ST. MARY'S COLLEGE

IN 1841 a bill was introduced in the Legislature of Nova Scotia entitled:

"An Act for Incorporating the Trustees of St. Mary's College at Halifax."

From the preamble of the Act we learn that a number of Catholic gentlemen under the inspiration of the Right Rev. Bishop Fraser, had already become remarkable for their "great exertions and perseverance and very large pecuniary contributions" towards the erection and maintenance of the College. The Act further states that the College had greatly advanced the public interest in education in the province and that for that reason also it deserved the encouragement of the Government of the province. This encouragement was manifested by an almost unanimous vote in favor of the Act.

It was decreed among other things in the Act that "the said College shall be deemed and taken to be a University with the usual privileges of such an institution". The limit of time set for the Act was eleven years. Hence, on the 8th day of April, 1852, instead of a renewal of the Act of 1841, a new Act was passed making the privileges of St. Mary's perpetual. It ran thus:

"Be it enacted by the Governor, Council and Assembly as follows:

The Act of the 4th Victoria, Chap. 39, entitled 'An Act for Incorporating the Trustees of St. Mary's College at Halifax', is hereby made perpetual."

In 1873 the Act of 1841 was reaffirmed "in the same manner and to the same extent". It would seem this reaffirming in 1873 was deemed necessary because the rights of the Act of 1841 "had been allowed to expire through inadvertence."

In 1903 the College was reorganized by His Grace Archbishop O'Brien, who built the older portion of the present College. The Right Rev. Monsignor Kennedy was appointed its first President. After a period of about two years Monsignor Kennedy was succeeded by Right Rev. Monsignor McManus under whose able and energetic direction the College was conducted until 1913. In that year, on the invitation of His Grace Most Rev. E. J. McCarthy, Archbishop of Halifax, the Christian Brothers of Ireland, undertook the management of the College. Then was erected the new building which was ready for occupation in 1914. It constitutes a lasting tribute to the zeal, in the cause of Catholic Education, of His Grace, the clergy and the citizens of Halifax by whose generous donations it was erected.

On the twenty-sixth of April, 1918 a final amending Act was passed reaffirming with some few alterations the powers and privileges of the original act of 1841. The opening paragraph of this Act reads as follows:

"Saint Mary's College, Halifax, originally incorporated by Chapter 39 of the Acts of 1841, shall continue to be deemed and taken to be a University, with all the necessary powers and privileges exercised by Universities, including the power of Conferring Degrees in Arts, and in all other faculties."

CURRICULUM

St. Mary's College provides:

1. An Arts Course leading to the degree of B.A.
2. An Engineering Course of Two Years.
3. A Science Course leading to the degree of B.Sc.
4. A Course in Commerce leading to the degree of B. Comm.
5. A Special Commercial Course of Two Years qualifying for a Commercial Diploma.
6. A High School Course enabling students to qualify for College Matriculation.

ARTS: The course in Arts is intended to lay the foundations of a broad and liberal education. It stresses, therefore, the literary and cultural branches and aims at the development of an interest in all that is best in life. It fosters an appreciation of what is sound in philosophy and beautiful in literature and seeks not merely to familiarize the student with the great facts and movements of history but to create interest in these movements and in the personalities identified with them. The formation of studious and literary habits is regarded as of more importance than the encyclopedic acquisition of facts while accurate and thorough scholarship in a rather limited field is preferred to superficial acquaintance with many branches of knowledge. In this, as in all Courses, classes in religious and moral topics are essential features.

ENGINEERING: St. Mary's College has been affiliated with the Nova Scotia Technical College. In virtue of this affiliation, duly matriculated students may take the first two years of their Engineering Course at St. Mary's and the third and fourth years at the Nova Scotia Technical College. The first two years' course is, in general, the same for all students irrespective of the particular branch of the profession they intend to adopt. On entering the Technical College the student specializes according as he intends to become a Civil, Mining, Mechanical or Electrical Engineer.

In co-operation with the Nova Scotia Technical College and other Colleges of the Maritime Provinces, St. Mary's conducts in September of each year, a three weeks' Surveying Camp at Truro, N. S.

SCIENCE: The course in Science has been recently added to the Curriculum. It is intended largely for Engineering Students who wish to broaden their education and supplement their professional studies by further work in pure Science or literary subjects. Such students may meet the requirements for the degree in one year after the completion of their regular Engineering Course taken at St. Mary's.

