## ST. MARY'S COLLEGE

IN the year 1841 St. Mary's College was granted by the Nova Scotia Legislature its first charter enabing it to confer degrees.

From this period onward the College met with varying success. Finally, in 1903, it was reorganized by His Grace the late Archbishop O'Brien, who built the older portion of the present College, appointing the Right Rev. Monsignor Kennedy its first President. After a period of about two years Monsignor Kennedy was succeeded by Rev. C. E. $\mathbf{M c M a n u s}$, under whose energetic and able direction the College was conducted until 1913. In September of that year, on the invitation of His Grace Most Rev. E. J. McCarthy, Archbishop of Halifax, the Christian Brothers of Ireland undertook the management of the College. On this occasion were laid the foundations of the new building, which was completed in 1914-a lasting tribute to the zeal in the cause of Catholic education of His Grace, the clergy and the citizens of Halifax, by means of whose generous donations it was erected.

In the year 1918, the Legislature passed an "Act to amend the Law respecting St Mary's College, Halifax," the opening paragraph of which reads as follows:

[^0]
## CURRICULUM

## St. Mary's College provides:

A Preparatory Course.
A Collegiate Course of Four Years.
An Engineering Course of Two Years.
An Arts Course of Four Years.
The Preparatory Course is intended for pupils who are not suf. ficiently advanced in their studies to take up the Collegiate Course.

In the Collegiate Department a general course for each year will be selocted by the College authorities from the various subjects of the syllabus.

St. Mary's has been affiliated to the Nova Scotia Technical College in Halifax and students who follow successfully its Two Years' Engineering Course are admitted to the Nova Scotia Technical College for the final two years course prescribed for its degree.

In selecting the subjects of study for the Arts Course, the College authorities take into account the probable future careers of the students and the number of applicants for any particular branch.

Written examinations are held towards the close of each Term and the results are made known to the parents. These examinations determine the students' class standing for the year. Every student who is successful in a subject is credited with First Class Distinction, Second Class Distinction or Pass. The names are arranged in order of merit in both Distinction and Pass Lists.

At the end of the school year Diplomas are awarded to all who have satisfactorily completed the year's course. Students who attain a high standard of excellence are awarded Distinction Diplomas.

The training of the students in the art of public speaking is carefully attended to and weekly debates form an important part of the College curriculum.

Due attention is paid to the physical development of the students and all are encouraged and expected to take part, according to their
strength, in the outdoor games. Every facility is afforded for playing football, handball, basketball, hockey, baseball and tennis.

The College considers the formation and development of character, the religious and moral training of its students, of greater importance than anything else. Facilities are afforded for the frequentation of the Sacraments and the students receive regular instructions in the truths of Faith and the duties of Religion. By these means are laid the foundations of a true Christian character.

## ADMISSION

Resident as well as day students are eligible for admission. Boys under twelve years of age are not admitted as boarders, but they may enter the Preparatory Department as day-scholars if their school work reaches the required standard. Students are received at any time during the year; but it is advisable that they should enter, if possible, at the opening of the school year in September.

Applicants for admission who are not known to the College authorities must furnish satisfactory references. The diplomas of any recognized school will be accepted as evidence of standard.
