Message from the President

Dear Alumnus:

Just a brief note to bring you up to date on the activities of the Alumni Executive.

First, at our November meeting, we agreed to proceed with an Alumni Directory. The Directory will be a hard-cover book listing all members who wish to participate. We hope that it will be as well received by you as similar projects have been by the Alumni of other major Canadian universities.

We have developed a volunteer recognition program which we hope to implement early in 1991 as a thank you to the many people who have assisted the Alumni Office and the University in a significant way.

Finally, Tom McDonell has been working very hard to put together an environmental series. We will host four to five speakers on various topics of interest to those of us who have been thinking "green". I hope we will have a good turnout for the sessions — I'll see you there.

Best wishes to you and your family in 1991.

Karen Oldfield

Bermuda Alumni Host Parents at a Reception

On Tuesday, the 20th of November 1990, the members of the Bermuda Alumni Association held a reception at the Belmont Hotel, Middle Road, Warwick, Bermuda. Aside from members of the alumni, there were a number of parents whose children are currently attending Saint Mary's University. This proved to be a very pleasant get together, and has become part of the Saint Mary's University tradition on the Island. In addition to the alumni and parents, there were also several students present who will begin their studies at the University in January 1991. Greetings and an update on developments at the University were provided by the Registrar, Elizabeth A. Chard, and also Greg Ferguson, director of admissions. Both were on the island not only to participate in this alumni reception, but also to visit a number of the private schools and Bermuda College as part of a group of Atlantic Universities who traditionally are invited to provide information on post secondary education in Atlantic Canada. The alumni branch in Bermuda is under the presidency of Glenn Johnson, who provided an update on the alumni activities for the last several months, and those which were projected for next year. A video showing the University, Halifax, and a few of the Bermudian students currently enrolled at the University was also shown, and a special thanks was extended to Paul Rooney and the staff of the media centre for the preparation of this highlight of the evening. For the first time in several years, the number of international students enrolled at the University has risen, as has the number of Bermudians now standing at fifty-six.

Alumni Directory

The Saint Mary's Alumni Association, through Harris Publishing, will be making available to all alumni an Alumni Directory. The directory will be a listing of alumni alphabetically, geographically, and by year of graduation. Also included will be ten pages devoted to historical and current activities at the University. Staff from Harris Publishing will be contacting alumni by mail and telephone beginning in August of 1991 to gather updated biographical information for inclusion in the Directory which will be released in the Spring of 1992.

Alumni Weekend and Annual Dinner 1990

One of the first women graduates at Saint Mary's, Aileen Carroll (nee O'Leary), BA, chats with fellow classmate Paul Ferguson, BComm, and his wife Camille at the Class of '65 reunion.

Downie receives Distinguished Community Service Award

Ron Downie, Q.C., BA '48 accepts the Alumni Association Distinguished Community Service Award from Alumni Association President Karen Oldfield. This most prominent of alumni awards was presented at the 1990 Association Annual Dinner.

H a p p e n i n g s

Classmates Tom McGlone, and Bill Kearns, BA '65, BEd '67, catch up on the news of the last twenty-five years at a reunion reception for the Class of '65.

— A weekend full of memories

Chairman of the Class of 1965, Pat Curran, BA, BEd '66 gives the Toast to the University at the 1990 Annual Dinner.

The Journal Reunion brought together friends and former Journalites. From left Faith Drinnan, BComm '87; Jude Ronayne, BA '86; and Christine Madill (nee Soucie), BA '85; catch up on news past and present.

Robert Shea, BA '60, and his wife Colleen travelled from Missoula, Montana to visit Saint Mary's and Nova Scotia. They take a moment at the Journal memorabilia room to chat with Alumni Director Tom McDonell.

Bernard Kline, BA '48, BComm '50, reminisces about past days in the student newspaper business as he leafs through old issues of The Journal at the Journal Reunion Memorabilia Room.

