Halifax. The new centre will use the resources of the University to work with the business community in the development of programs to benefit individuals, firms, and the local regional economy.*
- *appointed its first Research Officer, Dr. Peter Ricketts of the Geography Department.*
- *opened a Child Care Centre on the main floor of the Edmund Rice Residence.*

Affinity Card

We have been receiving a lot of calls at the Alumni office from grads and others with questions about the new Bank of Montreal (B of M) MasterCard® card for Saint Mary's University. Many are asking what the "trick" is; how can the Bank afford to offer a benefits package including a special interest rate to cardholders and rebate money to Saint Mary's University with every credit card purchase? Who pays? There is no trick. The B of M has calculated that the gains (winning a larger share of the credit card market through offering this card) outweigh the costs (offering benefits to the cardholder and support to the University).

I'd like to share with you other common questions, as well as answers to them.

Q If I already have a Bank of Montreal MasterCard card, can I get the new Bank of Montreal MasterCard card for Saint Mary's University?

A Absolutely. Just complete the vital statistics portion of the application, insert your current Bank of Montreal MasterCard number in the appropriate section, and then sign the form. If your Bank of Montreal MasterCard account is in good standing, your existing account will be cancelled and the balance transferred to the new account.

Q How does the program work?

A The Bank of Montreal has agreed to pay Saint Mary's University based on an escalating scale of fees according to card usage. Also, a portion of the annual fee is remitted to the University. The University's share will be used to support new and continuing Alumni and University endeavours.

Q Who can apply for the new Bank of Montreal MasterCard card for Saint Mary's University?

A All alumni, students*, friends of the University, and their spouses in any of these categories. There's no need to have an account with the B of M to qualify. (*Separate applications are available for undergraduates on campus or through the Alumni Office).

Unfortunately, under conditions imposed by MasterCard International, the card is available only to applicants having a permanent Canadian address.

Q How can the University MasterCard card be used?

A It is used exactly the same way as any other MasterCard card and provides access to the same goods and services as the standard MasterCard. It is recognized worldwide as a regular credit card.

Q Does the University card provide access to automated banking machines?

A Yes. The card provides access to 30,000 ABM's throughout North America.

Q What special benefits do I get with my University MasterCard card?

A There are a number of benefits, which have been negotiated especially for you. These include:

- Designer Card featuring Saint Mary's University
- Special interest rate currently 1% below the regular Bank of Montreal MasterCard rate
- Free \$100,000 travel accident insurance policy¹
- \$1,000 (U.S.) emergency cash²
- Free card registration service³
- Emergency airline ticket service³
- Free emergency card replacement
- Free spousal card

There are no transaction fees⁴ and the annual \$10 fee has been waived for the first year.

Q Why the \$10 renewal fee?

A The \$10 fee, beginning in the second year, is a reflection of the real value of the card and its extra features.

Q This sounds too good to be true. What's the catch?

A There's no catch. With every transaction involving the Bank of Montreal MasterCard card for Saint Mary's University, the Bank shares a portion of its revenue with the University. There are no additional costs or charges to the cardholder. The Bank benefits because of the expanded use of its credit cards, and it makes escalating payments to Saint Mary's University, based on total net sales and on the number of cardholder accounts. You, the cardholder, get the benefit of added services and benefits, and a special interest rate on the basis of your unique University card.

Q Does Saint Mary's University have access to the private financial information I include on my card application?

A Absolutely not. This application, like all Bank of Montreal credit applications, is strictly confidential. Under no circumstances will any of the financial information you provide be released to the University.

Q Does Saint Mary's University share in the interest payments on outstanding balances?

A No. The University does not share in any revenue realized by the Bank of Montreal on outstanding balances. The interest rate charged by the Bank, however, will be 1% less for the University cardholder than the holder of a standard Bank of Montreal MasterCard.

I'd be pleased to hear from anyone who has further questions on any aspect of the Bank of Montreal/Saint Mary's University MasterCard card program. An application form has been included on the opposite page. Alumni should mail the completed form to MasterCard Accounts Office, P.O. Box 4050, Stn. B., Montreal, Quebec, H3B 4J2. For information call the Alumni Office at 420-5418.

Tom McDonell
Director of Alumni

Accessibility: A Matter of Body and Mind

Susan Gray

Imagine having a conversation with someone without speaking. Most of what you need to communicate has to be done with a pen and paper. This "conversation" takes the format of questions and answers. Even your visual clues and body language are affected because the sounds and speech which accompany them are not heard.

In less than seventy-five minutes, this conversation with Elizabeth Doull has taken seven pages of writing.

Brian Levangie sits pouring over a text book. One chapter of this Computer Science Thriller has taken up three hours of his time.

The bookcase in Barry Abbott's office contains a Braille dictionary, but don't go in thinking you can borrow it to take home in your knapsacks, there are over 70 volumes!

While these examples may seem extreme they are representative of normal circumstances physically challenged individuals face everyday.

At Saint Mary's University, the Atlantic Centre of Research, Access and Support for Disabled Students does just what its name implies; provides improved accessibility to higher education, support to students in the system, and opportunities for significant employment upon graduation.

The Atlantic Centre's Director David Leitch feels Saint Mary's has a history of responding to people with disabilities which reaches back to the days of the Christian Brothers. For more recent examples Leitch sites the Ferguson Library for the Print Handicapped and the Edmund Rice Residence, one of the first built to be accessible for the mobility impaired.

For nearly a decade the Atlantic Centre at Saint Mary's has been providing opportunities for persons with disabilities at the post-secondary educational level and beyond.

In 1985 the Federal Government responded to a funding shortage with a two-and-a-half year demonstration applied research grant to establish the Atlantic Centre as one of three centres of excellence across Canada. The University of Western Ontario and the University of Alberta complete the trio.

To respond to the demand from hearing impaired students and indeed to help establish Saint Mary's as an institution which initially focused on providing access to the hearing impaired, the Atlantic Centre began a training program for interpreters. For the past three years the Centre has taken in ten persons each year from across Canada to train to be interpreters of the deaf.

Next, the Centre turned its attention to the accessibility of the campus. Doors, elevators and washrooms were tested for accessibility and modifications were made.

Leitch and the staff at the Atlantic Centre realized that people in the secondary school system needed to know about what was possible for disabled students once they graduated. They continue to work with admissions officers, high school counsellors and disabled students supplying information and encouragement to continue into post secondary education.

In the fall of 1987, the Province of Nova Scotia Department of Community Services came through with funding to cover a period of three years, cost shared with Health and Welfare Canada. The funding covered salaries, travel and training but had no provision for increments. "But don't get me wrong," says Leitch, "it certainly was better than receiving no support. It's ironic though that at this stage, we were really at the forefront in terms of universities in Canada responding to people with disabilities, and now in Nova Scotia we still haven't gone beyond that first minimal support."

While the future of funding is now at a critical point — there are over 80 students receiving support and a constant stream of inquiries from schools, counsellors and disabled persons. The Atlantic Centre manages to maintain a positive attitude. "Yes, there are costs, as with everything that happens in life, but the return is that those students are getting jobs and that society has decided that it is the absolute right of disabled persons to have access to education," Leitch explains.

One such student is Brian Levangie. A low-vision student, Brian reads and writes with the help of a Visio Tech Camera — essentially a video camera which magnifies text on a screen. Using this equipment, Brian reads one page in five to seven minutes. As a second year commerce student majoring in Computer Science, Brian completes his numerous assignments using the Commerce computer laboratory equipped with a program which displays enlarged type on the screen.

"I take my own notes in class, but sometimes they don't make any sense. Luckily, most professors stick to the books," Brian comments.

