His Grace, Most Reverend John T. McNally, S.T.D., Ph.D., LL.D., Chancellor

# THE ARCHBISHOP'S MESSAGE

*(The Most Reverend John T. McNally, D.D., Ph.D., Archbishop of Halifax is this year celebrating his fifty-fifth year as a priest and his thirty-eighth as a Bishop.)*

The restoration of the lost rectitude with which the Creator first endowed mankind should be the aim of all educational striving.

This rectitude consists in the full submission of our material appetites to the nobler will, the subjection in turn of the will to the lordly intellect, and finally the docility of the entire man towards the laws of the infinite God.

Education must bring about "the interior transformation of the whole man" — of his entire personality. A "liberal education," purely intellectual, is morally and religiously neutral, and therefore gives no guarantee of true culture and lofty living. To quote the words of Cardinal Newman "I want the religious man to be intellectual and the intellectual man to be religious".

What is needed for intelligent Catholics to realize in practice is that we are here in this passing life, this threshold of eternity, to become saints, and therefore, in the matter of education, to train all who come under our care to become saints. That does not involve neglect of the highest training for the duties of this life, but greatly enhances its possibilities.

Blessed, then, are the youths whose minds mature and expand in schools of superior instruction in which science and religion advance hand in hand, where Heaven speaks as well as earth, where the King of Kings is enthroned supreme over both the teacher and the taught.

And blessed are the parents, and perhaps more blessed still are those who, without the parental obligation, not only obeying this transcendent law of God and His teaching Church, but, realizing their obliga-

tion of transmission of their precious gift of faith, their loyalty to one another and their duty towards their neighbours of every class, with whom they should desire to live in fraternal helpfulness, place well the foundations upon which the spiritual edifice of the future will rear its massive proportions, and by generous cooperation and unstinted use, provide for the structure, both spiritual and material, the strength that will forever endure and the beauty that will always attract.

Self-respecting Catholics can never place themselves in the unworthy and humiliating position of having their schools of any grade called or considered inferior. The outside world does not know what real Catholicity means, but it is wise enough to appraise at his true value a recreant Catholic whose imagined and weak-kneed broadmindedness cuts him off from loyalty and obedience to that teaching upon which he professes to base his eternal hopes.

For our new Saint Mary's University we have tried to give our Faithful the very best possible. We have in our episcopal city a site unexcelled. We have, about ready for use, a building whose structure, proportions and equipment it would be difficult to surpass. We have the whole-hearted cooperation of learned and saintly Religious well trained and laboring zealously in what St. Gregory Nazienzen calls "the art of arts and the science of sciences", the direction and formation of youth.

And, beyond all, we have the constant protection of the Heavenly Mother, the "Seat of Wisdom", interceding for us before the Holy Spirit, the source of wisdom, "Who of God is made unto us wisdom, and justice, and sanctification and redemption".

*+ J. T. McNally.*

Right Reverend William J. Burns, D.P., V.G.,  
Vice-Chancellor

Very Reverend Frederick Lynch, S.J., President

## THE RECTOR'S MESSAGE

*F*ACULTY and Staff of St. Mary's: I extend to you all my sincerest thanks for your devoted and scholarly cooperation during this academic year.

Graduates of 1951: you are the representatives and ambassadors-at-large of St. Mary's. Go forth strong in faith, firm in hope, and rich in charity. God will demand much of you; Canada expects much of you; St. Mary's wants to be proud of you always. "All that is best—that best I wish you."

Students: I have been happy in knowing you all and look forward to seeing you again in September. A very definite responsibility awaits you: to establish traditions of study and sportsmanship, of faith and loyalty, which will be the foundation of student spirit in the new University.

God bless you all.

*Frederick J. Lynch, S.J.*

# The STUDENTS

## SALUTATORY

ON BEHALF of the Graduating class of 1951 and the faculty of Saint Mary's University, it is my privilege to extend to you a very sincere welcome, to this, our Convocation.

Tonight is both a joyous and a solemn occasion. Joyous in that tonight our dreams are realized; our hopes fulfilled; our four tedious years of study are over; and solemn in that tonight we say goodbye, not only to our Alma Mater but to the many friends who have become near and dear to us during our stay at Saint Mary's.

The glory with which we are surrounded tonight is not ours alone. For a good deal of it must be shared with you, our parents, without whom we could never have attained that station in life. And so it is, dear parents, that we extend to you a heartfelt and warm welcome, for ours is a debt that we can never hope to repay. You who have made many sacrifices and borne many crosses, so that your sometimes seemingly thankless sons could have the benefits of a college education, are not going unnoticed in this, their hour of glory. Words are a poor medium to express the deep feelings of the heart, and I can only say that I hope you may be proud of us tonight as we are of you.

A warm welcome is extended to our many friends and benefactors who were ready to lend a helping hand or impart a wise word. Welcome to the parish priests and lay teachers of our primary and secondary schools who, so to speak, prepared the soil, planted the seed, that has grown into this tree of higher learning.

We, the class of '51, indeed owe much to our parents, friends, and Saint Mary's itself. Hence it is that we say Welcome to all of you who honor us with your presence here this evening. Share with us our success, share with us our glory. For, though success is sweet, it is sweeter because shared with you!

LAWRENCE DAVIES

# GRADUATES

Leo Arab

### Leo Patrick Arab

Chopin or Hammerstein! Ask Leo for a sample of either's musical creations and he immediately begins to "tickle the ivories." Whether it be a formal or informal occasion, Leo is always willing to contribute a helping hand in providing the entertainment.

The immense popularity which Leo enjoys came not only as a result of his musical talent but also from his own enthusiastic personality: good naturedness, a ready smile and a fine sense of humor. With Leo there is never a dull moment either in or out of class.

Whatever his calling, we feel certain that this true gentleman will quickly reach successful heights; and we at Saint Mary's say, "Good luck and adieu".

### Oliver E. Blakeney

A Journalism diploma wasn't enough for "Ollie", fast-footed advertising manager for the Journal and Collegian during the past three years, so he decided to round out his education with a B.A.

A good speaker and debater, "Ollie" represented Saint Mary's twice in Inter-Collegiate debates. He also led the Journalism team when they won the inter-faculty debating league championship two years in a row.

With "Ollie's" personal touch on everything he attempts, no task will be completed unless it has his distinguishing mark of, "a job well done".

Oliver Blakeney

## ARTS

### John Edward Campbell

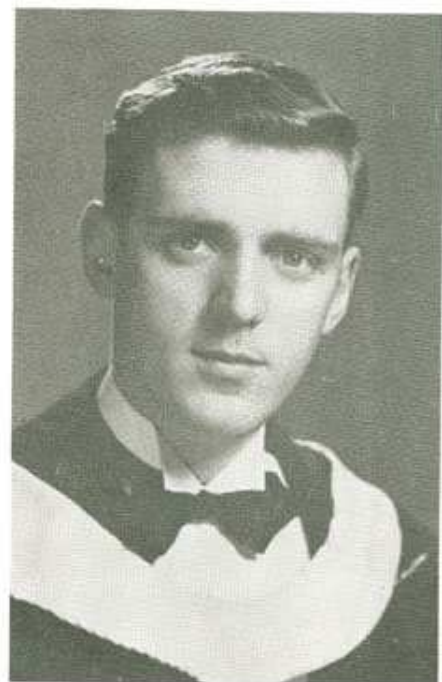

During the seven years of high school and college life at Saint Mary's, John has had an enviable record both in scholastic and extra-curricular activities. Sincerity and integrity are but two of his outstanding virtues. An insistent and clever speaker, he demands much respect in the field of oratory. Although ill health forced him to delay studies for his senior year, he has more than made up for the loss upon his return.

We all join in wishing him every success in the field of medicine which he has chosen as a career.

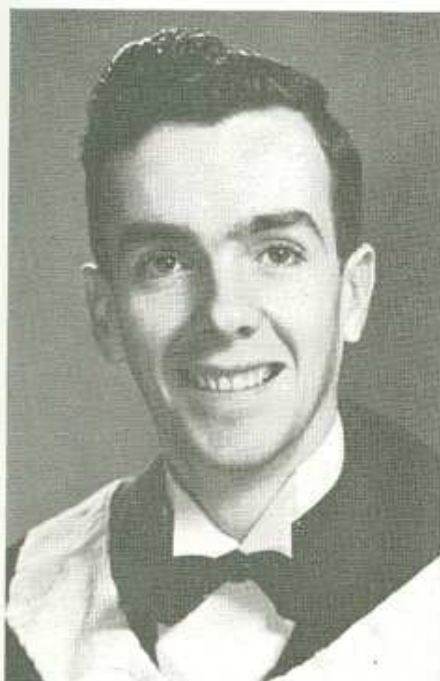

### Paul Chisholm

Paul came to Saint Mary's High School in 1941. His college course was interrupted for two years at the Jesuit Seminary in Guelph, and in 1948 he returned to his Arts studies at S.M.U. Quiet and soft-spoken, he has the self-confidence and humility born of years of study. However, Paul is best known as a thespian in the Saint Joseph's Passion Plays.

On the campus he leads an active life as Prefect of the Sodality and Secretary of the Senior Debating Society. Having proven his capability in any office he has taken, Paul will surely find success and he leaves Saint Mary's with a bright future before him.

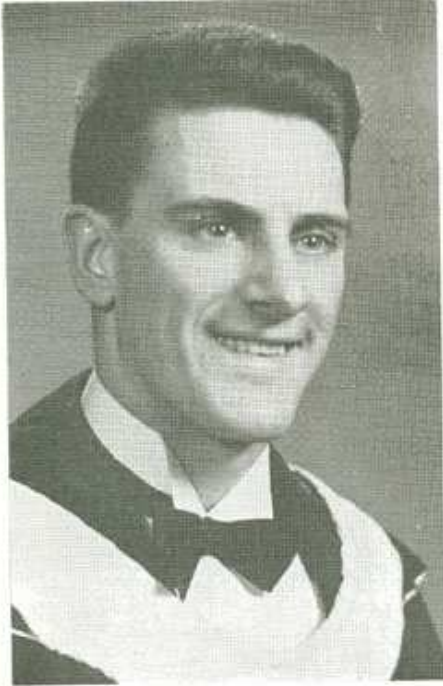

Paul Chisholm

John Campbell

Society. Having proven his capability in any office he has taken, Paul will surely find success and he leaves Saint Mary's with a bright future before him.