Ottawa Alumni hold Christmas Brunch

Ottawa and area Alumni held their Annual Christmas Brunch at the Park Lane Hotel in downtown Ottawa on Sunday, December 9th. Graduates from 1955 through 1990 attended along with Director of Alumni Tom McDonell. Pictured above are, left to right: Branch Vice President Anne Rowe, MA'85; Ottawa Branch President Ted Hoganson, BComm '62; Ted's wife Aline; and Marlene Blakney, BComm '76.

FORE!

Alumni in Halifax, the Annapolis Valley, and Toronto took to the fairways once again this year. Renewing friendships and vying for top honours golfers and non-golfers alike enjoyed themselves at each of the annual events.

Halifax Tournament a Sell-Out

Accommodating 160 alumni golfers the 14th annual version of this popular event was played under brilliant Nova Scotia skies. Major sponsors Colonial Honda, Oland Breweries, Pepsi-Cola Canada, Petro Canada, and Provincial Sanitary Products along with a good compliment of supporting contributors made for a generous prize table. Taking home closest to the pin honors were Robyn Thompson, BComm '82; Bruce Hopkins, BComm '75; Burt Stark, '75; and Mike Curry, '78. Hopkins also captured the longest drive contest while Wally Shaw, BComm '78 won the putting contest.

Third Annual Valley Tournament

Organizer Pamela Rafuse is encouraged by the increasing support of alumni and valley merchants for this relatively new event for Annapolis Valley Alumni. Held in mid-September at the Ken-Wo Golf and Country Club Halifax import Carl Kelly took top spot as low gross champion. He was presented with his first place hardware at the Awards Dinner which followed.

No this isn't the Halifax Tournament! MC Granville Kelly, left, presents brother Carl with the Cornwallis Chev Olds Trophy for low gross at the Third Annual Annapolis Valley Golf Tournament.

Toronto Tournament uses Team Format

Toronto Branch President and Tournament Organizer John Akkerman hosted a very successful third annual Husky Invitational Golf Tournament at the Indian Wells Golf & Country Club in Milton, Ontario. Using a team scramble format made for an interesting and competitive day for alumni golfers and duffers. 🏌️

Alumnus Profile

by Christine Soucie

Jim Bauld, BA '73, BED '74 Engineering Dept., City of Halifax

A clean, healthy environment means a lot to Jim Bauld. Ensuring future generations inherit a pristine environment is a goal of this former Saint Mary's University graduate. He believes everyone — individuals, and all levels of government — have something to offer, and he is playing his role.

When this City of Halifax employee began his civic career about fifteen years ago, he had no idea his tasks during the 80's and 90's would entail developing clean city and recycling programs.

Mr. Bauld graduated from Saint Mary's University in the early 70's with both a Bachelor of Arts and a Bachelor of Education. He had worked with city traffic services during his summer breaks and was offered a permanent position upon graduation; one he couldn't refuse. After eight years with that department, he was promoted to management assistant to the director of engineering and works; a position he currently holds. Writing background studies to the director and city council, and staying abreast of all the city's environmental programs keeps Mr. Bauld busy.

He has been a part of the Clean City campaign which saw many citizens change their attitude about litter and garbage. "Slam Dunk Your Junk" and "Put Garbage in its Place" became well known phrases throughout the 80's. "It was important that an attitude change take place, so part of our campaign was an educational one. We wanted everyone to think about how the

- Chairman of the Board, The Clean Nova Scotia Foundation
- Responsible for City of Halifax Newspaper recycling program
- Responsible for Clean City Program, City of Halifax

city looks as a whole and take pride in their property," said Mr. Bauld. Curbside newspaper recycling, and leaf composting are existing city programs Mr. Bauld is proud of. Each week, about 30 tons of newspaper are picked up, and compost created from the autumn pick-up of dead leaves fertilizes city parks and gardens.

And just a few weeks ago, Halifax announced its Christmas tree pick-up program. The trees will not be dumped into a landfill this year, said Mr. Bauld. Instead, they are taken to a Cowie Hill site where they are chipped. The chips are then sold to a central Nova Scotia school board to be burned in one of its' schools furnaces. Mulch from the chipping operation is also used in city parks on pathways. A more comprehensive recycling program is being looked at by Halifax in conjunction with three other metro municipalities. That could be in effect in the next couple years.