Because the SMU campus is relatively small, Brian doesn't have much trouble finding his way around. "At the beginning of the semester I came in a few days before classes and began to memorize the locations of my lectures."

Paul Gouett, twice a graduate of Saint Mary's has chosen to live on the eighth floor in Highrise II. Without the use of his arms and legs, Paul relies on an electric wheelchair which he skillfully operates using his mouthstick.

As a student at Saint Mary's, Paul Gouett, BA '70, MA '78, was not in a wheelchair. Today, he describes the University as accessible, but quickly adds that there are areas which need improvement. When asked for examples Paul prefaces: "I chose to live at Saint Mary's because I like it here, many of my friends live in the area, and I owe a lot to the university. But, at the same time I am a stone in their shoe." His analogy refers to his "lobby" at the university to further improve accessibility.

Paul elaborates, "I would like to see an elevator from the first to the second floor in Loyola to provide quick access to classes and the multi purpose room; also, there is no wheelchair shower in either high rise and the Tower is too far to go first thing in the morning before classes. And even something simple like the doors to the library — while chivalry is not dead at Saint Mary's, I like to be independent."

Dr. Roger Barnsley, Dean of Education, has his office in the Burke Education Centre, a building he describes as not fully accessible. "We recently installed a signalling device at the entrance of the building in case our buddy system breaks down and a disabled person is not accompanied to the building."

Having a disabled person in a special education course has been helpful according to Barnsley. "There has been a tremendously positive response from other students, and certainly the presence of someone who lives daily with various physical and psychological challenges helps to dispel myths and misconceptions."

Barnsley sees Saint Mary's commitment to providing opportunities to the physically challenged as more than a trend, "It's a necessity."

Disabled students entering post secondary education in the undergraduate,

masters or PhD level are in the final years of scholastic integration. The beginning of the integration process can be traced back, in some cases, to primary school.

Paul Cable, co-ordinator of Student Services for the Halifax District School Board, is responsible for the thirty-seven schools in the city. Main streaming is a complex and controversial issue for parents and teachers; Paul Cable is the man in the middle who facilitates the process.

Cable explains his philosophy of selective integration: "Some children can benefit from being integrated and some need a more segregated environment." The decision is made by a "school term" on a case by case basis in an attempt to determine if the child can make reasonable academic and social gains in the integrated environment without interfering with the education of other children in the class."

"... society has decided that it is the absolute right of disabled persons to have access to education."

— David Leitch

However, Cable is quick to differentiate what he sees as main-streaming and "main-dumping". For mainstreaming to work, schools must provide support systems — this may be in the form of a teacher assistant or a mainstreaming support teacher who helps the teacher modify the classroom program or a resource teacher who sees the child separately at various times during the day to reinforce what had been taught in the class.

"Maidumping, is taking handicapped kids, putting them in a regular class, providing no support to the teacher for the child, and we strongly object to that practice."

Teachers are prepared for teaching handicapped children with in-service training which could include visits to integrated classrooms to observe teaching techniques.

"Initially teachers are — and understandably — apprehensive about teaching handicapped children," Cable explains, "but my experience has been that once teachers

have had the opportunity to teach handicapped children, they feel more positive about integration."

There are two types of programs available to handicapped children. Many are on their own I.E.P. — individual educational program. These are students who are developmentally, significantly behind and are placed in the class because it allows them to be educated with age appropriate peers. Parents are involved with the school psychologist, the resource teacher, the classroom teacher and the curriculum advisor in designing the I.E.P.

The other type of program refers to higher functioning students who are also educated among their age appropriate peers. This M.E.P. — Modified Educational Program is designed for students who don't require an I.E.P., but who need a less difficult curriculum than their classmates.

Cable believes strongly in selective integration, but often finds himself in a no-win situation. "On the one hand, some parents of disabled children feel we are not moving fast enough, and on the other hand, some teachers feel we are moving too fast." When this situation occurs, Cable makes a decision which he characterizes as child centred. "We look at the child, we look at our resources and we ask what is in this child's best educational interest, irrespective of the parents and teacher's reactions."

The School Board is not alone in its effort to integrate. The Atlantic Provinces Special Education Authority — APSEA — an inter-provincial co-operative agency, provides programs and services to support residents of Atlantic Canada between the ages of birth and twenty-one years with low incidence handicaps.

"We offer two centres of specialization in the Atlantic Region; one is the Resource Centre for the Visually Impaired, here in Halifax, and the other is the Resource Centre for the Hearing Impaired in Amherst," explains APSEA superintendent Arnold Jones.

Both centres of specialization are a resource to the public school system in the areas of assessment, program development, curriculum development, and in-service training for teachers. Specialized equipment is made available on loan to assist visually

Anne West

Geology Graduate Enjoys Refinery Job

When Kimberley MacMillan (nee Lyghtle) entered the Geology Department at Saint Mary's in 1982, things looked good. Oil prices were high and the Liberal government was funding the National Energy Program to try and make Canada energy self-sufficient. Rigs were drilling off the coasts of Nova Scotia and Newfoundland and exploration for hydrocarbons was booming. Geology was in!

Three years later, when Kimberley graduated, things were different. World oil prices had dropped dramatically and Canadian offshore oil and gas had become uneconomic to produce. The actions of the Arab Countries had changed the world, and in doing so changed the prospects for the Geology class of '85.

Unlike most of her fellow students, however, Kimberley did make it into the oil industry, albeit not quite as she had planned during her student years. For four years she has been a process operator at the Esso refinery in Dartmouth. She does a tough job and enjoys it.

After graduating Kimberley spent the summer working with Sport Nova Scotia, but in September she saw a job advertised at the refinery. She didn't really expect to get it, and says, "I didn't even know what process was." After a battery of interviews and aptitude tests, and a medical, it finally dawned on her that she had been hired.

She is a small but essential cog in the refining of crude oil into products

Instead of elegant business clothes, Kimberley goes to work in coveralls, a steel helmet, work boots, and rubber gloves. She wears ear plugs, safety glasses and a belt equipped with a 10 inch pipe wrench and a two-way radio. She is a small but essential cog in the refining of crude oil into products that range from gasoline and Bunker C to asphalt, butane and the chemicals used in manufacturing plastics.

Part of Kimberley's training at the refinery was to, "follow the line from the tower and try to learn all the processes; where everything is going." She remembers, "It was overwhelming. What had I gotten into, looking at all those big pumps and doors and pieces of equipment with 100 psi pressure and 90 degree temperatures inside. It was very scary at first."