# ARTS

William Dishlin

## William Dishlin

"Dish" has been an institution within an institution. Full of enthusiasm and philosophical insight, he has been a sparkling college career.

His activities outside of class have revolved around hockey, both collegiate and interfaculty, although he has been known to impress more than a few in the Senior Debating Society.

Earnestly ambitious, we believe his future lies in the field of teaching, a calling for which he is well suited. We wish him all the best.

## Walter Dowd

During the past four years at St. Mary's, the sage counsel offered any baffled student has been; "If you don't know, ask Walter." And since his arrival from St. Pat's in 1948, Walter has always had the answer.

His exam reports, the envy of every student, have shown that "success" and "work" are synonymous terms; while a friendly manner and willingness to help others have won for him innumerable friends.

We are not sure what road he will choose in life but if the past is any indication of the future, he will surely be successful. The best of luck to a true scholar.

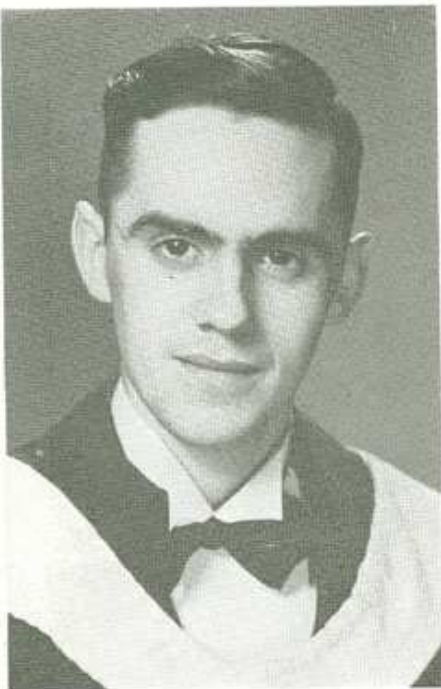

Walter Dowd

## Eric John Edwards

In Eric (he of the perpetual smile) we have known a truly earnest young man. His every success may be measured by the amount of industry applied, and certainly, during his years at St. Mary's, he has been a very industrious fellow.

Although generally a quiet student, he has shown himself to be an able debater; while his constant smile and unassuming manner have won him the friendship of all who knew him. He leaves St. Mary's with our every good wish for the future.

Eric Edwards

# ARTS

## James Edward Houlihan

"Dapper Jim" has graced St. Mary's with his presence for quite some time. Through the years since he first appeared in the ninth grade, his has been an admirable record; shining both academically and athletically, as well as knowing his way around the social circle.

Eric Gunn

## David Ignatius Jones

No small measure of popularity has been won by this genial anecdotist, whose spontaneous stories on all subjects have never once failed to amuse and instruct.

In an argument, he is alert and active, pursuing each point with persuasive but gentle insistence, to its logical conclusion. His ability to argue on all points gives him command of any situation. When he wins it is not through pedantry but through common sense.

Great as will be the gap left by his departure, the impression he has made will ever remain in the minds of his friends.

James Houlihan

## Eric Carl Gunn

Eric has been a dominant figure during his years at St. Mary's.

While usually pretty well absorbed with the life of the Army, he has nevertheless found time to check his beret for a football helmet each fall and be a "big gun" for Arts on the gridiron.

Although he may never become Supreme Allied Commander, Eric, we feel has the qualifications for a prosperous future, whenever that may be. Carry on!

David Jones

# ARTS

Edward McCormack

## Edward Vincent MacCormack

A wonderful blend of socialite and scholar; loquacious and interesting; well liked by all — this is our "Eddie", Glace Bay's gift to Saint Mary's.

While within our walls, Ed has been a willing participant in both interfaculty football and hockey, as well as a member of the Sodality and Debating Society. He is now in the ranks of the U.N.T.D., and this year winds up a successful term as Students' Council President.

At the moment Ed is undecided concerning his future, but with his energy and personality there is no doubt that he will do well whatever life he chooses.

## John Laughlin MacKinnon

One of College Street School's most treasured gifts to Saint Mary's first entered the latter's portals in the fall of 1944. Since that time he has exhibited outstanding prowess as an athlete and remarkable potentialities as a student. Added to this there is the rare achievement of having been voted in the 1951 Journal Poll, the best-liked student at Saint Mary's.

Jack's extra-curricular activities include the C.O.T.C. and the Philosophers' Academy. Both these interests should help to ensure his success at Dalhousie University where he plans to study for a legal career. We at Saint Mary's wish him all the best.

John MacKinnon

## Patton MacLean

Although usually grouped with that august number that fall under the genus "Man" and species "of Cape Breton", Pat, however hails from Mulgrave on the mainland.

Quiet, sincere and conscientious, he has won a host of friends during his stay both as a Boarder and an Artsman. Not one to sound off on empty babblings, all admired his reserved judgment and logic. Pat was always around when it was a question of interfaculty sports or debates as well as some familiarity with Mount Saint Vincent.

We all say, "Pat can't miss success."

## Raymond J. Slaunwhite

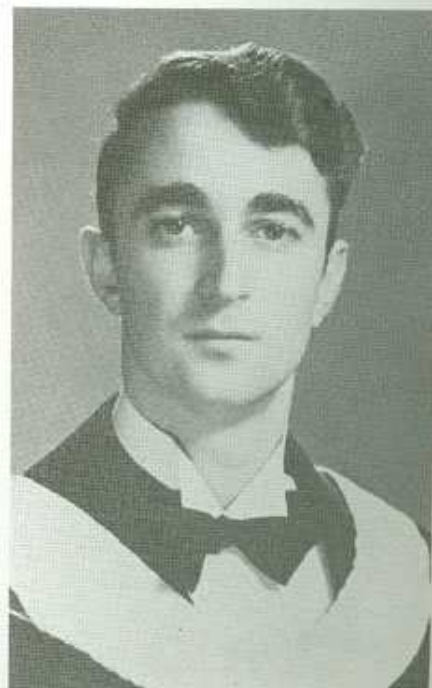

A quite but pleasant personality combined with a keen intellect have been the motivating factors in Ray's successful scholastic career.

Though modestly soft-spoken, he was always active in extra-curricular activities, being a leading organizer and participant in all college functions whether academic, athletic or social. While he played a prominent role as an orator in his many debates winning the acclaim of his listeners as "Little Cicero", he will best be remembered as the whimsical realist.

In leaving Saint Mary's, Ray ends a colorful college career, and we feel confident that wherever he may seek his future fortunes, he will know success.

Patton MacLean

Raymond Slaunwhite

Ronald Callis

### Ronald Leo Callis

It was in September of 1947 when Ron first graced our hallowed halls of learning. In the intervening years, while proving himself a sincere and industrious student, he has made for himself a long list of friends at Saint Mary's. With his cordial nature and pleasing personality, he was always an asset to any academic or social function.

Ron has joined the administrative branch of the Air Force in which he should be well fitted and a credit to his Alma Mater. It is with regret that we bid Ron farewell; and we hope that success will crown his every effort.

### Patrick T. Crosby

Pat has been one of the most active men at Saint Mary's and during his stay has made a host of friends with his easy manner and keen wit. Never at a loss for words either in his capacity as Chairman of the Debating Society or philoso-

phising in the basement, he has proven himself a competent and convincing speaker.

Although a serious student, he has found time to participate very capably in interfaculty football and hockey, and he acclaimed and dubbed "Cecil B." Crosby by the critics for his dramatic efforts.

Pat has chosen the Army as his career and it is the sincere wish of all Saint Mary's that every success will be his in this new life.

## COMMERCE

Patrick Crosby

### Lawrence Edward Davies

Laurie has done well.

Coming to Saint Mary's in 1947 he has since shown himself to be a better-than-average athlete, an outstanding orator, and an active participant in all campus functions. But above all he has shown himself to be a brilliant scholar, and in this respect he has had few peers. Seldom has Saint Mary's known a keener intellect, and it is difficult to imagine a person of Laurie's calibre knowing anything but success in future life.

Like many another, he too has chosen the Army life as a career and as he leaves Saint Mary's he carries with him the best wishes of all.

### William Hanrahan

The career of Lieutenant William Hanrahan at S.M.U. has indeed been an interesting one—and little wonder, for "Bill" is an interesting young man.

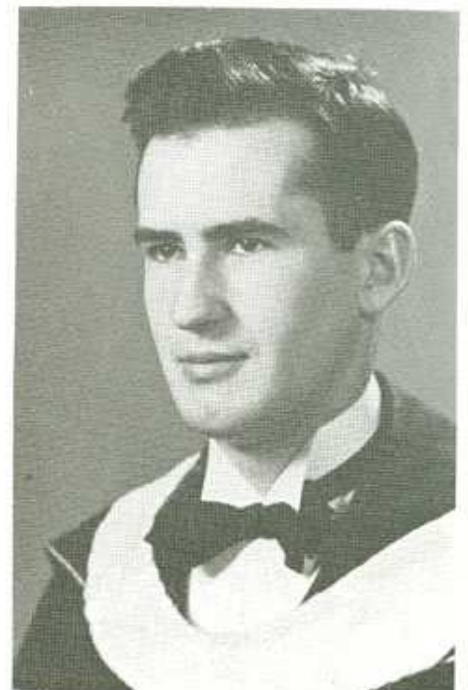

Usually quiet and reserved, he has always shown a fundamental interest in things Santamarian. While he has been a polished debater and versatile athlete, Bill has

applied himself seriously to the Commerce course and shown himself to be a hard worker.

As he leaves to seek his fortunes in the Army, we know he will give a credible account of himself and achieve success.

Lawrence Davies

William Hanrahan

Francis Laba

Together with his being a winner of the Haliburton Medal for platform speaking, he has also made a name for himself on the ice lane and the football field. Always a staunch supporter of Saint Mary's activities, Bob is also an artist and the Commerce poet-laureate.

Endowed with such qualities, Bob, we predict, will do good in whatever future studies or work he undertakes. We wish him well.

### Francis Joseph Laba, B.A.

When the roll is called up yonder burly Frank will probably roar, "Here Sir" just as he does every day in Mr. Beazley's classes.