This course is also open to non-Engineering students whose tastes lie in the direction of Science or Mathematics.

COMMERCE: The Course in Commerce is intended for students who desire the advantages of higher education but who look forward to commerce as a professional career. The courses are of college standard and many of them correspond identically with the ordinary College courses. The complete course is of four years but a special diploma is issued on the successful completion of the first two years.

HIGH SCHOOL: The High School Course corresponds very closely to that prescribed in the High School Syllabus for the Province of Nova Scotia.

Written examinations are held towards the close of each Term and the results are made known to the parents. These examinations determine the students' class standing for the year. Every student who is successful in a subject is credited with First Class Distinction, Second Class Distinction or Pass. The names are arranged in order of merit in both Distinction and Pass Lists.

At the end of the school year Diplomas are awarded to all who have satisfactorily completed the year's course. Students who attain a high standard of excellence are awarded Distinction Diplomas.

The training of the students in the art of public speaking is carefully attended to and weekly debates form an important part of the College curriculum.

Due attention is paid to the physical development of the students and all are encouraged and expected to take part, according to their

strength, in the outdoor games. Every facility is afforded for playing football, handball, basketball, hockey, baseball and tennis.

The College considers the formation and development of character, the religious and moral training of its students, of greater importance than anything else. Facilities are afforded for the frequentation of the Sacraments and the students receive regular instructions in the truths of Faith and the duties of Religion. By these means are laid the foundations of a true Christian character.

A Retreat of Three Days is held each year shortly after the opening of College. The Holy Name Society and the Canadian Students' Mission Crusade Society are in active operation among the students.

ADMISSION

Resident as well as day students are eligible for admission. Students are received at any time during the year; but it is advisable that they should enter, if possible, at the opening of the school year in September.

Applicants for admission who are not known to the College authorities must furnish satisfactory references. The diplomas of any recognized school will be accepted as evidence of standard.

Religion as a basis for all social reform. The aims of a truly Christian society. Attitude of the Church toward Socialism. Modern development of Socialistic movement; Christian Democracy; The Great Social Encyclicals of Leo XIII and Pius XI; Scripture Thoughts on Wealth; The Catholic Church and Social Action.

Two hours a week.

COURSE IN ENGINEERING

MATRICULATION IN ENGINEERING

AFFILIATION.

The Nova Scotia Technical College is affiliated with the following Universities and Colleges:—Acadia, Dalhousie, King's, Mount Allison, St. Francis Xavier's, St. Mary's and the Memorial University College, St. John's Nfld. By the terms of the affiliation, the separate universities offer a uniform course in engineering covering the first two years and the Technical College offers professional courses in several departments of engineering covering the last two years of a four-year course. Students from the separate universities are admitted to the Technical College on certificate without examination under certain conditions enumerated later. The matriculation requirements for entrance into the uniform engineering course of the separate colleges are also uniform and are set forth in the succeeding paragraphs.

ADMISSION TO THE FIRST TWO-YEAR ENGINEERING COURSE IN THE AFFILIATED UNIVERSITIES AND COLLEGES.

Applicants for admission must have attained the age of seventeen years. The following is an outline of the subjects and the standard or grade in each subject which is required for admission as a regular engineering student:

- (a) Arts Matriculation, but with Latin or French elective.
- (b) The following subjects of the First Year Arts Course: English, Advanced Algebra, Plane Geometry, Solid Geometry, Plane Trigonometry, Spherical Trigonometry, General Physics with Laboratory or General Chemistry with Laboratory, French or Latin; also Mechanical and Freehand Drawing.

FIRST TWO YEARS' UNIFORM ENGINEERING COURSE.

The following is the First Two-year Uniform Engineering Course at the Colleges and Universities affiliated with the Nova Scotia Technical College.

FIRST YEAR	Hours per week
Engineering English.....	3
Differential and Integral Calculus.....	3
General Chemistry or General Physics, including Laboratory	6
Descriptive Geometry.....	5
Elementary Surveying.....	2
Materials of Construction.....	1
Machine Drawing.....	6
<hr style="width: 10%; margin: auto;"/>	
SECOND YEAR	Hours per week
Electricity and Magnetism, including Laboratory.....	5
Graphical Statics.....	4
Mechanics.....	3
Qualitative Analysis, including Laboratory.....	5
Mechanics of Machines.....	3
Surveying, including mapping.....	3
Geology, including laboratory and field work (for Mining only)	4
General Economics.....	3

A student who has been granted a diploma or certificate by one of the Affiliated Colleges, testifying to the effect that he has completed the Uniform Engineering Course, will be admitted to the Technical College without examination, except for Mining Engineering, in which General Geology is a requirement.