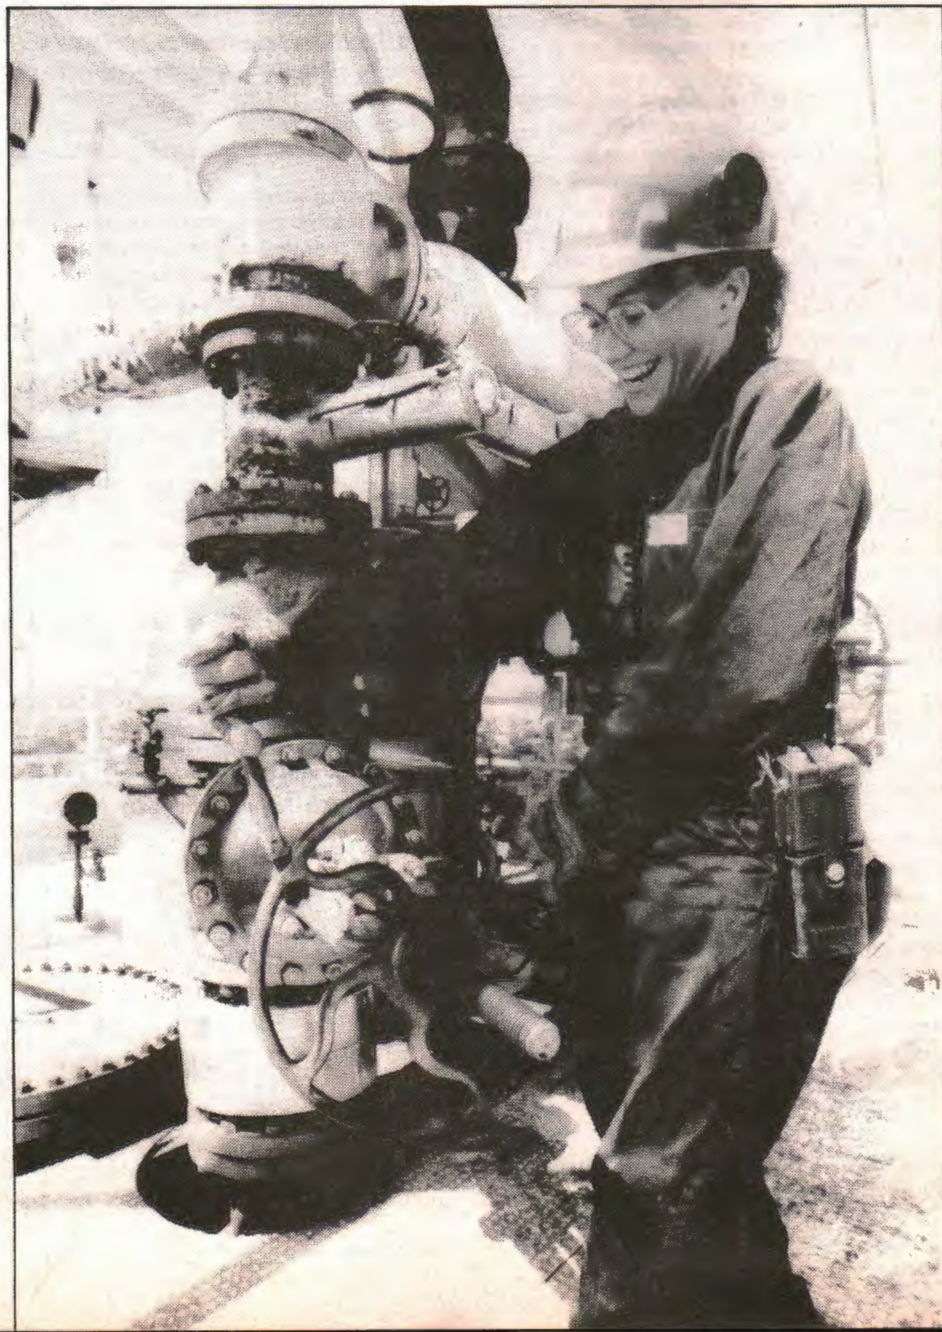

Kimberley and the two other women working at the refinery (one of them is fellow geology graduate Stephanie Marien) had to learn more than the process when

they began work. "My first year I just about froze to death," says Kimberley. "The problem was I went out with too many layers on. I looked like the Michelin man. Now I have learned to keep moving. You can sit there and sweat on a cold day if you are turning a lot of valves."

Working in a previously all-male environment also brought its challenges. "At first," she remembers, "I had to prove that I could do the work, that I did not mind getting dirty and did not mind being stuck outside in the

cold. Once I did that they had respect for me. I am sure they were all pretty leery at first."

Kimberley and her fellow workers clamber round the refinery, physically checking on the refining process. Much of the process is controlled from inside a warm computer centre, but there is still a need for skilled outside workers to tend the pumps and valves. Kimberley likens her work to that of a stationary engineer, and says, "We start the shift by making a really good set of rounds, just like a hospital. We monitor temperatures

WAMBOLDT-WATERFIELD/DAVE GRANDY

and pressures and check pumps to make sure they are not running too hot. We check the levels in the towers and the drums. There is a lot of climbing." By altering the valves, the operators can, "make a stream of product go in a different direction" depending on what the end product is destined to be.

Describing what happens at the refinery, she says, "Crude oil comes in ships and is pumped back into the tank field. Then the atmospheric and vacuum tower unit breaks it down a little bit." Next the oil flows to the catalytic cracker, or 'cat' where Kimberley works. In this huge piece of equipment different types of chemical catalysts are introduced to the oil. Explains Kimberley, "It cracks the hydrocarbons into different types of molecules. . .for the different products that we want to make."

What has four years of the refinery taught Kimberley? "I used to get uptight when faced with decisions," she says, "but I had to learn not to be that way. You have to react fast."

Kimberley MacMillan on and off the job.

WEST PHOTO

Just over a year ago Kimberley married fellow geologist Danny MacMillan. Danny works for the Liquor Commission, but is finishing his interrupted geology degree and also taking computer courses.

Because both Kimberley and Danny are on shift work, they do not manage to spend as much time together as they would like, but as Kimberley says philosophically, "We shall never fight."

Recalling her years at Saint Mary's, Kimberley remembers her professors, Dr. Georgia Pe-Piper, Dr. Jaroslav Dostal, Dr. Hope Simpson and Dr. John Waldron. Of the latter she says, "He made us work the hardest." Her favorite part of the course was Dr. Waldron's ten day field school. She remembers, "He took us in a van to Antigonish, then dropped us off in pairs to follow a river. We mapped the whole thing out, took measurements and noted what kinds of rocks we found."

She has fond memories, too, of the Geology Society. "We had the best time. We had a really good crowd. I cannot see anyone having such fun as we had. We always did stuff together, and everybody always came to our parties."

Kimberley was slightly reluctant to talk to the Maroon & White. She finds it embarrassing to be singled out from her fellow workers and hates to admit that she is a pioneer in a non-traditional role for a woman. She says, "It is not a big deal. I am not a big women's libber. I still want Danny to open the door for me. I still want to be treated like a girl." She adds, however, "I can do that job." 

Accessibility: A Matter of Body and Mind

continued from page 11

and hearing impaired students. Each centre also houses a small residential school. "The major focus of our program, in addition to the specialization and support, is our support of off-campus programs where the majority of deaf and blind children are actually integrated into public school," continues Jones.

In the case of the learning disabled, APSEA receives referrals from school districts through their provincial departments of education. From there an expert committee reviews the referrals and determines whether they meet APSEA's criteria for a residential placement. If they do and this is provided by the board, then APSEA "purchases" a spot in a private school whose main mandate is remediation of children with learning disabilities.

"I think the critical thing to remember is that as an Atlantic agency we support a full continuum of services for children all the way from placement of children in a class with no support to residential school and

home placements. So, all options are there depending upon the needs of the child and the districts ability to accommodate the child," says Jones in summary.

Jones feels the APSEA staff makes a special effort making post-secondary connections and encouraging students to continue to further their education.

David Leitch of the Atlantic Centre thinks more encouragement is needed at the grade school level. Leitch began a program of actively recruiting and disseminating information in high schools when he discovered that many counsellors had questions and misconceptions about accessibility at universities. "We got in touch with counsellors, parents and the individual disabled students to answer questions and encourage them not to rule out the possibility of higher education," says Leitch.

While the issue of mainstreaming may remain contentious, a tour of the Atlantic Centre and the Saint Mary's campus would confirm that advances are being made to encourage and facilitate the successful integration of physically challenged individuals.