An ability for hard work and a keen sense of humor combine to make Frank both an excellent student and a fine fellow.

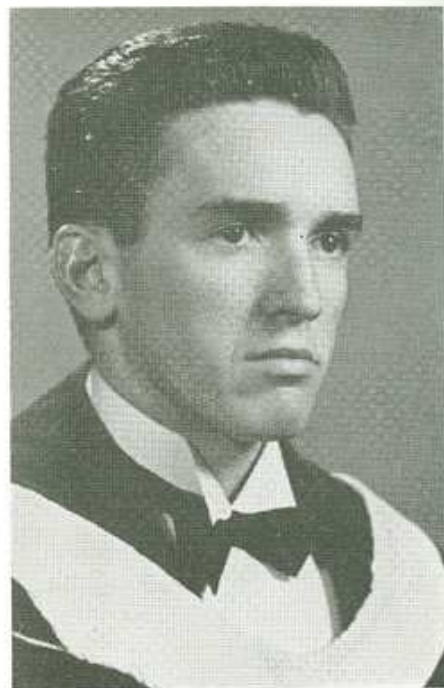

He is a familiar figure around the halls of St. Mary's, having graduated in 1949 with a B.A. and returning a few years later to take his degree in Commerce.

Whatever Frank undertakes when he leaves St. Mary's he is certain to be a success for he has the ability and character of a leader.

### Robert Warren Napier

Though a representative of the notorious A. A. A., Bob, nevertheless, has won for himself a large number of friends in his years at Saint Mary's.

## COMMERCE

Robert Napier

### Cecil J. Robertson

"Cec" came to St. Mary's from St. Pat's and quickly established himself as a capable athlete, renowned debater, and intellectual giant.

Cecil has opinions on everything, ranging from women who smoke to the attributes of God and back again. He expresses them freely and often. More than one unsuspecting professor has been the target of "Cec's" rapid-fire questions, and the victims believe he has an inexhaustible magazine.

Cecil has joined the Air Force and until he's forty he will seek his fortunes in the wild, blue yonder.

Wherever his adventures carry him, he has the continued best wishes of his former mates for a successful career.

### George Herbert Steele

Our George, who hails from "The Garden of The Gulf", will long be remembered by students and faculty alike.

After spending five years in the service (R. C. N.), George shed the navy blue and enrolled at St. Mary's. A little older, with more experience than some, George has the ability to converse intelligently on practically any subject.

Together with his great enthusiasm for hockey he always showed a readiness to take an active part in the various activities of the college.

With his pleasant manner George has made many friends while at St. Mary's, and as he leaves we wish him every success for the future.

Cecil Robertson

George Steele

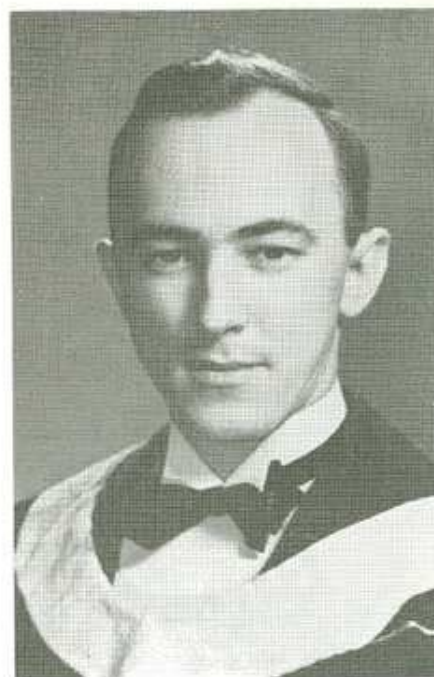

# SCIENCE

## Gerald Robert Curran

Although it took four years to discover it, "Gerry" is one of our more gifted debaters at S.M.U. One hand in a pocket, the other pounding the lectern, this fellow from Dartmouth has held many an audience with his convincing speech and the occasional off-hand anecdote.

An officer cadet in the R.C.E.M.E., "Gerry" off-stage is a quiet, competent student. Now, with his B.Sc., he will continue his pursuit of an engineering degree at Tech. His future should be bright and exceedingly successful.

Gerald Curran

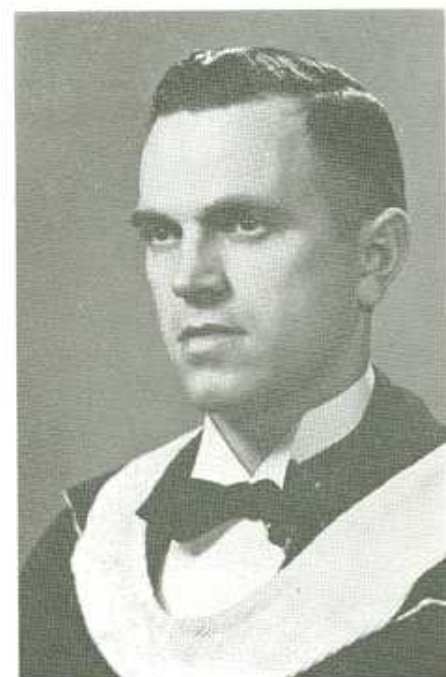

Robert Flinn

## Robert James Flinn

Since arriving at Saint Mary's in 1947, Bob has been both an excellent student and a prominent figure in all college activities. As treasurer of the Engineering Society ('47-'52) he has shown an ability and willingness to accept responsibility.

Athletics have also played a major part in Bob's college life, and in 1948 and 1950 he shared in wearing the Hockey Champion's "wreath of victory".

Always a popular young man around Saint Mary's, Bob plans to continue his studies at Tech next year as a Civil Engineer; he has our best wishes.

Francis Houlihan

## Francis Houlihan

Frank first came to S.M.U. in 1941 and after graduating with a diploma in engineering, he set out to seek his fortunes. However, realizing the value of a higher education, he returned in 1950 to study for a B.Sc.

While he is a quiet, serious student, he has won many a friend during his years at Saint Mary's through his sincerity and conscientiousness.

He leaves well equipped for his pursuit of an engineering career and he has our every wish that it be a prosperous one.

# SCIENCE

## Aloysius Kalbhenn

A former "Mountie", "Kal" set out on the trail of a Science degree in 1947.

In his quietly competent manner he has earned the respect and friendship of all at Saint Mary's since coming to us from New Waterford down on the "Mighty Isle".

The organization and management of our various activities has been due in no small degree to the sincerity and hard work of Al.

We wish him every success and know that whatever he does, it will be done well.

Aloysius Kalbhenn

Ernest Pittard

## Earnest Joseph Pittard

"Ed", as he is popularly known, is an all Saint Mary's student, having attended both High School and College at S.M.U.

Ed went further afield in the technical phases of academic training by studying organic chemistry and German at summer schools.

He supplemented his studies with hobbies and has become recognized as a designer of model boats, trains and cars. He also blows an entertaining trumpet.

Saint Mary's wishes him all the best, and we are confident that he will make great strides in the chemical and mechanical branches of an Engineering future.

James Soy

## James R. Soy

Truro's temporary loss was Saint Mary's permanent gain. For when Jim entered our walls he brought with him a driving spirit that has characterized his every effort and won for him countless friends. Wherever and whenever we encounter staunch spirit it will surely remind us of Jim Soy.

The best of luck Jim. You'll succeed we know, and add more laurels to yourself and your school.

## ENGINEERING

Thomas Barry

Don has established himself as a keen mathematician; while his work in "labs" proves he is also capable of applying himself to the practical side of a course.

Don intends to continue his studies at Tech, and it is our sincere wish that he prosper in his future pursuits.

### Thomas Andrew Barry

Big Tom first stomped through our aged halls in the fall of '45. From that time on he has always shown a keen enthusiasm in Saint Mary's activities and a sincerity that has won him a large number of friends.

While he was no stranger on the football field, his main concern was the Engineering course and he applied himself to this seriously.

Tom plans to return next year for a degree in Science and we wish him every success in his studies.

### Donald Gerard Courtney

Don, or "Court" as he is popularly called, is one of the best-known and best liked engineering students at Saint Mary's. Noted for his sudden witticisms, "Court" was always in demand for any type of college activity.

Donald Courtney

### Thomas Henry Flood

Hailing from the steel town of Amherst, N. S., Tom took the road to higher learning in the Engineering faculty at S. M. U.

Well liked by both students and professors, Tom will be remembered for his quick smile and "easy to get along with" personality.

A member of the famous Boarders' Society for two years, Tom made many friends both near and afar. Though never slow to come out from his studies for social activities, he took everything in good measure, knowing the time for study and the time for play.

We wish Tom the best of luck in his future life knowing that whatever he undertakes will be an ultimate success.

Thomas Flood

keen interest and ability in football, hockey, baseball and basketball. He has also been a very competent Sports Editor for the Journal.

Versatility, and strong ambition are qualities that insure John of an excellent future.

### John Houghton

John E. "Silent" Houghton is the fellow we'll label "Most likely to succeed." He has been outstanding in extracurricular activities as well as in his studies since entering high school in 1946.

John, hailing from Atholville, centre of New Brunswick's bustling logging industry, has displayed

John Houghton

# ENGINEERING

Bernard Kirk

## Bernard J. Kirk

The Engineering graduates, as a group, have been a versatile lot, and "Bernie" is no exception. He has taken an active interest in all college activities and has displayed this same interest in his attitude to the scholastic side of his college life. Bernie has the enthusiasm and capacity for doing well in whatever he undertakes, and as he leaves to continue his education at Tech we wish him a continuation of the success he has known at Saint Mary's.

Leonard Martell

## Leonard Joseph Martell

"Len" has taken part in athletics and social functions; but he has been first, last, and always a student of Engineering. With a sincerity and diligence that have won him both friends and good marks, he has established himself as one of the outstanding men in his faculty.

We are happy to have known this truly fine fellow and it is the wish of all that his will be a successful career.

## Stanley McPhee

In September of 1947, out of the land beyond the Strait of Canso, came a smiling, twinkle-eyed lad with a crew haircut. Since then Stan has displayed one of the most versatile, winning personalities, that Saint Mary's has known.

He has been a familiar and welcome figure in all college activities, proving himself an equally outstanding competitor both in hockey and football and an asset to any social function.