SUMMER SESSION.

Field Work in Surveying.....	130 hrs.
Shopwork.....	130 hrs.

SUMMER SURVEYING CAMP

A united summer surveying camp for students between the second and third and between the third and fourth years for civil and mining engineering will be held at the permanent camp headquarters in Truro, N. S., during the month of September. There will be required a fee of twenty-five dollars (\$25) from each student for this class to be paid upon entering camp.

Any student intending to attend the surveying camp should notify the Secretary of the Technical College on or before August 15. All students should bring with them drafting instruments, clothing suitable for field work, and two pairs of blankets.

SHOPWORK

No shopwork shall be required in the affiliated institutions in the first two years of the Uniform Engineering Course, but the Nova Scotia Technical College requires from 3 to 6 months practical experience in industry of a type in each course approved by the Faculty before granting an engineering degree. As an equivalent to the aforesaid requirement, the Nova Scotia Technical College offers a course in Shopwork during the month of September.

ENGINEERING

CHEMISTRY I

General Chemistry: This course includes descriptive Chemistry and a thorough and systematic treatment of the general principles of the Science and their application. Its aim is to prepare the student for the Courses in Qualitative and Quantitative Analysis, Organic and Engineering Chemistry.

Text: Smith's College Chemistry (Kendall, Revised); Laboratory Outline of above.

II

Qualitative Analysis: In this Course stress is laid on the determination and isolation of the metallic or base-forming elements, without considering the amounts in which they may be present. Due emphasis is given to the theoretical principles upon which the separation of these elements depends.

Text: Noyes Qualitative Chemical Analysis; College Chemistry (Kendall Revised.)

DESCRIPTIVE GEOMETRY

Problems on Points, Lines and Planes; Single Curved Surfaces; Warped Surfaces; Surfaces of Revolution; Development of Surfaces; Intersections; Practical Applications.

Text Book—Descriptive Geometry, Schumann. Descriptive Geometry Problems, Schumann and Lee.

DRAFTING I

The work of this course has been arranged so as to develop the technical skill of the student and to train him to visualize and reproduce simple objects by drawings. Special attention is given to lettering.

Text Book—Engineering Drawing, French. Lessons in Lettering, French and Turnbull.

DRAFTING II

Projections, Working Drawings, Pictorial Representation, Development and Intersection of Surfaces, Topography and Preparation of Blue Prints from Working Drawings of actual machinery.

Text Book—Engineering Drawing, French.

ECONOMICS

The relation of Economics to other sciences. Stages of economic development. The laws of diminishing utility and of consumption and demand. Industrial organization. Capital and Capitalistic methods of production. Money, Credit and Banking. A study of the merits and demerits of Free Trade and Protective Tariff. Problems connected with Trust and Insurance, and Wages.

ENGLISH

A general study of English literature aimed to develop literary appreciation by a study of various representative works. A special study of English composition to meet the demands of the engineer. Business Letters. Technical Reports, etc.

GEOLOGY

This course lays special emphasis on the application of geologic principles to problems of engineering. A brief synopsis of strati-

graphical and historical geology. A microscopic study of rocks with special reference to forms of description and methods of classification as represented by a standard set of fifty rocks.

Text Book—Geology, Emmons, Thiel, Stauffer, Allison.

GRAPHICAL STATICS

Equilibrium polygon and polygonal frames for all systems of loads; Graphical representations of shears and moments for non-continuous and continuous beams; Roof trusses; dead, live and wind load stresses for fixed ends and ends on rollers—Maximum stresses. Simple bridge trusses. Simple cantilevers.

Text Book—Graphical Statics, Fairman and Cutshall.

MATERIALS OF CONSTRUCTION

A presentation of the physical properties of the common materials used in structures and machines, together with descriptions of their manufacture and fabrication. Testing Machines and Standard Tests.

Text Book—Materials of Engineering, Moore.

MATHEMATICS III

Analytical Geometry. Introduction to algebraic geometry, dealing with such topics as co-ordinate systems, transformations, loci and their equations, the straight line, circle, parabola, ellipse, hyperbola and the geometric interpretation of the general equation of the second degree. Analytical Geometry of three dimensions.