City's Finest Fish and Chips

Anne West

John Hilton graduated with a Bachelor of Commerce in 1974. The perfect job opportunity did not immediately present itself, so he decided to create his own employment. He found a building on the corner of Chebucto Road and Connolly Street in Halifax which had been a fish and chip restaurant, negotiated a lease and re-opened it under the name of Fries & Co. Unlike so many students, he did not work as a waiter during his student years and says, "I was pretty green and made a lot of mistakes at first."

The restaurant was not intended to be a long term project. He says, "I thought it would be a short thing, then move on to something else." However, fifteen years later he has created a niche in the eating habits of Haligonians and business is as good as ever.

The menu has not changed over the years. Fries & Co. serves, "just plain fish and chips," says John. Ask him the secret of his success and he says, "Just use good products and you cannot go wrong." He buys his fish from local fishermen and says, "We started cutting our fries from day one and we always use haddock, although the price has gone crazy over the years."

WEST PHOTO

A family meal at Fries and Co. L to R: Jackie, Timmy, John, Nikki and Lindsay.

All has not been plain sailing in this business. Inflation is one problem and growing competition another. "Since I have

been in business, competition for the fast food dollar has been going crazy, with new outlets coming on stream daily," he says adding, "We are still in business, we just slug it out a little more to do a better job and cut back on staff." General interest in healthier eating is another hard to gauge factor in the equation of success. At present John is searching for, "a shortening with vegetable oil that is low in polyunsaturates."

Fries and Co. has a faithful following. Some people have been coming in, "since day one," says John. Others make this modest restaurant their first port of call when they come back to Halifax from new homes to the west. Such is John's reputation that it is Fries and Co. that is recommended to the rich and famous when they land in the city. "We sent an order to the Beach Boys when they were in Halifax," he says. "Ed Broadbent ate here when he was in town and we have a lot of local celebrities from radio and TV."

Fries and Co. is a family business. John's wife Jackie does some of the bookkeeping when their youngest daughter Lindsay is at pre-school and the older children, Nikki and Timmy, like to help out when they come in. It takes a staff of ten to keep the restaurant going, although it is never open later than 10 p.m. This suits John's own lifestyle. He says, "I expect we lose some of the business, but you just have to adjust to what you can take."

Fries and Co. has customers that come in once a week, and even some who come in every day. John himself says, "I eat a little bit every day. I still like it after fifteen years."

We have a new location! Saint Mary's University at the World Trade Centre is now open in the heart of downtown Halifax. The new centre will use the resources of the University to work with the business community. One major new initiative will be the Executive MBA Program which starts in September of 1990.

Saint Mary's new Child Care Centre was officially opened this fall. The centre, which can accommodate thirty-four children, is located in the Rice Residence.

The Statement of Institutional Role and Planned Capacity was delivered to the Maritime Provinces Higher Education Commission (MPHEC) on September 29, 1989. The statement defines the University's goals and outlines how we plan to achieve them. The attainment of these goals now rests with the MPHEC as it begins deliberations on similar reports from the other twelve Nova Scotia Universities.

Saint Mary's University Students Association donated \$1260.00, part of the proceeds of its first bash of the year, to Camp Tignish; a camp for disabled kids supported by the Abilities Foundation of Nova Scotia.

Joy Woolfrey is the new director of the International Education Centre. The Centre develops information and analysis about the developing world and about Canadian multiculturalism.

Sixty Nova Scotian teachers and education administrators attended a conference on "Improving the Quality of Learning" at Saint Mary's in October.

Dr. John Waldron of the Geology Department has received a \$10,000 grant from the University supporting Geoscience Grants Program of the Lithoprobe project. Lithoprobe is a major Canadian project in the Earth Sciences, funded principally by the Natural Sciences and Engineering Research Council and Energy Mines & Resources.

Sanjeev Chowdhury, BComm '89, president of the Saint Mary's University Students Association has been named the winner of a Rotary International Foundation Scholarship. He plans to use this prestigious scholarship to undertake a masters program in international law and business administration, preferably at Harvard, in his scholarship year of 1990-91.

Dr. Colin Dodds, dean of commerce at Saint Mary's, travelled to the Soviet Union in November with Prime Minister Brian Mulrooney, members of the External Affairs Department, and a delegation of Canadian businessmen. Dr. Dodds made the trip as chair of the standing committee in international linkages for the Federation of Deans of Business Schools.

A group of MBA students held an event entitled *Taj Mahal* on Saturday, November 18, 1989 in the Private Dining Room at Saint Mary's. The students cooked and hosted an Indian Dinner as part of an Organizational Behavior class group project. Anamitra Shome was one of the student hosts and works part-time in the Annual Fund Centre as a student telemarketer. Proceeds from the dinner were donated to the Annual Fund for the MBA Alumni Scholarship.

The Quarter Century Club has been created at Saint Mary's. Membership includes faculty and administrators who have served the University for twenty-five years or more, retired faculty members and administrators, and the spouses of both members and deceased faculty and administrators. The role of the Club is to keep in touch with these people and provide an opportunity to keep former colleagues up to date with what is happening on campus today.

Paul Rooney, manager of Media Services and Fr. William Lonc of the Physics Department have installed a new satellite dish atop the McNally building which receives news and current affairs programming from around the world.

Two professors and five students from Halifax's twin city of Hakkodate, Japan are teaching and studying on campus this year. Saint Mary's has offered an inter disciplinary program in Asian Studies for many years, but this is the first time Japanese professors and students have been on campus.

The University Senate recently approved a new science major. Starting September 1990, students will be able to complete either a major degree or an Honors degree in *Astrophysics*.

Congratulations to Ted Flinn, BA '57, on his appointment as chairman, Board of Governors for Saint Mary's University. Upon graduation from Saint Mary's Ted completed his LLB at Dalhousie. He has served as vice chairman of the Board of the Nova Scotia Law Foundation, and represented Nova Scotia and Newfoundland on the Board of Directors of the Federation of Law Societies of Canada. He has also served on the Halifax School Board and various boards and committees within the Roman Catholic Church as well as working for charitable organizations in the areas of fund raising and professional advice.

Executive Elections

Nominations for Alumni Representatives on the University Board of Governors

(Three year term commencing May 1990)

John Bishop,
BComm '74, BEd '77

A Vice President with Jack & Co. Ltd., John has been volunteering his services to Saint Mary's for a good number of years. He is a past president of the Saint Mary's Alumni Association and a former executive member. In addition to serving on a number of Alumni Association committees he was also the chair of the 1986 Alumni Association Annual Dinner. John continues in his capacity as the public address announcer at Huskies' home games. John enjoys watching and playing hockey and football and spending time with his family, wife Debra and daughters Kristen and Danielle.

Lorraine P. Lafferty,
BA '73

A Lawyer with the firm Cox, Downie & Goodfellow, Lorraine is a past member of the Saint Mary's Alumni Association Executive. She is also a past board member for the Point Pleasant Child Care Centre. Lorraine's current volunteer activities see her as a member of the Halifax County Estate Planning Council, as Honorary Counsel to the Junior League of Halifax, and as a workshop Instructor at Dalhousie Law School.

Nominations for Alumni Executive

(Two year term commencing May 1990)

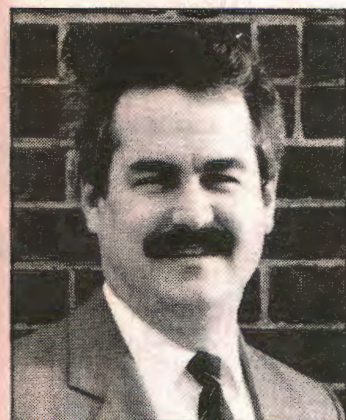

R. Randy Brooks,
BA '76

A Special Projects Coordinator with the Nova Scotia Department of Tourism and Culture, Randy is an active volunteer in the community. He is vice president of Big Brothers — Big Sisters for Halifax-Dartmouth, a board member on the Aviation Council of Nova Scotia, and media hospitality chair for the 1990 World Figure Skating Championships in Halifax. In 1986 Randy served as the chair of the 1976 class reunion committee during Alumni Weekend. In his spare time Randy enjoys cooking, photography, sports, and travelling.