Stanley McPhee

We wish Stan a prosperous future. And as he leaves Saint Mary's he's still smiling, still twinkle-eyed, and still has a crew haircut but he is now the richer in knowledge and friendship; and Saint Mary's is the better for having known him.

## John H. Merritt

Neither Latin nor Greek phrases can aptly describe our "Cowboy", for it is here we must practice the old idiom "Seeing is believing".

With a firm, square jaw, piercing blue eyes and a bulldog's strut, John entered Saint Mary's in 1948 and proceeded to establish an outstanding record for himself.

Woodsman, music-lover, and a prominent badminton athlete, John has been a constant source of entertainment with his colorful personality.

John is a thinker with the keen perceptive qualities of an engineer and he leaves Saint Mary's with the best wishes of all who know him.

John Merritt

John Napier

though he found time to attend and participate in the various functions outside the lecture room, Murray never lost sight of the goal he sought in entering Saint Mary's—education.

As he graduates with an engineering diploma it is the sincere wish and belief of all that he will find success.

### John Joseph Napier

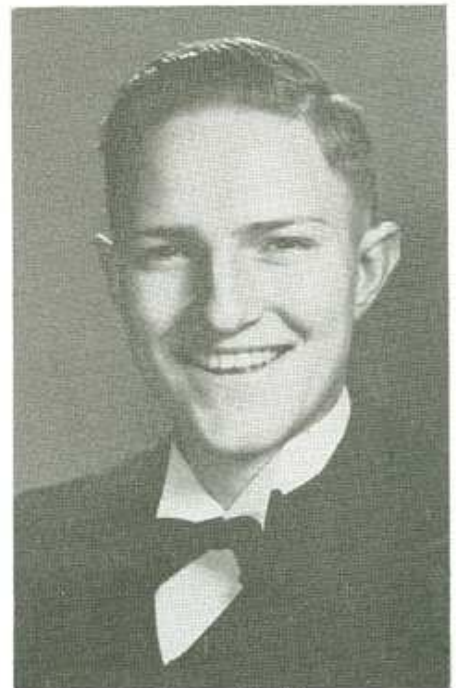

Having taken his High School at St. Mary's, Jack has combined a high scholastic record with everything in the way of extra-curricular activities.

Since entering the college, his contemplative and mature judgment have prompted his classmates to elect him President of the Engineering Society.

A fine athlete, Jack captained the '49 High School Football Champs and played an active role in both interfaculty football and hockey.

We are proud of this versatile fellow and wish him every success in the goal for which he strives.

## ENGINEERING

Murray Webb

### Murray Webb

Murray is the type of lad Saint Mary's, as an institution of learning, has been proud to know. For in his years at college, learning has been his prime objective. Al-

### Kenneth Clement Scott

It is the general belief around Saint Mary's that the expression "Great Scott!" was first uttered following an encounter with our own "Kenny" — the "Enlightened Engineer".

He has been an outstanding netminder for Engineers' hockey squad, but he will be the better remembered as an outstanding student to the 'nth' degree.

While his prime interest was in his studies, he nevertheless led an active life outside of class and numbered many among his friends. Kenny intends to continue his engineering at Tech and we wish him all the best.

Byrne Williams

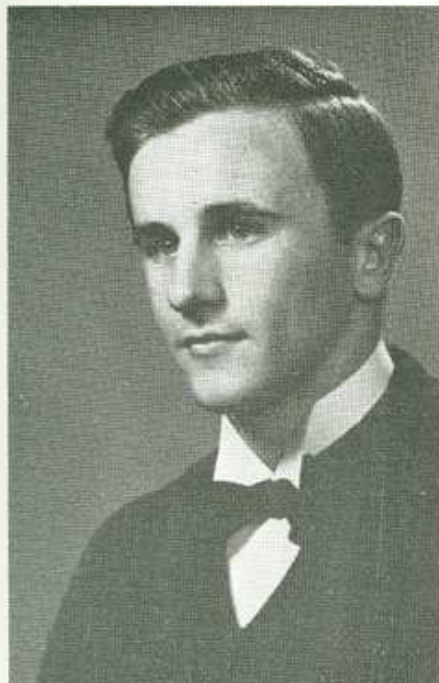

### Byrne Williams

Byrne is a quiet, likeable soul. A Dartmouth lad, he has shown remarkable promise as an engineer, having maintained a high academic standard throughout his years at Saint Mary's.

Outside the classroom, he has taken an active part in all interfaculty sports and is a member of the C.O.T.C. contingent.

Byrne is, as yet, undecided whether he will go on to Tech or return

to Saint Mary's. Whatever his choice, we are certain he has the qualities to attain his goal as an Engineer.

Kenneth Scott

## JOURNALISM

Graham Allen

Donald Merzetti

Sister Maura

Ralph T. Vaughan

Lou Zwerling

"Mert", first and foremost a journalist and a sportsman, takes his first big step towards a writing career when he tucks a diploma in journalism under his arm at Saint Mary's this year. Aside from this success, "Mert" has shown Saint Mary's many talents.

He proved he was an energetic sportsman when he started the Boarders' basketball team, and later gave the initial push to the brand new university team that followed. Last year he, as Sports Editor of the Journal, turned out one fine sport's page after another.

In this final year, "Mert" blossomed out as an able editor of the Journal and the Collegian — both of which gained new life and spirit under his guidance.

THE SCHOOL of Journalism in Halifax is truly unique among schools. Sponsored by three colleges and four city dailies, it made its modest bow to the world in 1945. Since then, it has been advancing on the road of higher education in a spirit of good fellowship and hard work. Now, its staff numbers seven lecturers. Its nineteen graduates of the past are succeeding in the field of journalism or of radio, and several have shown themselves well prepared to make a success in other fields also. This year, courses in public relations and advertising have opened new professional spheres to the Class of '51. The large number of credits in arts which is required for graduation, rounds out a liberal education. For good or ill, the press is a most potent influence in shaping public opinion and molding the mind of youth. The hope of the School of Journalism is to send forth into the great arena of life young men and women well endowed by nature and education to carry high the banner of truth.

SISTER MAURA

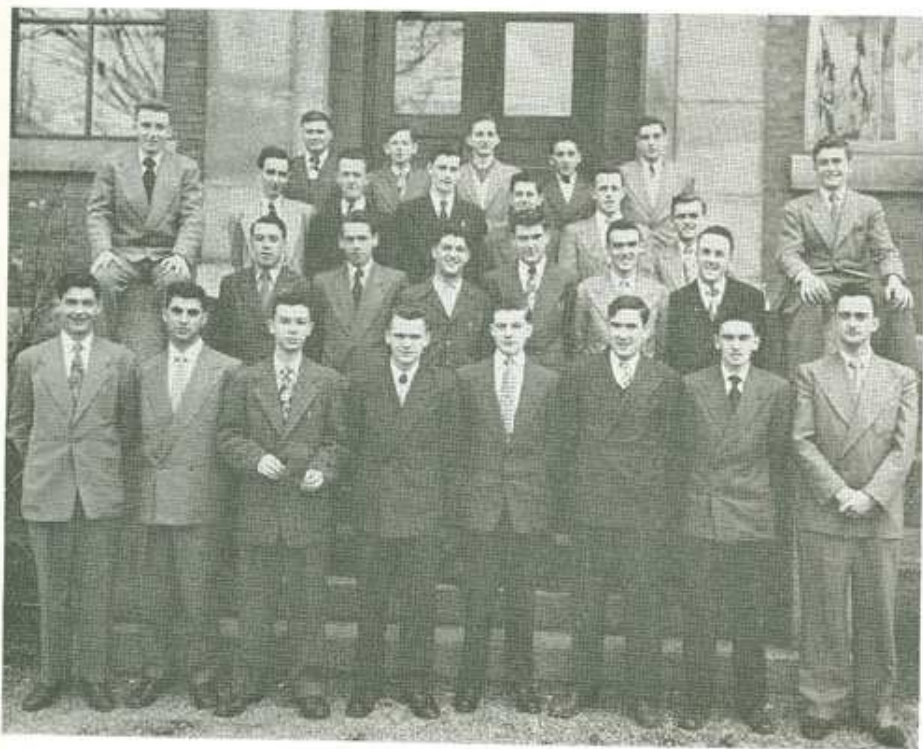

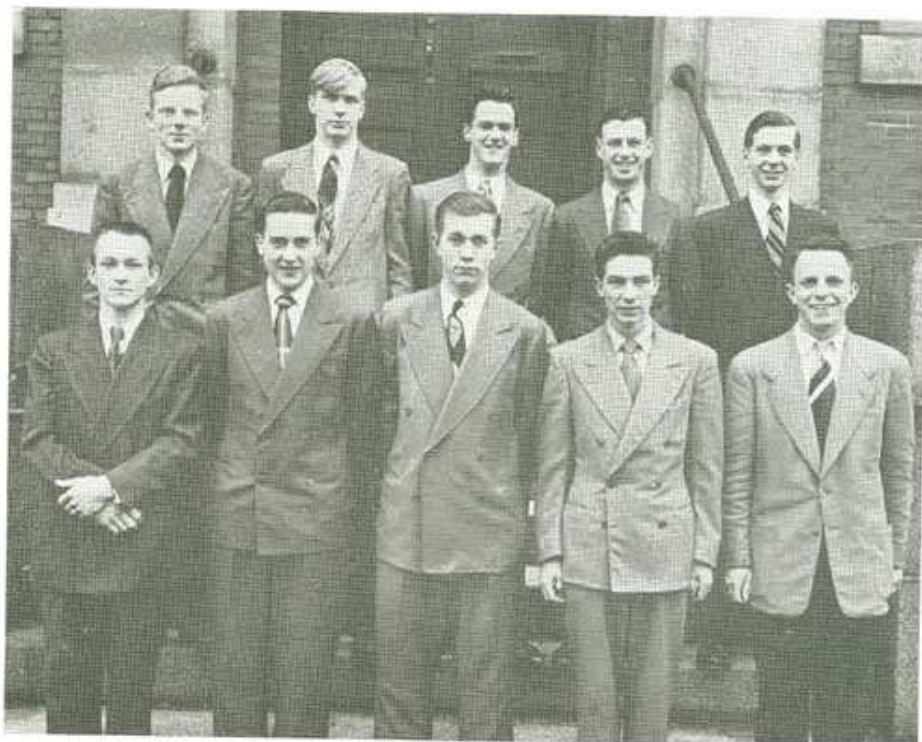

# CLASSES

## ARTS

### SECOND AND THIRD YR. ARTS

Front Row: G. DeLouchry, P. Mac-Gillivray, J. McDonald, E. Theriault, E. Duggan.