Text Book—New Analytic Geometry, Smith, Gale, Neelley.

MATHEMATICS IV

Differential and Integral Calculus. After a thorough drilling in the mechanics of differentiation and integration special attention is given to the application of the calculus in the solution of problems in engineering and physics.

Text Book—Differential and Integral Calculus, Granville, Smith and Longley.

MATHEMATICS V

Differential Equations. This course is arranged to enable the engineering student to get a firm grasp of the fundamentals of the subject and its application to his problems without a long theoretical study.

Text Book—Differential Equations, Murray.

PHYSICS E. I. SOUND, LIGHT AND HEAT

Wave-motion; Forced vibrations and resonance; Acoustics. Musical Instruments. Mirrors, lenses and prisms; Spectroscopy and Polarization. Nature of Heat, thermometry, calorimetry, specific heat, mechanical equivalent of heat, saturated and unsaturated vapors, radiant energy, pyrometry, steam engines, internal combustion engines.

Text Book—Sound, Light and Heat. Duncan and Starling.

Reference Books—Heat, Randall and Gillon; Acoustics, Sabine; Principles of Optics, Hardy and Perrin.

PHYSICS E. II. MAGNETISM AND ELECTRICITY

Electrostatics, Potential, Capacity. Magnetism. Cells. Ohm's Law. Kirchoff's Laws. Energy and Power. Measurement of Resistance and E. M. F., Electro-Magnetism. Theory of Induction. Dynamos and Motors. Self and Mutual Inductance. Fundamentals of Alternating Current. Electrical Oscillations and Waves. Conduction of Electricity through Gases. Electron tubes and their application.

Text Book—Elements of Electricity, Timbie. Problems in Electrical Engineering, Lyon.

PHYSICS E. III. APPLIED MECHANICS

Co-planar force systems, graphical and analytical methods, application to determination of stresses in common trusses and cranes, Friction, Determination of Centroids and Moments of Inertia. Rectilinear, Curvilinear and Rotational motion of Particles and Solid Bodies. Work, Energy and Power. Impulse and Momentum.

Text Books—Applied Mechanics, Poorman; Engineering Mechanics, Brown.

MECHANICS OF MACHINES

Motions and Velocities. Instantaneous Center. Kinematic Chain. Velocity Diagrams. Cams. Gearing. Belting. Intermittent Motions.

Text Book—Mechanism, Keown and Faires. Elements of Mechanism, Schwamb, Merrill, James.

SURVEYING I

A preliminary course dealing with the theory, adjustment, use and care of surveying instruments. Fundamental surveying methods.

Measurements of lines, angles and differences in elevation. Field practice in pacing, taping, surveying of areas, differential leveling.

Text Book—Surveying Vol. 1. Breed and Hosmer.

SURVEYING II

The field work will be carried out during the month of September. The course will consist of compass and transit surveying. Farm survey. Leveling, profile, grading. Triangulation. Topographical surveying with transit and stadia.

During the remainder of the year the student makes computations, scale drawings, topographical, profile and contour maps from the notes taken in the field. Lectures are given in city, topographical and subterranean surveying. Determination of azimuth, time and latitude. Simple curves.

Text Book—Surveying Vol. 1. Breed and Hosmer.

SCIENCE COURSE

St. Mary's College now offers a course in conjunction with the present Engineering Course, leading to the degree of BACHELOR OF SCIENCE.

THE COURSE IS AS FOLLOWS:—

FIRST YEAR

English 1.
French 1 or
German 1 or
Spanish 1 or
Latin 1.
Mathematics 1 a, b, c.
Physics 1 or
Chemistry 1.
Mechanical Drawing.

SECOND YEAR

English.
Calculus.
General Chemistry or
General Physics.
Descriptive Geometry.
Elementary Surveying.
Materials of Construction.
Machine Drawing.

THIRD YEAR

Magnetism and Electricity.
Graphical Statics.
Mechanics.
Qualitative Analysis.
Mechanics of Machines.
Advanced Surveying.
Economics.
Geology (optional).

FOURTH YEAR

English 2.
2nd year of language
previously taken.
Philosophy 1.
Modern History or
Economics 2 or
Education 1.
Differential Equations or
Physics 4 or
Chemistry 4.

COMMERCIAL COURSE

FIRST YEAR

English 1.
History 1.
Mathematics (Commercial).
French or Spanish or German.
Accountancy 1.