SAINT MARY'S
ALUMNI

Saint Mary's University
Alumni Association
Halifax, N.S. B3H 3C3

(902) 420-5420

Charles W. Given,
BSc '81

A General Insurance Agent/Office Manager with E.M. Harper Limited, Chuck is active in many volunteer organizations. In addition to being Halifax Antioch Co-Chair he is also a member of the Canadian Red Cross Youth Committee and the Knights of Columbus. Chuck is also a Eucharistic Minister with St. Lawrence Church and most recently was chair of the very successful 1989 Alumni Association Annual Dinner. In his spare time Chuck enjoys camping, canoeing, swimming, and working with youth.

Tom Goodyer,
High School '62

Is president of his own company and is engaged as a project manager with Fraser Brace Maritimes. Tom also instructs part-time at the Nova Scotia Institute of Technology. Tom was a member of the Saint Mary's High School Alumni 1988 Reunion Committee and has been active at Saint Mary's since then as the Chair of the High School Bursary Committee. He is also Chair of the Refugee Special Program of St. Peter's Parish St. Vincent de Paul Society. Tom is an avid runner and enjoys gardening, philately, music and photography as hobbies. He played football and basketball while at Saint Mary's and is a regular spectator at the varsity games along with his children.

Kim A. Squires,
BA '81, BEd '82, MBA '88

The Annual Fund Assistant in the Department of Development at Saint Mary's, Kim has been an active supporter of Alumni activities since graduation. In 1987 she was chair for the Class of '82 reunion and in 1989 volunteered her services to assist the Alumni Association with medal presentations during the Special Olympics. Kim has also canvassed for the United Way, the Heart Fund, and the Diabetic Association. Kim enjoys sports both as a spectator and a participant, playing racquetball on a regular basis. She also enjoys reading and attending various display shows on topics that appeal to her.

Anne Trainor,
BComm '81

A Commercial Account Manager, Nova Scotia Commercial Banking Unit with the Bank of Montreal, Anne is a former member of the Alumni Association Executive. She has also volunteered her services to the Annual Dinner Committee, in particular as chair of the Dinner Day Committee and in fund raising activities for the IWK Hospital for sick children. Anne is a Fellow of the Institute of Canadian Bankers (FICB).

HOW TO ACHIEVE AMBASSADOR STATUS

THE MAKINGS OF AN AMBASSADOR

You live and work in Halifax or anywhere else in Nova Scotia in a business or profession. You most likely belong to several associations or organizations that plan events, conferences or conventions. We think you've got the credentials to be a special kind of Ambassador. Here's how.

Use your influence to bring your organization to Halifax. By doing so, you become in a very real sense an Ambassador for Halifax and Nova Scotia.

YOUR OWN EMBASSY STAFF

The World Trade and Convention Centre has put together a comprehensive assistance program so that all you have to do is give us the name of your contact or organization. We'll take it from there.

THE CORPS DIPLOMATIQUE

Become a member of a unique "corps diplomatique." We'll honour you and your Association when Halifax and the Convention Centre are selected to host your organization.

Your name will be engraved and permanently displayed on our "Wall of Fame" and your accomplishments will be recognized publicly at a special Ambassador's Banquet. You'll feel good about helping out in a very meaningful way.

For more "emissary" information on the WTCC Ambassador Program, write:

Ambassador Program
World Trade and Convention Centre
1800 Argyle Street, P.O. Box 955
Halifax, Nova Scotia B3J 2V9

 **World Trade and
Convention Centre, Halifax, Nova Scotia**

Or call us on the diplomatic line: (902) 421-8686 Fax: (902) 422-2922

Quack Appointed Basketball Coach

Former Saint Mary's star basketball forward Ross Quackenbush was recently named full-time head coach of the basketball Huskies.

Quackenbush is delighted by the way the team have responded to his appointment. "Every player on last year's team who is still at Saint Mary's and is eligible to play is playing," he says. Describing his team, he says, "Chris Rowarth and Brian Thompson were both league all-stars last year. That's a pretty solid foundation; they are good experienced players. Jason Darling was a rookie last year. He is really coming on gangbusters. You can add Tom McCutcheon, who is entering his fifth year and is a very experienced player, also Dale Stevens, and we have a pretty good foundation." He speaks well, too, of some of the rookies who came to the try outs, but adds, "We are not going to have the tallest team in the league. We will have to work to overcome that." He's eager to start the new season, however, and says, "We intend to try and win every game we start."

Before returning to Saint Mary's, Quackenbush was teaching at King's Edgehill School in Windsor. He played for the Huskies while attending Saint Mary's from 1977-81 and was a member of the team which captured national honours in 1978 and 1979. The Huskies won the AUAA title in 1980 and finished third in the national championships. He played for the Canadian men's national team from 1977 to 1980 and attended the World Student Games, the Commonwealth Cup and the World Championships in the summers of 1978 and 1979. Had Canada participated in the 1980 Summer Olympics, Quackenbush would have been there. He also played for the senior men's championship team in 1981.

After graduating in 1981 with a BA in English, Quackenbush worked for Pitney Bowes, returning for his Bachelor of Education in 1983-84. Since then he has taught at King's Edgehill and coached basketball in the Nova Scotia School Athletic Federation 'A' division.

Ross Quackenbush lives in Halifax with his wife Susie, BEd '78, and their infant daughter Jacqueline.

Steve Armitage Returns to Campus

Libby Brown

Steve Armitage remembers what it was like to play football at Saint Mary's twenty-five years ago, when there were less than 800 students and seven teams in the league. "Everyone knew who we were," he says. "You couldn't walk through the halls without someone saying 'Hey, great game' or 'good luck this weekend'."

In 1964, the Football Huskies beat McMaster (15-1) to win the Atlantic Bowl. In

those days, the CIAU chose the teams to play in the two regional finals and there wasn't a Vanier Cup.

Armitage was on campus for the Atlantic Bowl last November and a reunion of the 1964 Football Huskies. More than twenty of the thirty-two players came back to relive their days as Atlantic Bowl Champions and to establish the R. "Bob" Hayes Football Award. This annual award will go to a full-

time student who has completed at least one year of study. This "Hayes-like" individual will be a key leader on the varsity football squad and a role-model for younger varsity and high school athletes.

Armitage says after beating Saint Francis Xavier 9-7 in Antigonish to go to the Atlantic Bowl in 1964, the reaction was incredible. "We were met by a hell of a celebration coming home," he says. "A police escort met us at the airport and led us into the city and to the University. The gym was jammed for a giant rally. The whole city went nuts."

By the Atlantic Bowl, there were very high expectations (of us) and 7000 people at the Wanderers' Grounds," he says. "It was incredibly cold and it had snowed all week. We practiced wearing surgical gloves and plastic bags on our feet. But we won."

Armitage has been in the centre of Canadian sports since that victory. Today, he is a sportscaster for the CBC, based in Vancouver. In January, 1990, he will become a network commentator, covering sports around the world. His career includes covering the Olympics in Calgary and Seoul, the Commonwealth Games and the Pan American games. The first time a Canadian station covered the World Soccer Championships, it was Armitage and the CBC in Spain in 1982.