Back Row: C. Campbell, J. Casey, E. Fitzpatrick, B. Hemon, T. Smith.

### FIRST YEAR ARTS

Front Row, l to r.: A. Bernard, L. Isaac, S. McFadden, J. Butler, K. Driscoll, H. Masterman, B. Mac-Isaac, K. Robertson.

2nd Row, l to r.: M. Fitzpatrick, J. Mitchell, G. Correia, J. Beaton, L. Brean, F. Lynch.

3rd Row, l to r.: B. Carleton, J. Gillis, L. Cruickshank, H. Crosby, R. Mombourquette, P. Napier, G. David, W. Jerrett.

Back Row, l to r.: M. Fahie, M. Meuse, D. Pigot, T. Cleary, J. Pottier.

## COMMERCE

### THIRD YEAR COMMERCE

Front Row, l. to r.:

W. MacNeil, T. McLaughlin, B. Downie, E. McGrath, B. Blackburn, J. Walsh.

Back Row, l. to r.: J. Radford, E. Riordan, L. Patterson, G. Walsh, H. Bezauson.

## COMMERCE

### SECOND YEAR COMMERCE

Front Row, l. to r.: P. Heenan, H. MacLellan, C. Jones, D. MacIntyre.

Back Row, l. to r.: R. MacDonald, K. McCarthy, H. Frowd.

## COMMERCE

### FIRST YEAR COMMERCE

Front Row, l. to r.: R. Craig, R. Carleton, J. Lacey, B. Inglis, J. Miller.

Back Row, l. to r.: W. Martel, L. Hemphill, I. Cato, G. Hanrahan.

## JOURNALISM

l. to r.: Ron Dulhanty, Ray Waller.

Second year students in the school of Journalism.

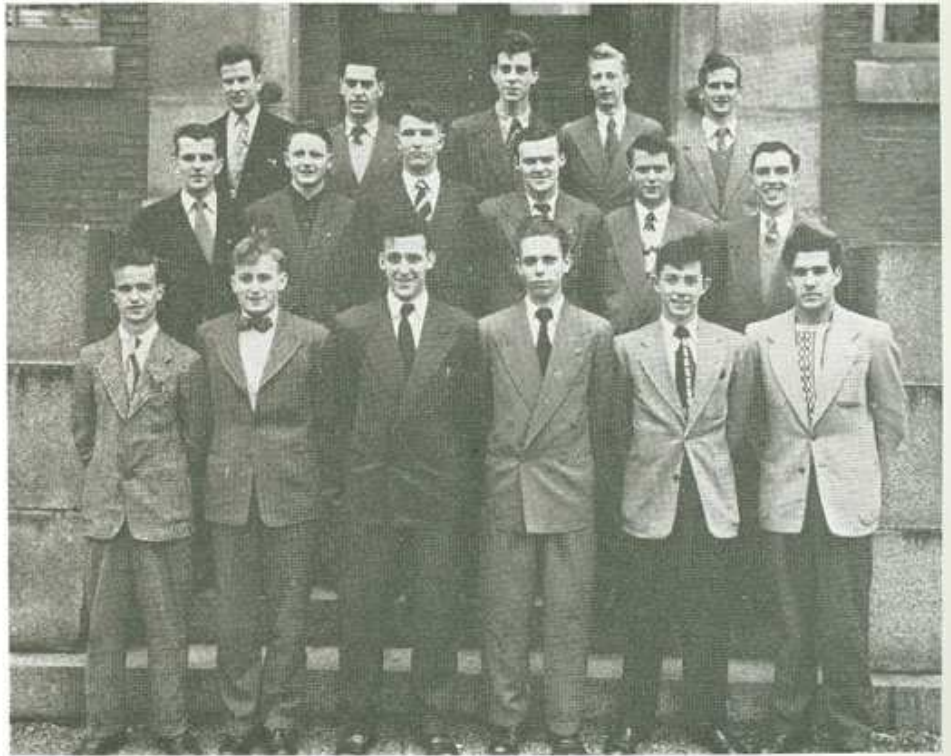

## ENGINEERING

### SECOND YEAR ENGINEERING

Front Row, l. to r.: J. Maddocks, D. Ward, A. Flynn, R. Pereira, F. Villela.

Middle Row, l. to r.: W. Flinn, D. Burke, P. Smith, P. Leydon, D. Fultz, R. Noiles.

Back Row, l. to r.: J. McGinn, C. Sullivan, B. Ahern, J. O'Toole, B. Dempsey.

## ENGINEERING

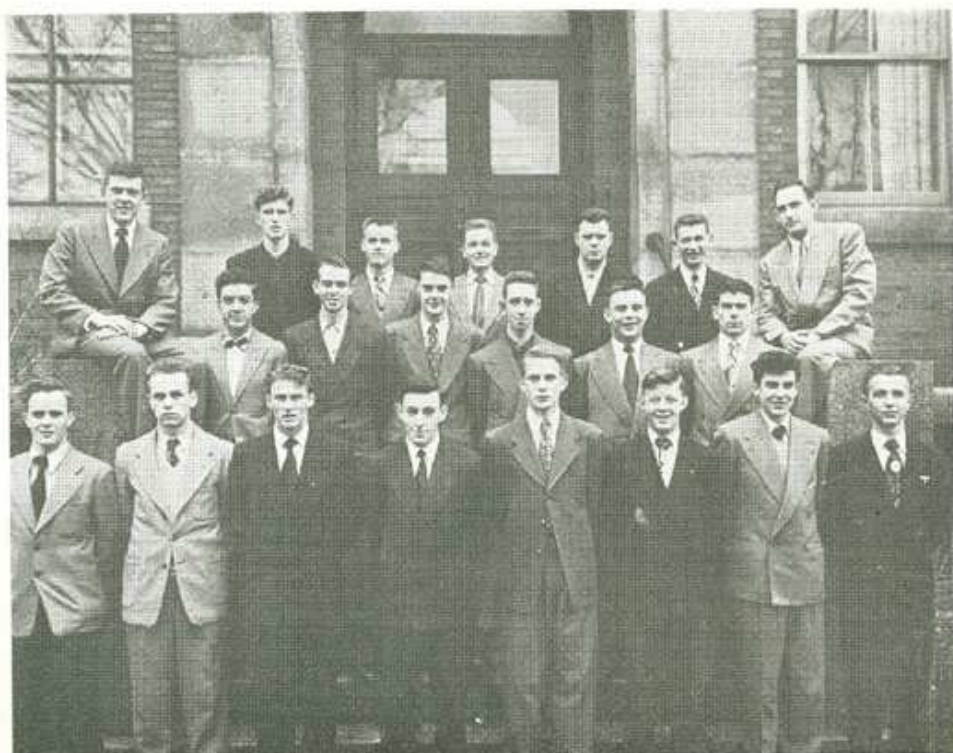

### FIRST YEAR ENGINEERING

Front Row, l. to r.: P. Musial, D. Fenton, G. Outfield, T. Burton, J. Warner, T. Clarke.

Second Row, l. to r.: B. Holland, J. Scriven, J. MacDougall, C. Courtney, M. Barry.

Back Row, l. to r.: W. Reid, J. Hawkins, R. Pellerine, T. White, F. Roberts.

## HIGH SCHOOL CLASSES

### GRADE XI

Front Row, l. to r.: J. Trainor, J. Carey, P. Hickey, G. Thibault, E. Craig, T. Mullins, R. Connors, V. Rora.

2nd Row, l. to r.: D. McGuire, T. McDonald, J. Sawler, G. Burke, D. Kilroy, J. Chaisson.

3rd Row, l. to r.: J. Murphy, G. Mills, F. During, E. Murray, B. Eade, J. Lownds, B. Sullivan.

### GRADE XI-B

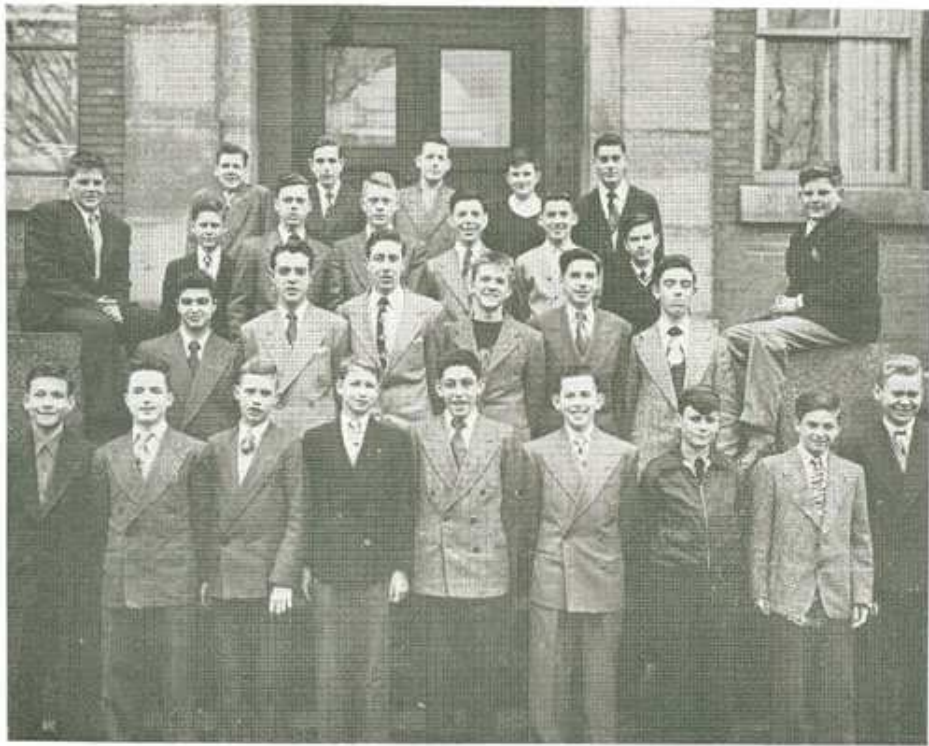

Front Row, l. to r.: R. Landry, G. Hayes, R. O'Connell, R. Chaisson, F. Fitch, P. LeCocq, D. Reardon, D. Flinn.