Representing Halifax on the Clean Nova Scotia Foundation board is another hat Mr. Bauld wears. He is board chairman this year and does not take this responsibility lightly. "In its short existence (three years since incorporation) the Foundation has been very successful educating the public and acting as a facilitator for many programs in the province," said Mr. Bauld. The board is made up of a cross-section of volunteers from governments, industry, and volunteer groups. They have overseen and helped other groups organize beach sweeps and recycling programs. And they are fulfilling their education mandate with a kids "Trash Buster" comic book, and a teachers' manual. "The Foundation is a good avenue for people to get together from different walks of life and sectors to assist in the preservation of the environment," said Mr. Bauld. ♻️

Alumni and friends welcome

Geography students keen on green

On Sunday, October 14, nine Geography students slogged through the rain and muck on a small plot of Crown land near Middle Musquodoboit on the Eastern Shore. The students, all members of the Saint Mary's University Geography Society, were there to do their bit for the environment. They were going to plant 2,000 Norway Spruce seedlings, donated to them by the Department of Lands and Forests.

Society member Derek Fenton initiated the reforestation project. "In Geography, we take a lot of courses related to the environment," he explains. "This was a way for us to take action on behalf of the environment, instead of just studying it." Because of the torrential rains, the students only planted 1,400 seedlings, but it was a good start. "We (the Geography Society) hope to make this an annual event, and put a plaque out there so we can identify the trees we planted," says Derek, adding that, "monitoring the growth of these trees could become an honors thesis in three or four years."

According to Geography Society President Darren Chamberlain, the Society is moving to get more and more involved in environmental issues on campus. For instance, they have been recycling in their office for quite some time. At the moment, Derek is working with Shawn Richardson, another Society member, to raise \$200 to buy eight acres of rain forest through the World Wildlife Funds's 'Guardian of the Amazon' project. They will be selling 50/50 or some other type of lottery ticket after Christmas. "We may try to initiate a competition among the various societies to see who can raise the most money to buy the most rainforest," Darren says.

The Saint Mary's University Geography Society, which has 40 members, has been active on campus for about 20 years. ♻️

New Executive MBA Program Launched

The Fall semester at Saint Mary's this year saw the launching of a new program in the Commerce Faculty. The Executive Master of Business Administration Program started in early September, after many years of planning and development.

The EMBA is a two year program for executive and senior managers with a proven track record and who feel that they need to add to their practical experience the theoretical background necessary for top management positions.

Twenty-four students are enrolled in the program and they meet every second Friday/Saturday for eighteen hours of lectures, case analyses, group discussions, and examinations. The program is located at the World Trade and Convention Centre in downtown Halifax.

Instructors for the EMBA are mainly from the Commerce Faculty at Saint Mary's, but a few are from other institutions as far away as Montreal and Ottawa.

The program was originally scheduled to be offered every second year, however, the positive response to date has prompted a closer study into offering the program every year. 🍀

Irish Studies Campaign Chair to be Roasted

Denis Ryan, campaign chair for the D'Arcy McGee Chair in Irish Studies.

The Arthritis Society Celebrity Roast will be held on Saturday, April 6, 1991 in the Nova Scotia Ballroom of the Halifax Sheraton. The guest of honour this year will be the Campaign Chairman for the University's D'Arcy McGee chair of Irish Studies, Mr. Denis Ryan. A well known entertainer with the popular group Ryan's Fancy, Mr. Ryan is currently the senior vice president of BGH Central Investment Management. Denis will be roasted by some notorious colleagues from the entertainment and financial communities. For more information on the Celebrity Roast contact the Arthritis Society at (902) 429-7025.

The Year in Brief

During 1990 Saint Mary's University...