Armitage's career in sports began as he continued to play for the Huskies until he graduated in 1968. As a student, he worked for CFSM, which was in the basement of the new O'Donnell-Hennessey Centre. Bob Hayes says he got his start in the old gym, announcing basketball scores.

"That's where he developed that senatorial tone he uses," says Hayes. "He was often without the benefit of electronic equipment and he would use that deep baritone and yell to announce the scores." He wrote for the CBC late night sports as a full-time job in the summer and sharing the position with a Dalhousie student during the school year.

"That's how it all began, my career as a sportscaster," Armitage says. "I never intended to be one, I wanted to be a lawyer. I had even been accepted to Dalhousie's Law school."

After graduation, Armitage became the Sports Information Director for Saint Mary's, and continued to write sports news for the CBC. The Sports Information Director was a part-time position to look after all the campus sports news.

"As we became a real force at the national level, it began to become a full-time job," says Armitage. "They were paying me to go to all the games, with the best seat in the house. These were things I wouldn't have as a student." Law school was getting left behind.

In 1969, Halifax hosted the Canada Games and Armitage did the late-night reporting for the CBC. "This is when the CBC began to take him seriously" he says.

"They told me I wasn't too bad," he says. "I started doing all the late-night sports for the CBC. In 1973, they moved me to Vancouver and I've been there ever since." Just

Steve Armitage renews friendships at 1964 football reunion. Left to right: Coach Hayes, Steve Armitage, Doc Charlie, and Bob Johnston.

Halifax

after he left, the Football Huskies went all the way and won the Vanier Cup.

Armitage has always followed the Huskies and Saint Mary's. He specifically watches those Huskies who play professional football or hockey and makes a point of introducing himself if he has the chance. He says he doesn't come to Nova Scotia very often and it's been several years since he has been on campus. It's very different from his days here.

"When I graduated in 1968, Vanier was new, the Student Centre was new and Loyola was under construction," he says. "There was a huge big playing field."

Twenty-five years ago, there were less than 800 students who were mostly men. Today, there are more than 7000, with men and women equally represented. But numbers are not the only change. Armitage says the Jesuits were a real presence then.

"All the Jesuits were terrific, they really encouraged athletics," he says. "They made Saint Mary's special and different. I remember Father Hennessey and how much he loved sports and the athletes."

Armitage says there was tremendous pressure to maintain good grades. The athletes all had the opportunity to be tutored. "The administration really cared about the athletes and we got away with missing classes if you kept up your marks," he says. "We were giving so much of ourselves physically to the University and they understood that. If you look at the record of Saint Mary's athletes, most completed their degrees."

Armitage earned a degree with a double major in Political Science and Philosophy. "We knew which professors liked jocks, so we'd take their classes. That's how I ended up with six credits in Philosophy."

"When I played football, I knew we were not the brightest bunch of guys, but marks were important," says Armitage. "(Bob) Hayes really pushed us to get a degree. He used to get our transcripts so he'd know how we were doing."

Armitage credits Bob Hayes for encouraging him and the other players to come to Saint Mary's. "No one recruited the way Bob Hayes did. He was the reason I came to Saint Mary's," he says. "I knew who else was coming and I wanted to play for a winner. He brought together a real electric bunch of guys who wouldn't have gone to University otherwise."

A lot of people respected Bob Hayes, says Armitage. He describes Hayes as being "tough, hard as nails" and having come up through the school of hard knocks and people knew that.

"When you look back on your life, you can think of maybe a half a dozen people who really influenced you. To me, Bob Hayes was one of those people," says Armitage. "He was such a force around here, his character was so strong. He was a real disciplinarian, a guy you love and hate at the same time."

Armitage clearly remembers an event in his first year that has influenced him ever since. It started with Bob Hayes making the team run a mile after practice every night.

"We got together as a team to resist running that mile and told Hayes we thought it was too much," says Armitage. "So he made us run windsprints instead, up and down the field, after practice."

"I wanted to die that night, I wanted to quit, but I couldn't. Since then, when times are tough, I've thought about that night," he says. "I say to myself 'I didn't quit that night so why quit now?'"

That kind of determination has propelled Armitage into his successful career as a sports commentator. Is he an expert on all these sports?

"You become an expert by osmosis, I guess," he says. "You always have a colour

commentator, the sports experts like Ken Read. It's up to me to draw the comments from them."

Armitage won the Foster-Hewitt Sports-caster of the Year Award in 1983, an ACTRA award for best sportscaster in radio and/or television. He covers the special international events mentioned earlier and is a regular CBC commentator for football, hockey and soccer. In Seoul, he reported on rowing, basketball, and soccer and in Calgary he covered skiing with Ken Read. In 1990, Armitage is off to Auckland, New Zealand to deliver commentary on swimming and diving. 🌿

J.J. (Jack) Leydon, DipEng, BSc '45, has recently been appointed as an associate of Nolan, Davis & Associates. Jack will be a senior environmental engineer with the company. Prior to this appointment, Mr. Leydon held senior management positions with Domtar Chemicals, United Salt Corporation, International Salt Company and most recently with the Nova Scotia Department of the Environment. Congratulations Jack on yet another step in a very distinguished career.

56

Col. Ronald J. LeBlanc, BA, a professor of social work at the Universite de Moncton, recently retired from command of the Eastern New Brunswick Militia District. Col. LeBlanc served twenty-three years in the militia before his retirement.

63

Tom Goodyer, chairperson of the Saint Mary's High School Alumni Bursary Committee, was pleased to report at a recent meeting of the High School Reunion Committee, that the first bursary from the fund was awarded to a Saint Mary's student for the 1989 academic year. High School Alumni have pledged \$60,000 to the bursary fund as an ongoing memorial to Saint Mary's High School which was phased out in 1963.

These distinguished members of the Saint Mary's High School Alumni Reunion Committee met recently at a dinner at the Halifax Club, hosted by Fred MacGillivray, to discuss the High School Alumni Bursary and the 1988 High School Reunion. Pictured clockwise from bottom left are: David Flemming, Tom Goodyer, Pat Curran, Terry Coughlan, John Delaney, Guy Pothier, and Fred MacGillivray.

64

Returning to campus after twenty-five years was **John Sullivan, BComm**. John and his wife Dianne travelled from their home in Cape Cod, where they have lived for the past seventeen years, to attend Alumni Weekend '89. John is an internal revenue agent with the Internal Revenue Service. John has been involved with the Cape Cod YMCA for the last 12 years as a member of the Camp Committee and the Board of Directors. John and Dianne have two children, son Sean, a junior at Ithaca College in Ithaca, New York and daughter Krista, a junior at Sandwich High School.

65

Alumni Representative on the Board of Governors at Saint Mary's **Phil Burns, BComm**, is the president of the Bedford Board of Trade.

67

Now a "Philadelphia lawyer", **James (Skip) Oliver, BA**, is certainly someone these Snippets have unintentionally ignored over the past number of years. We know, however, that (fortunately for us) not acknowledging his faithful returns to Saint Mary's has not jaded our image. Since his graduation he has come back from his home in Pennsylvania each summer. A visit to the campus and renewing some old acquaintances has always been his pattern. The purchase of a piece of land and building a cottage ensure that he and his family will continue their returns. His wife Judy, herself from Atlantic Canada and a Mount Saint Vincent University grad, and their two children are also very fond of Nova Scotia.

John Archer, DipEng, BSc '68, is a self-employed software consultant in Trinidad.

DUNNIGAN PHOTO

68

Dick Loiselle, BA, the executive director of the Abilities Foundation, was inducted into the New Hampshire Sports Hall of Fame on October 21, 1989. Congratulations Dick!