2nd Row, l. to r.: R. Powers, B. Murphy, J. Hayes, B. Hanrahan, J. Burns, M. Beaton.

3rd Row, l. to r.: J. Rich, C. Copelin, T. Withers, D. Smith, P. Burchell, K. Burns.

Back Row, l. to r.: R. Sullivan, P. Mielke, K. Fellows, W. Curran, L. Crowley.

## HIGH SCHOOL CLASSES

### GRADE X-B

Front Row, L to R.: H. Canham, J. Moore, E. Randall, J. Glenister, D. Joudrey, M. Napier, K. Griffin, J. Flinn, D. Curry.

2nd Row: L. to R.: R. Mansour, C. Hunt, B. Sheehan, D. Brown, D. MacAvoy, R. Nash.

3rd Row, L to R.: P. LeCocq, B. Miller, J. Conrad, D. Gillis, J. Buckley, H. Clark, T. Chaisson, P. LeCocq.

Back Row, L. to R.: E. Berrigan, L. Curry, J. Trainor, M. O'Brien, J. MacNell.

### GRADE X-A

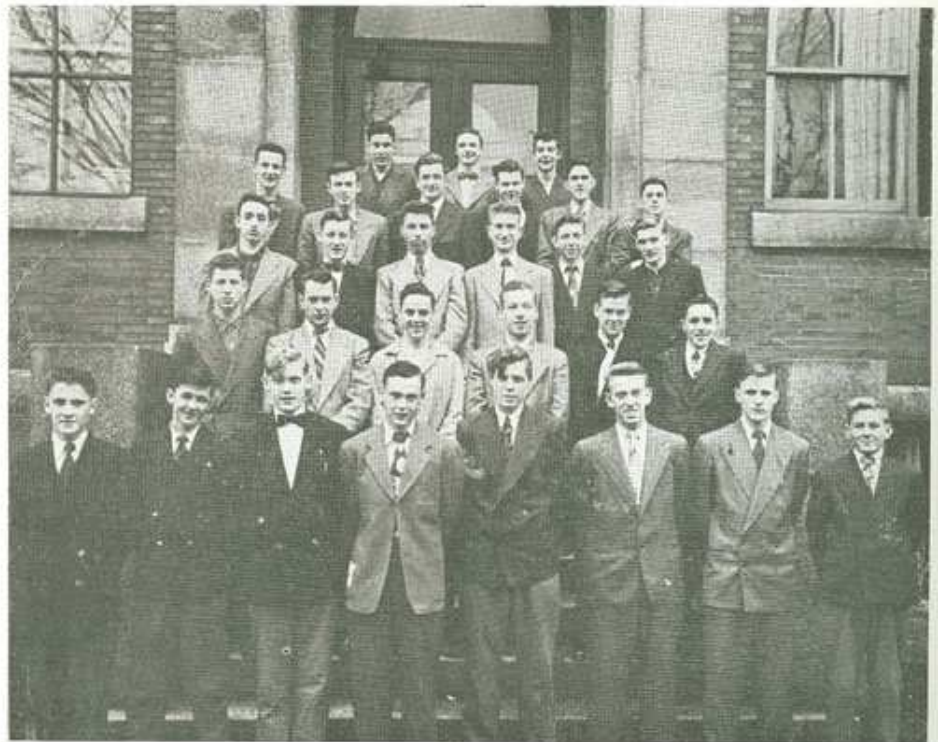

Front Row, L to R: J. Cosgrove, J. Hennigan, T. Vaughan, W. MacDonald, W. Fraser, K. Fitzgerald, J. Burke, E. Fennel.

2nd Row, L. to R: V. MacDonald, R. MacDonald, R. Berube, C. Phillips, J. Goodfellow, G. Rose.

3rd Row, L. to R.: S. Campbell, J. Vaughan, W. Petrie, J. Barrett, P. Parker, R. Dunbar.

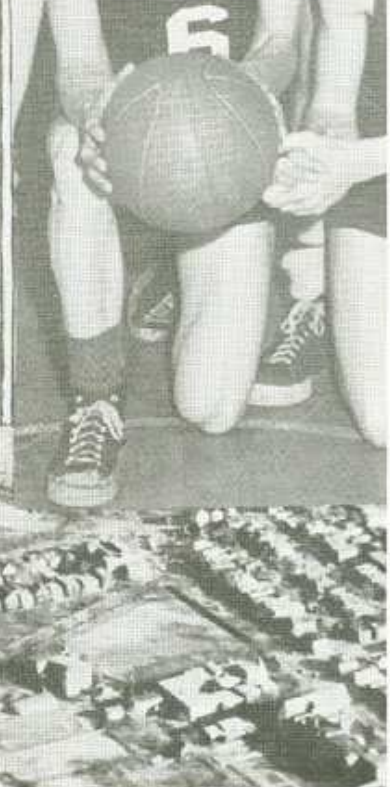

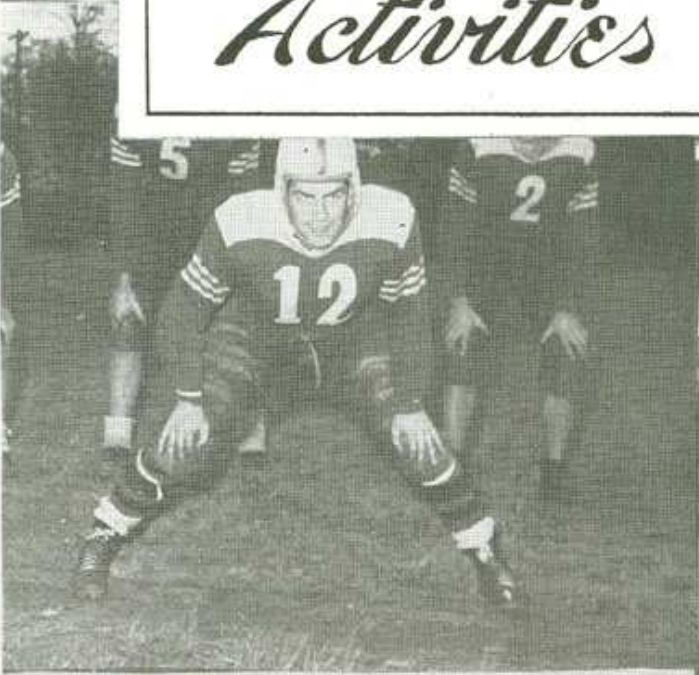

4th Row, L. to R.: R. Falconer, D. Tappin, J. Coleman, R. Gough, W. Richardson, G. Blackburn.

## Seabrook Site at September

### Saint Mary's Announce Structure Will Be Completed on Schedule

Announcement that the new university building at Seabrook will open next September was made last week by Saint Mary's University. College and high school students will move into their classrooms early that month at which time residences will also be established.

### Hard Work Required Says Halifax Lawyer

"A college education requires hard work; show me a successful man and I'll show you a hard working man," said Mr. John A. Walker, Halifax lawyer, addressing Saint Mary's students last Friday in the final Vocation Week talk.

Mr. Walker, K.C., B.A., M.A., LL.B., was introduced by Father Ryan as a "successful, well educated, Catholic business man."

A man who has a college education should get more out of life than just a living, said Mr. Walker. In the future and retirement he receives, the student has a gift to support his family life and to give him pleasure in his declining years, he said.

The announcement brought to a close the movement of various waiting for those who had watched the construction of the building for the past two years, and had expressed a wish that it would not be completed so quickly. However, a recent meeting of contractors, sub-contractors, and suppliers arranged by the construction of the new building came to the decision that it would be finished by September. Present at the meeting held in the McDonald Construction Company office were Rev. E. Brown, S.J., supervisor of construction, Francis Conacher, architect, Edward W. O'Hara and Bernard O'Hara, general contractors.

Progress Discussed  
Progress of the construction work was discussed and a new program of work was introduced, so that the new building will be ready for occupancy by September.

Students who are interested in the building should contact the construction office for the building plan.

The building will be ready for occupancy by September.

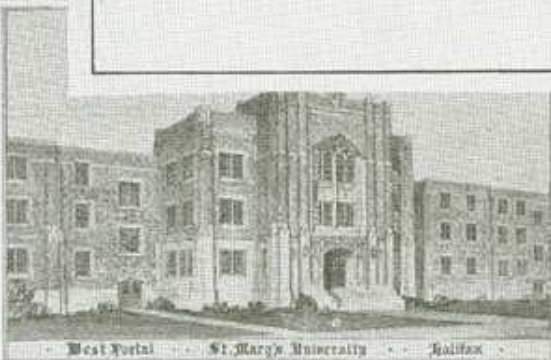

The building will be ready for occupancy by September.

The New Building. Above is an artist's conception of Saint Mary's new University building at Seabrook. According to an announcement made by Saint Mary's, the building is to be completed by next September, at which time residences will begin their construction.

## Capture Radio And Platform Talks Awards

Students, a small group of high school students sang Irish songs in honor of the forthcoming St. Patrick's Day. J. Pettit, R. Moore, Josephette and G. David played their voices in song with J. Clavin on piano.

Others who sang were: Louise Dickey, Duane Hall, Patrick Mather, Eric Threlkoff, William Leary and Tom Kowalski.

The judges were: Rev. E. Brown, S.J., secretary to the Provincial, Pettit (Moderator), L. L. and Major W. C. Bennett. In attendance were Very Rev. F. Lyons, S.J., president of Saint Mary's and Rev. M. J. O'Donnell, S.J., moderator of the debating society. The success of the contest was due in part to the determination and ability of both of Father O'Donnell.

## Engineers To Hold Banquet and Dance

Saint Mary's Engineering Society announced Wednesday that plans are being laid for a banquet and dance to be held at the Saint Nicholas Hotel, Wednesday, April 15.

The committee working on the event, which is headed by Bill Flinn, hopes to have a grand speaker for the banquet. They have not decided who it will be.