SECOND YEAR

English 2.
History 2.
French or Spanish or German.
Commercial Law.
Accountancy 2.

THIRD YEAR

(Any Five)

Commercial English.
Economics 1. (Introductory Course).
History of Money.
Business Organization.
French or Spanish or German.
Economics 2. Canadian Problems.
Accountancy 3.
Commercial Law.

FOURTH YEAR

(Any Five)

French or Spanish or German.
Economics 3: International Trade.
Economics 4: Banking.
Economics 5: Comparison of Forms of Government.
Economics 6: Labour Problems.
Mathematics of Business.
Accountancy 4.

NOTES ON THE ABOVE:

The following courses may be taken in conjunction with the corresponding Arts Courses:

English 1 and 2, History 1 and 2, French, Spanish and German.

ACCOUNTANCY 1. The principle of debit and credit; books of original entry sales, purchases, consignments; subsidiary ledgers, and controlling accounts to represent them in the General Ledger; notes and drafts, discounting and renewal of notes trading, and profit and loss statements and Balance Sheet; Partnerships.

ACCOUNTANCY 2. Special Partnership problems; changes in capitalization, introduction of Goodwill, admission of a partner, dissolution, etc., Manufacturing Accounts. Comparison of expenditures for different periods.

ACCOUNTANCY 3. Complete analysis of the Balance Sheet: valuation of fixed and current assets and liabilities; corporation accounting; earnings and their disposition; secret reserves; discount and premium on bond issues; treasury stock: sinking funds: elements of cost accounting.

ACCOUNTANCY 4. Cost Accounting; connection of cost records with general accounts: leakage in factories; branch accounts; goods invoiced at cost, intermediate and selling price; chain stores; foreign exchange; consolidations and mergers; holding corporations; intra-combine profits and liabilities auditing; insolvency accounts and liquidations.

Texts: 120 Graduated Exercises in Bookkeeping, R. R. Thompson: Smails and Walker "Accounting": Limited Companies and their Accounts, Ferguson and Crocombe: Accounting, Kester: Cost Accounting, Lawrence.

COMMERCIAL LAW. Study of negotiable instruments, contracts, terms of sale, offer and acceptance and other matters, legally interpreted, met with in everyday commercial life.

Text: Manual of Canadian Business Law, Falconbridge and Smith.

MATHEMATICS OF BUSINESS. The rudimentary principles of insurance mathematics; Amortization of bond issues: interest, annuities and bonds: elements of Statistics.

Texts: Interest, Annuities and Bonds, H. Tate: Life Insurance S. Huebner: Elementary Statistics, Lovitt and Holtzclaw.

BUSINESS ORGANIZATION. Origin, growth and classification of business organization. Social and economic and legal aspects in single proprietorships, partnerships, joint stock companies, public and private corporations: agreements, pools, cartels, simple business trusts: combination trusts; securities-holding organization; raw materials: labour and its control: departmental relations: standardization and equipment; adequate records; types of management.

Text: Business Ownership and Organization, Stockder.

ECONOMICS 1. An introductory course embracing the outlines of the science of Economics.

Text: Principles of Economics, Bye.

ECONOMICS 2. A treatment of the problems affecting the various sections of the Dominion, with special reference to Canada's position in the British Commonwealth.

Texts: Liberal Summer School Conference. Canadian Problems. Canada Year Book.

ECONOMICS 3. The machinery of international trading and the inter-relationships of countries with regard to raw materials.

Texts: Theory of International Trade, Bastable. Financing Foreign Trade, Towers.

ECONOMICS 4. A study of the present complicated structure of Banking. Comparison will be made of the British, American and Canadian systems of banking and special attention given to the question of Central Banks.

Texts: Principles of Money and Banking, Kilbourne. Banking Systems of Great Britain, France, Germany and the United States, MacKenzie.

ECONOMICS 5. A study of the evolution of existing forms of government, based on such types as Democracy, Fascism and Communism, with special reference to the various forms of the former.

Text: Statesmen's Yearbook.

ECONOMICS 6. The Share of Labour in the National Dividend. Various Papal Encyclicals on Labour Problems. The relative importance of closed, open and company unions and allied topics, such as Compulsory Insurance, the N.R.A.

Text: Industrial Democracy, S. & B. Webb.

HISTORY OF MONEY. An outline of the evolution of money and its importance from earliest days.

Texts: Story of Money, Angell. What Everybody Wants to Know about Money, Cole.