69

An Engineer with the Kidd Creek Division of Falconbridge Ltd., John Owen, DipEng, is the manager in charge of maintenance and engineering at the minesite.

R.E. (Ron) Hatcher, BComm, was recently appointed to the position of regional manager for the Halifax region office of the Investors Group. Ron, his wife Mary and their three children live in Bedford, Nova Scotia.

Brian Caine, BA, BEd '71, and his wife Patricia (nee Donahoe), BEd '71, reside in Lower Sackville with their two daughters Meghan, thirteen, and Laura, nine.

70

Wil Aubut, BSc, is living in Halifax with his wife, Trish, and their three children. He is an architect with the Federal Government.

For nineteen years in the school system, ten of them as a Department Head, Ray H. Slaunwhite, BComm, BEd, has been called "Teacher". Now, however, he has temporarily changed hats to become Ray the "Innkeeper". Now on deferred salary leave from the Dartmouth District School Board, Prince Andrew High School specifically, he is pursuing his latest endeavour. He is general manager of Milford House Properties Limited, a resort and historical inn in South Milford, N.S.

Paul M. Gouett, BA, MA'78, was announced in November '89 as a winner of Atlantic Insight's limerick contest for his history of Halifax in that poetic form.

71

Gary Humphries, BComm, is president of Flash Pack Atlantic. Flash Pack Atlantic, a packaging, shipping and postal service operates three centres in the Halifax metro region.

Bill Greenwood, BA, is one of the three principals in the new firm, Greenwood Lane & Associates Ltd., a commercial real estate brokerage firm.

72

The appointment of Eric P. Milledge, BComm, to the position of vice president of sales and marketing for Ortho Pharmaceutical U.S.A. took effect on July 1, 1989. Eric will also be responsible for new business development and government affairs.

England is currently home for John (Red) McLaughlin, BA, his wife and their two daughters. Canadian employer, Extendicare, have transferred him there to run that newly expanded end of their business. He claims jokingly that he is no longer "Red" but "Grey" McLaughlin!

73

From 1969-72 Mike LaBrash, BA, played varsity football with the Huskies. Now he's back in Halifax, this time as senior investigator for Canada Customs where he is acting manager of the Customs Investigations Division, Atlantic Region.

Claude Carter, BComm, has recently been appointed as the senior director in the office of the Auditor General, Province of Nova Scotia.

Namir A. Obaji, DipEng, BSc, is an engineer with Ontario Store Fixtures Inc.

An appointment as Manager, Finance and Administration for the Canada Mortgage and Housing Corporation is the latest career move for Brian Knight, BComm. Prior to his appointment, Brian was administration manager for the Atlantic Regional office of Canfor Ltd.

Thomas J. Khattar, BA, BComm, is a lawyer with the Department of Justice. He makes his home in Moncton, New Brunswick.

Congratulations to Leo Hennebury, BComm, on his recent graduation from the Canadian Institute of Traffic and Transportation. Leo is employed as area manager, sales/operation for Clarke Transport Canada Inc. in Truro, Nova Scotia.

74

Ronald Edmonds, BComm, has recently been appointed as an audit manager in the office of the Auditor General, Province of Nova Scotia.

Gordon Moore, BComm, has recently been made a partner with the firm of Peat Marwick Thorne. Gordon is very active in the community serving as treasurer of both the Dartmouth Kiwanis Club and St. Vincent's Guest House, and as a member of

the Board of Management for the Dartmouth Branch of the VON, the Dartmouth Chamber of Commerce, the Institute of Chartered Accountants of Nova Scotia and the Canadian Institute of Chartered Business Valuators. He and his wife Marlene and their children, Andrew and Lisa, reside in Metro.

Founder and President of Multi Tech Communications, Vaughn Mullen, BA, and his wife Jane (nee Callaghan), BA '75, BEd '76, reside in Liverpool with their children, Gavin, Ryan, and Zoe.

Municipal Contracting in Bedford, N.S. is employers for Steve Fleming, BA. He and his wife Darlene Fleming (nee MacMullin), BEd '75, live in Halifax with their three children.

75

Congratulations to Dr. Gerald Mader, BSc, and his wife Natasha on the birth of Nicholas Alexander on July 25, 1989. Nicholas is a new brother for Natalie, six, and Christopher, four.

Enjoying life with wife Nina and addicted to volleyball is Robert Whalen, BSc. Robert when he isn't playing volleyball, is a computer analyst with Digital Equipment Corporation.

Bill Dalton, BSc, has recently been appointed to the position of mortgage representative for the Halifax-Dartmouth-Bedford region with the Royal Bank of Canada.

Director of Finance and Administration with the firm of Cox, Downie and Goodfellow is the latest career accomplishment of John Smith, BComm. In the community, John is a past treasurer of the Nova Scotia Division of the Canadian Mental Health Association, and has been active with campaigns for the United Way and the IWK Children's Hospital.

Moe White, BComm, has been appointed vice president and general manager of the Food Service Management Division for Scott's Food Services in Toronto. Congratulations Moe!

76

Elaine Morash (nee Aucoin), BA, MBA '78, has recently been appointed as a director in the office of the Auditor General, Province of Nova Scotia.

Congratulations to Brian Rogers, BComm, on his recent election as a partner in the audit department of Peat Marwick Thorne. In addition to serving on the Executive of the Alumni Association, Brian is an active member of the Institute of Chartered Accountants of Nova Scotia and serves as the chair of the Business Education Committee with the Halifax Board of Trade.

Derek Banks, BComm, has recently been appointed to the position of general manager with Plastics Maritime Ltd.

Paul Lynch, BComm, has recently been appointed national sales director priority courier and parcel services with Canada Post.

Joseph Bouzanne, BComm, is a teacher at Central Newfoundland Community College, Gander Campus. Gander is also his home.

Three graduates from the Class of 1980 recently held their annual first ever "SUB" chapter meeting. Pictured here in front of HMCS OJIBWA, one of Canada's three OBERON class submarines, are left to right: Sub-Lieutenant Mark White, BComm; Lieutenant (N) Bob Manzer, BA; and Lieutenant - Commander Mike Williamson, BSc. All three Santamarians are presently serving with the First Canadian Submarine Squadron Headquarters in logistics and engineering positions.

77

After working in Hong Kong and China for five years with Coopers & Lybrand, **Sonny Doo, BComm,** is now working for the Coopers & Lybrand office in Toronto as a manager in the general practice area.

79

Russell Josey, BA, has recently taken over Sur-Fas Fasteners and Equipment Ltd., after spending the last ten years working

for an international construction fastener company.

Rosalyn Millar (nee Lacovetsky), BComm, and husband **Malcolm Millar, BComm,** announce the birth of their second son Peter Alexander on May 22, 1989. Malcolm is a corporate controller at Municipal Ready Mix Ltd., Sydney.

Now studying law at the University of New Brunswick Mark Canty, **BA,** has never strayed that far from a school setting. Following graduation here he worked nine years in Student Services, eight of them at Mount Allison University. His wife Andrea is currently completing medical school at Dalhousie.

Chief Petty Officer Doug Wright, Assoc, was inducted into the Canadian Forces Sports Hall of Fame on October 18, 1989. Chief Wright has served the Canadian navy and his country as a player and coach in a variety of sports for thirty-four years.

Ken Seaward, and his wife Debbie are pleased to announce the birth of Jessica on Sunday, October 29, 1989 between the second and third periods of the Huskies Hockey Game. Ken, who is the timekeeper at Huskies Home Games, was called away from these duties to attend to more important ones. Congratulations Ken and Debbie.