Members of the Society who have their dues paid up will be admitted free of charge to the banquet which will begin at seven. Dancing will start at nine o'clock and continue until one. A charge of two dollars is to be charged to those outside the Society.

The committee are awaiting for the tickets.

## Bishop Leverman Opens "Vocation Week" Talks

By RAY WALLER

Bishop Leverman opened his Vocation Week talks at Saint Mary's last night. He spoke to a group of students in the gymnasium. The Bishop's talks are part of a series of talks given by the Bishop during the week.

35,000 units of the Maritimes' newest building materials were used in the construction of the beautiful new building of the University of Saint Mary's.

Thermocrete, a Shaw product, was used in conjunction with backing brick and Partition Tile from our plants to ensure beauty, long life and afford maximum fire protection.

Thermocrete is equally as useful in private homes as it is for institutions of this nature and our free illustrated folder gives all the details. It is available on request.

Congratulations To  
The Graduates of

## Saint Mary's

You who are graduating in 1951 have the honor of being the last class to pass through the portals of the old College Building on Windsor Street. Those who will follow you will take to their new premises with them a fine tradition of scholastic effort and achievement on the part of the students of today and yesterday.

To one and all we offer our heartiest congratulations and very best wishes.

## . . . "SOUND AND SAINT MARY'S" . . .

♦ ♦ ♦

ACOUSTICS, which dates from Pythagoras' study of harmonics in the blacksmith's shop, is the science of sound. Sound is the audition of vibratory motion. This fact was stated more simply by Euclid, the great geometrist, when he said: "If there were complete rest and immobility there would be complete silence." But Euclid did not approach the question of noise elimination as closely as did good old Aristotle. Aristotle (in his *On The Soul*, if you please) wrote: "There are two kinds of sound, one a sound which is operant, the other potential sound. For some things have no sound, as sponge, wool; . . .".

♦ ♦ ♦

The practical Roman Vitruvius (who was promoted from Governor of Britain to City Engineer in Rome) made a study of the acoustics of theatres. He noted that those who sang to the lyre turned towards the folding doors on the stage, to get resonance in harmony with the voice. Vitruvius urged that theatres be built of, or lined with, timber. If timber be not available, he said, let there be placed bronze vessels of different sizes about the theatre, so placed that their echo will be a note in unison with the speaker on the stage.

♦ ♦ ♦

Neither Aristotle's wool nor Vitruvius' vessels can be designated as building materials. For building materials with acoustical properties, we are indebted to JOHNS-MANVILLE who have pioneered in this field for forty years. They have Transite Panels, backed with a sound-absorbing element and faced with asbestos cement, which endure even in such places as chem. labs. They have Fibrestone Units of drilled fibreboard, which are not only superior to Aristotle's wool, but can be painted (and repainted) all the colours of the rainbow. In the magnificent new Saint Mary's University, if the voice of the professor can be heard by the student in the very back of the class, and if the noise from downstairs cannot be heard, it is thanks to:

Sun Life Building — Montreal

*“Congratulations Saint Mary’s*

ON THE NEAR COMPLETION OF YOUR  
FINE. NEW BUILDING AT GORSEBROOK.”

We, at O'Malley's take this occasion—our 61st Anniversary as “The Oldest Independent Bakery in the Maritimes”—to wish you every success when you move into your new educational establishment this September . . .

Bakers Since 1891

**O'MALLEY'S**

**D**URING recent months a new silhouette has appeared on the skyline of this two hundred year old city. Those who are responsible for the conception and execution of this beautiful building may well congratulate themselves.

Behind the execution of such a structure lie myriad details of planning never thought of by a public who see only the new building in its entirety. We like to think that we have had some small part in the solving of such details and we are proud to have been associated with McDonald Construction Co. Ltd. from the beginning. A large percentage of the equipment used has been sold or rented by us and some part of our organization either from the sales, rental or service staff have been in almost daily contact with this job.

Our sincere congratulations to the Archdiocese of Halifax for bringing to this City a new and important seat of learning. To the designers and builders our congratulations for a concept in keeping with the privileges involved and for the translation of that concept into being.

NOVA SCOTIA

# ONE PAGE FROM THE HISTORY OF ASBESTOS!

• • •

Yes! The Greeks had a name for it: **Asbestos!** The great Pliny said that fireproof cloth could be made of this asbestos (—which means unburnable—). Charlemagne took Pliny at his word, and had an asbestos tablecloth made for himself; his guests' eyes would pop when Charlemagne threw the tablecloth into the fire, and then take it out none the worse. The Humanist Aldini went one better and had a whole wardrobe of clothes made of asbestos, and used to entertain his guests by putting his hand or his feet in the fire. Asbestos was first used commercially in Italy in 1871. It was used to make fireproof drop curtains in theatres.

\* \* \* \*

Today, Canada is the home of Asbestos. Nearly 80% of the world's supply of asbestos comes from Quebec Province. It is found in fibrous rocks of the serpentine family. Because asbestos is light, fireproof, durable, damp proof, a non-conductor of electricity and sound-absorbing, its uses have multiplied, and are multiplying, with the years.

\* \* \* \*

Judicious mixing of asbestos with other materials has led to the manufacture of walls, ceilings, floors and furniture that are fireproof, damp proof and acid proof. Boiler pipe packing is almost straight asbestos. The shiny black switchboard is an asbestos composition. Water mains, also, may be made of asbestos, and neither the worm nor rust will consume them.

\* \* \* \*

Asbestos dates from the Classical age; it was used by patrons of the LIBERAL ARTS; it has contributed to the COMMERCE of Canada, through the know-how of ENGINEERS. What material is more fit to grace the halls of a university of learning. The Wilson Brothers are proud to have contributed asbestos products to Saint Mary's University.

BEEBE, QUE.

Everything in Granite from Monuments to Mansions

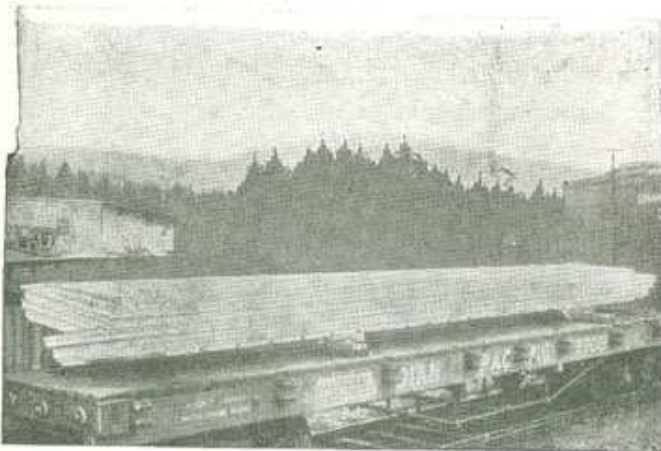

Quarries  
GRANITEVILLE, QUE.

Montreal Court House—showing the imposing Stanstead Granite fluted columns on the broad facade.

Paquet Department Store, Quebec—illustrating the use of polished red granite in combination with Stanstead Grey Granite in modern trend architectural design.

Roof Stone — 36' 0" in length — an indication of Stanstead's ability to quarry and cut stone of any dimension.

Sun Life Head Office Building, Montreal — entire exterior in Stanstead Granite from sidewalk to roof.

◆ ◆ ◆

Stanstead Grey Granite, as produced from the Company's Quarries, has long been recognized by Architects and Contractors as one of the most desirable building stones available for construction work. Numerous fine monumental and commercial buildings in Canada, some of which are illustrated on this page, show examples of beauty, adaptability, permanence and genuine value of Stanstead Grey Granite.

In the construction of the new University of Saint Mary's College, it has been our privilege, in conjunction with Mr. James Coughlan and the McDonald Construction Company Limited, to supply much of the granite trim, such as base course plinth, window sills and lintels, pilaster caps, etc., and at the time of this issue of the Year Book going to press, we are engaged in manufacturing further granite portions required for the completion of the building.

Our congratulations are extended to the Faculty and Students in being provided with such a fine building for their College, and to the Roman Catholic Episcopal Corporation for making this possible.

*“Pure, Fresh Water, Flowing Smoothly Through  
A Well-Laid Plumbing System . . . is the Life  
Blood of Any New Building”*

• • •

Finely equipped, planned for development, Saint Mary's University will shortly open its doors to the groups of young students who will fill the class rooms. In the years to come they will take their places among the leaders in the business and professional world and they will be followed by other students—an unbroken link throughout the decades.

The future of any structure—be it a residence, a factory, an institution or a university—is based on its sanitary equipment, just as a student's future is built on early training and careful direction.

The best materials in the plumbing markets, the most skilled tradesmen and the most expert and efficient supervision have been utilized by us in the servicing of this fine new University.

♦ ♦ ♦

**THE VERY LATEST IN MODERN HEATING  
AND AIR CONDITIONING**

**HAS BEEN INSTALLED**

in

*Saint Mary's University's*

**NEW BUILDING . . .**

**For Example:**

**TORRIDOR HEATERS**, installed in the gym and chapel are "something different" and there are few other buildings in Halifax, if any, that have them. . .

As for the **PNEUMATIC SYSTEM**, it is "The finest thing in heating today." With it, various sections of the building can be controlled at the same time. Operated by air-pressure, each room can be individually controlled. Should one office desire temperature at 65 degrees and the adjoining office favor 75 degrees, both will be satisfied by the same unit. "You simply set the desired temperature on the thermostat and the valves will automatically open or close."

The four newest types of heating used in Saint Mary's University are: **CONVECTOR RADIATION, CAST IRON RADIATORS, FORCE-FLOW HEATING** and Unit **VENTILATORS** — the latter used to bring air in from outside, is actually air-conditioning in itself.

The new Saint Mary's building has excellent oil burning equipment and ventilation with a system of discharge fans throughout the structure.

♦ ♦ ♦

# SCHOOL OF JOURNALISM

This school was established in 1945 in co-operation with the local newspapers, the Halifax Herald, the Halifax Mail, the Halifax Star and the Halifax Chronicle. Its aim is to combine a thorough training in the techniques of newspaper work with a study of the liberal arts so as to produce skilled journalists with a broad cultural background. Professional technical courses are conducted by experienced professional journalists while the academic subjects are taken in the Faculty of Arts. At the successful completion of the three-year course a Diploma in Journalism is awarded.