80

Congratulations to **Scott MacLean, BComm,** and his wife Cindy on the birth of their son, Ryan Spencer, on September 13, 1989.

After graduating from Saint Mary's, **Everett Scott, BSc,** obtained a degree in Computer Science from T.U.N.S., and is now a computer programmer with Promac Systems. In addition to his full time position, Everett works part-time as a math tutor for handicapped students at Saint Mary's. In December he enjoyed the lighter side of life and spent a week in Puerto Vallarta, Mexico.

Keith Conrod, BComm, has recently been appointed chief appraiser with the Canada Mortgage and Housing Corporation. This new position brings Keith back to Halifax from Windsor, Ontario.

Enjoying life in Kitchener, Ontario is **Teresa Wilkie (nee Macdonald) BA,** and her husband Robert. Both Teresa and Robert are teachers for the Waterloo Board of Education. They are pleased to announce the birth of their daughter, Mary Clare, on September 19, 1989. She was punctual, just like her dad, and has added a musical note to their lives.

Saint Mary's University is the employer for **Susanna Conrad (nee Morash) BA, BEd '81.** She is a curriculum lab instructor in the Faculty of Education. Susanna has two children and lives in Cole Harbour.

81

Congratulations to **Ross Quackenbush, BA, BEd '84**, on his appointment as the new head coach of the Saint Mary's Varsity Basketball Team. Ross and his wife **Susan, BEd '78**, reside in Halifax with their baby daughter **Jacqueline**.

Keith Oickle, BComm, was recently appointed to the position of firm administrator with the law firm of **Daley Black & Moreira**.

Congratulations to **David Cassidy, BComm**, and his wife **Janet (nee Hunter), BComm '82**, on the birth of their daughter, **Sheila Marie**, on August 1, 1989 in Vancouver, British Columbia.

Doug MacIsaac, BComm, has recently been appointed to the position of manager with **Peat Marwick Thorne**.

After finishing his PhD at the University of British Columbia, **Peter Campbell, DipEng**, has taken a position as a research engineer with **Broker Hill Proprietary** in Australia. Peter recently spent a weekend in the **Coonawarra** wine district of Australia with fellow Saint Mary's and T.U.N.S. alumna **Felicity Vanderlinden (nee Boyd), DipEng**, and her husband **Jack**. Peter says hello to Saint Mary's soccer players and would like to hear from any SMU alumni travelling to Australia.

Cathy Driscoll-Cainen, BA, and **Gregory Cainen** are happy to share the news of the arrival of **Stuart Gregory Cainen**, their first child, on August 31, 1989 in Halifax. Cathy is a youth coordinator with the Archdiocese of Halifax.

**IF GIVING GIVES YOU
A WARM FEELING
IN YOUR TOES,
WE NEED A LOT
MORE WARM TOES.**

The giving begins with you.

In 1986 Dr. Beazley (left) received the Alumni Association's Distinguished Community Service Award from David Hope of the Class of '61.

A Special Remembrance

The Saint Mary's community was deeply saddened by the death of Dr. Harold (Babe) Beazley, BComm '36, Hon '72, on Friday, October 20, 1989. Dr. Beazley, former dean of commerce at Saint Mary's University, was an exceptional Santamarian who touched the lives of many during his years at Saint Mary's.

After graduating in 1936 with a Bachelor of Commerce Degree, Dr. Beazley joined the faculty at Saint Mary's. He led the development of the commerce program and was appointed the faculty's first dean in 1961. He served as dean until his retirement from that post in 1972, however, he continued to teach accounting until 1985. In addition to his teaching duties, he served on the University Senate and the Board of Governors from 1964-1972.

An Honorary Doctor of Letters degree in 1972, Professor Emeritus in 1981 and Dean Emeritus in 1972, were just a few of the many accolades bestowed upon Dean Beazley over the years. He was also the recipient of the Saint Mary's University Alumni Distinguished Community Service Award in 1986.

Dr. Beazley was a member of numerous professional organizations, including the province's Public Accountants Licensing Board, the Financial Executives Institute (Atlantic), the Society of Management Accountants (Nova Scotia), the Association of Deans of Canadian Schools of Business, the Dartmouth Chamber of Commerce, the Canadian Academic Accounting Association, American Accounting Association, and he was an honorary life member of the Institute of Public Administration of Canada.

An avid golfer, he was a member and past president of Brightwood Golf Club. He was club champion in 1939 and 1941. He coached amateur hockey teams, including the Saint Mary's University varsity team to a Maritime Championship.

In the community, he was a lifelong member of Saint Peter's Church and was a member of the Knights of Columbus and the Holy Name Society. He received the Papal medal Pro Ecclesia et Pontifica from Pope John Paul VI.

Dean Beazley will be sorely missed and remembered fondly for his many contributions to the community, and his strong dedication and commitment to Saint Mary's University. 🌿

D e a t h s

The Alumni Association extends its condolences to the families and friends of the following alumni:

Harold Davis, BComm '35, died December 10, 1987 in Ottawa. Harold had lived in Ottawa for the last twenty-four years, and was an active member of the Knights of Columbus and Charitable Irish Society.

Hazel MacLeod Sheehan, BA '68, BEd '69, died August 16, 1989 in New Minas, Nova Scotia. A retired teacher, Mrs. Sheehan had taught throughout the province for forty years.

Sean Barry, BComm '74, died this past year.

Our condolences to E.C. "Barney" Thomas, Dip Eng '34, on the death of his wife Isabel in Calgary last August.

Reverend Charles A. Frecker, BA '28, died this past year.

Carol Jean Babineau (nee Tobin), BA '72, died October 20, 1989 in Halifax. Mrs. Babineau was an inspector with Canada Customs.

Wilfred Thomas Keefe, BA '71, died October 12, 1989 in Halifax. Mr. Keefe was the founder and owner of The Granite Group Limited, which operates a number of

food and beverage establishments in the Halifax area. Mr. Keefe was active in the community, serving on many board of directors in the local area.

Sister Sylvia McDonald, Hon '84, died this past year in Montreal. Sister McDonald was a pioneer in retirement planning, and served as the first chairman of the National Advisory Council on Aging.

Reverend James P. Hayes, BA '27, died November 4, 1989 in Saint Vincent's Guesthouse. His last appointment before retiring from the office of pastor was at Saint Andrews Parish, Eastern Passage, where he served from 1963 to 1975. Reverend Hayes was very active in the community and was particularly involved in programs for Youth.

Clyde C. Duggan, BA '40, died Friday, July 28, 1989 in Milford, Massachusetts.

Harvey Mills died in Halifax on Monday, November 27, 1989. The former special functions manager at Saint Mary's was also very active in sports in Nova Scotia and was involved with several national champions, including Saint Mary's Huskies, Acadia Axemen, Ottawa Roughriders and the Shearwater Flyers Dominion Champions. Most recently Harvey was inducted into the Nova Scotia Sport Heritage Centre Hall of Fame. 🌿

THE *worldly* CANADIAN

It is a fact that we Canadians are born travellers. It is equally true that, as one of these worldly Canadians, we fly to more places in this country than any other airline. What's more, we are the only Canadian airline to serve five continents — North America, South America, Europe, Asia and Australia. We even serve the South Pacific.

In fact, when all is said and done, it comes down to this. Every day, somewhere in the world, there is a Canadian leading the way. A spirited, worldly Canadian.

When you want the true Canadian spirit, call your Travel Agent or Canadian Airlines International.

The spirit takes wing.

Canadian

— In partnership with Air Atlantic —

Conferences • Sports Events • Meetings • Receptions • Banquets with the important difference...