Students may combine the course in Journalism with that of Arts and obtain both the Diploma in Journalism and the Degree of Bachelor of Arts; the Diploma at the end of three years, the Degree in the following year.

## Diploma in Journalism

### FIRST YEAR

English 1  
French 1  
Journalism 1  
History 2  
History of Science  
Philosophy 1  
Religion 1

### SECOND YEAR

**ROYAL CANADIAN AIR FORCE**

# S. M. U. DIARY (1950-1951)

- Sept. 27*—First day. Rector says Mass in Seminary Chapel. Record of 91 freshmen helps to bulge the seams.
- Sept. 28*—Regular classes begin. New faculty faces change scenery. Sodality looks for busy year under Prefect Chisholm.
- Oct. 2*—Freshmen start to pass out cigarettes. Sophomores take charge of Initiation committee.
- Oct. 3*—Pres. MacKinnon of Arts Faculty promises big year for members.
- Oct. 5*—Freshman night, a warm and colorful reception is held in A.A.A. room for anxious newcomers. C.O.T.C. offers six positions rally held in Assembly Hall.
- Oct. 5*—Jed Meehan gives music for freshman dance at Saint Mary's Boathouse. Lack of talent forces Student Council to call off "Beauty Contest".
- Oct. 12*—Students decide that school has started.
- Oct. 16*—College retreat opens under Father J. McCarthy, S.J.
- Oct. 19*—Journal No. 1 appears. Editor Merzetti passes out 2c cigars. Father Rector lets it be known that the Standards will be praised.
- Oct. 20*—Rumors become reality; freshmen and sophomores to report at nine o'clock each day. College under rigid "cut" system. Rumbles were heard of "Upper Level High School".
- Oct. 27*—Ron Dulhanty and Don Merzetti lose First Journalism-Science debate to Walter Dowd and John MacKinnon. Father Moderator calls it a perfect debate. "Yah, Yah".
- Nov. 1*—Dogma of the Assumption of the Blessed Virgin Mary Proclaimed in Rome. A Holiday celebration held in Saint Mary's Basilica. Father Rector addresses students and friends.
- Nov. 2*—Another holiday, in honor of Mary and a successful retreat.
- Nov. 3*—First Mount-Saint Mary's Social held in Bedford. The "boys" complain about late hours, but Impresario Fitzpatrick calls it a success.
- Nov. 3*—John A. Y. MacDonald, the Deputy Attorney General speaks to Debating Class on the B.N.A. Act.
- Nov. 8*—Mr. H. R. Doane, C.A., gives talk to Commerce students on the Chartered Accountant. Mr. Dennis Inwood of Montreal tells the student body what is necessary for success.
- Nov. 10*—Dulhanty, Riordan, Robertson and Davies chosen to be M. I. D. L. Debaters. S.M.U. to oppose Dal., St. F. X., and St. Dunstons.
- Nov. 12*—Commerce defeated by Engineers, 26-12 in Inter-fac. football. The artillery fails to stop the flying "saucer".
- Nov. 16*—A.A.A. decides semi-final playoff necessary between Arts and Commerce. Pres. MacCormack and Patton MacLean spend holiday in Montreal. They visit C.F.C.C.S. Conference at Loyola. S.M.U. and Mount Saint Vincent to be joint hosts in 1951.
- Nov. 17*—Mount - S.M.U. hold second social at Catholic Center. Some shy faces are noticed. Editors in hot water as November Journal seeps into College. A.A.A. Decision reversed under influence of "Philadelphia lawyers."

## S. M. U. DIARY . . .

- Nov. 18*—Mr. Patton, C.A., R.I.A., of Montreal informs Commencemen about the Industrial Costs Accountant.
- Nov. 20*—The Dean of Students is satisfied with work. Father MacCarthy persuades men that tickets are easy to sell.
- Nov. 22*—Engineers are given dancing lesson by their professor at dance held in Jubilee Boat House. 75 couples make the busiest Society's first event a success. McCormack and MacLean return from "Canada".
- Nov. 24*—Jack Lynch returns to speak on Radio Announcing and Writing. He hears first clap in 16 years. Sodality gets old skates from disillusioned inter-faculty players, for Spanish, Ontario.
- Nov. 26*—Jack "wait until next year" MacKinnon admits defeat as Arts lose football title, 17-12 to engineers.
- Nov. 28*—Dal sees team defeated by sturdy S.M.U. outfit in first Intercollegiate hockey tilt. The only thing the new rink lacked was fog-lights.
- Nov. 30*—Scotch students wear plaid for St. Andrew's Day. Father Stuart promises to wear a kilt in 1951.
- Dec. 1*—Few co-operate as MacIntyre and Merzetti win right to debate against St. Dunstan's in Charlottetown. "Jet Propulsion" comes to S.M.U. as Air Force explains cadet and subsidization schemes.
- Dec. 5*—Mobile Chest X-Ray Machine seeks out college trained T.B. Father Rourke is reluctant to dismiss class.
- Dec. 7*—Mr. M. A. Foley of Fisheries Research Board of Canada opens a series of talks to the senior engineers. Ron Dulhanty and Ted Riordan defeat St. F. X. in the first M.I.D.L. debate. "Resolved that Education Should be Exclusively in the Hands of the Federal Government", is proved to be a poor idea.
- Dec. 8*—Thirty-eight college and high school students accepted into the Sodality on the feast of the Immaculate Conception by His Grace, Archbishop McNally. Mr. Slaunwhite's dramatic masterpiece is banned by the censors. Father Mills' quartet proves that talent exists at S.M.U.
- Dec. 12*—Auditorium crowded with thirty men when the Navy's summer training and subsidization plan is outlined.
- Dec. 14*—"Bring Christ back to Christmas" theme introduced to Sodality by Father Daly. "Is Santa replacing Christ?".
- Dec. 15*—The third Journal appears with brilliant splash of college literature.
- Dec. 18*—Numerous loafers and job-seekers absent themselves from class as Christmas is blown near.
- Dec. 20*—College smoker held at Winnie's Lodge. "The food was good".
- Dec. 21*—Official holidays begin.
- Jan. 9*—All back with the hockey fans babbling about the seasonal interfaculty slaughters and the Valentinos arranging bookings.

## S. M. U. DIARY . . .

- Jan. 11*—S.M.U. again defeats Dal, 4-3. Poor refereeing lets the game turn into a "Pier 9" brawl.
- Jan. 23*—Term examinations catch most unprepared despite two weeks repetitions.
- Feb. 2*—"Junior" Prom held at the Med-O-Club. One of the College's outstanding successes.
- Feb. 3*—Joe Walsh celebrates the end of exams by waltzing down the wedding aisle in Truro.
- Feb. 13*—S.M.U. opens City College Hockey League by defeating Dal, 6-3.
- Feb. 7*—Ash Wednesday finds two sick professors, some ashes and no haircloth.
- Feb. 8*—S.M.U. Grad. Ron Downie, and Bruce Lockwood of Dal., defeat S.M.U. men in: Resolved "That Compulsory Arbitration Should be Used in Labor Disputes". Robinson and Davies present well prepared debate.
- Feb. 14*—MacIntyre and Merzetti drop decision to St. Dunstan's in Charlottetown on resolved "Labor Should Share Directly In Profits And Management Of Industry."
- Feb. 22*—S. M. U. loses to Tech at Dal rink, 3-2. The one man team, Ken Flynn, was absent.
- Feb. 23*—New judging plan issued with success as Jour.-Sci. defeat Arts unanimously in Resolved that "price controls should be adopted". (Ed Note—Yah, Yah".
- Feb. 24*—S. M. U. tie Dal., 3-3 at Dal. rink. The Dal. net jangles with horseshoe, rabbit, paws and lucky charms. Commerce drop Arts 7-3 in semi-final game.
- Feb. 26*—Fr. Rector speaks to student body on lack of initiative. S. M. U. lose to heavy Tech. team, 3-1.
- Feb. 27*—S. M. U. hockey team wins place in finals by defeating Dal 7-5. Inaugural meeting of Philosophical Academy held with J. MacKinnon as Secretary.
- Mar. 1*—S. M. U. bows to Tech 7-4 in first game of city finals. The "flu" bug takes the rap as the fourth Journal makes its beheaded appearance.
- Mar. 4*—"Upon This Rock", a movie on the life of Christ, is shown by Fr. Murphy, S.F.M.
- Mar. 7*—Feast of St. Thomas Aquinas, patron of students.
- Mar. 10*—Arts drop out of hockey picture.
- Mar. 12*—Bishop Leverman opens Vocation week.
- Mar. 14*—Bob Napier and Dave Pigot win Public Speaking awards.
- Mar. 15*—Norman Stanbury speaks on "character" for vocation week.
- Mar. 16*—Mr. John Walker LL.B., stresses the value of Catholic Education and a liberal education. Contractors assure Fr. Brown that the new S. M. U. will be ready for occupancy by September, 1951.
- Mar. 20*—Scholastic matters are made more air tight by Dean of Studies.
- Mar. 21*—Break for Easter.

## S. M. U. DIARY

*Mar. 24*—Commerce win inter-faculty hockey title from Engineers.

*Mar. 27*—Five weeks of exams, hence the books get a beating. Easter dance held at Med-O-Club. President McCormack drowns out Leo Arab's hot piano with Cape Breton vocal talent.

*Mar. 28*—Fr. Costello, S. J., gives humorous talk on the Jesuit Missions in Darjeeling, India.

*Mar. 30*—The "Poll" results are published in the Journal. Ken Flynn, best athlete; John MacKinnon, best liked student; Fr. Rourke, favorite professor.

*Apr. 3*—Casey, McGinn, Flynn, and MacNeil are nominated for Student Council President. Patterson files nomination papers.

*Apr. 11*—Student Council elections held.

*Apr. 15*—The big rush to make the "Collegian" deadline.

*Apr. 16*—Engineers hold Roman banquet and formal at the Lord Nelson Hotel. "Rockefeller" sends cheque to cover bill.

*Apr. 30*—Exams start today and run 'til the ninth.

*May 16*—Baccalaureate sermon and Mass for graduates, tea in afternoon.

*May 17*—Convocation at Nova Scotian Hotel is last fling for the old Saint Mary's.