- signed an agreement with Hokkaido University of Education in Hokodate, Japan which will provide for an exchange of professors and students between the two universities.
- faculty of Science set up cooperative education programs in Geology, Chemistry, and Computing Science thus allowing students the opportunity to combine their academic studies with hands-on work experience.
- raised it's minimum requirement for admissions from 60 to 65 percent.
- Dean of Commerce, Dr. Colin Dodds, travelled to the Soviet Union as part of a delegation that accompanied Prime Minister Brian Mulrooney. The central focus of the visit was the inaugural meeting of the Canada/USSR Business Council.
- D'Arcy McGee, Chair of Irish Studies acquired a fine art facsimile of one of the greatest treasures of the Dark Ages — The Book of Kells. The Book of Kells is the finest surviving example of the illuminated manuscripts of the Dark Ages, and the pinnacle of Celtic artistic and literary achievement.
- presented Honorary Degrees to Claudette MacKay-Lassonde, the first president of the Association of Professional Engineers of Ontario; Ronald J. Downie, Q.C., an alumnus of Saint Mary's University and a senior partner in the law firm Cox, Downie & Goodfellow; Joe Neil MacNeil, internationally recognized Nova Scotia story teller, and Bay St. power broker, Hungarian born Andrew Sarlos.
- through the Atlantic Centre of Support for Disabled Students, received \$100,000 from the Secretary of State for the development of a Chair of Studies of Disabilities.
- Psychology Professor Dr. John Chadwick-Jones was named the winner of the President's Award for Research Excellence. The award, presented at Convocation, recognizes outstanding research conducted by a full-time faculty member.
- English Professor Dr. Andrew Seaman was named the winner of the Fr. William A. Stewart, S.J., Medal for Teaching. The alumni award recognizes outstanding teaching ability.
- Basketball Coach Ross Quackenbush was named AUSA Basketball Coach of the Year.
- appointed Susan Shaw as the Pay Equity Coordinator. The steering committee that will oversee the process of establishing pay equity met for the first time on October 23, 1990.
- President Dr. Ken Ozmon accepted a third term of office as President. He will serve another six years beginning July 1, 1991.
- launched the Executive MBA Program. The program which is the fourth of its kind in Canada, will give senior and middle managers an opportunity to hone their managerial skills. Twenty-six students signed up for the first course which will last two years and involve study on Fridays and Saturdays every other week.
- introduced, after an absence of 20 years, Fall Convocation ceremonies. Receiving Honorary Degrees were Paule Leduc, president of the Social Sciences and Humanities Research Council of Canada; Pearleen Oliver, a distinguished member of the black community of Nova Scotia; and businessman and Newfoundland native Craig Dobbins.
- initiated its first paper recycling program in conjunction with community week. The program will see blue barrels, boxes and bins placed in buildings which contain academic and administrative offices.
- Huskies defeated the University of Western Ontario Mustangs to win their second Atlantic Bowl in four years. The next weekend in the National Final the Huskies lost a close battle, 24-21, to the University of Saskatchewan.
- Chancellor and Archbishop of the Diocese of Halifax, the Most Reverend James M. Hayes retired following twenty-five years of service to the University and the Halifax Diocese.

Environmental Research at Saint Mary's

by Anne West

Water Pollution

Dr. W.A. Bridgeo (Chemistry)

Dr. Bridgeo has a long term interest in water pollution and has been engaged in consultation on water and air pollution projects since 1953. He has produced a number of papers related to water pollution and ocean disposal of wastes.

One of his current research projects is on ceramic glazes, while at the same time he keeps an eye on related chemicals which might have uses ranging from medicine to superconductors. He is doing specialized studies on calcium, strontium and barium, all of which are natural resources found in Nova Scotia. All his research, on both the laboratory bench and pilot plant scale, are carried out in an environmentally friendly way. Although he is primarily a chemist, his use of bio-technology has led him to work on the development of a method of monitoring biological species in water. This could be applied to water supplies, sewage treatment and other processes.

Dr. Bridgeo's philosophy of research in recent years has been to avoid dependence on government funding as much as possible by working as a private company. He is interested in talking to scientists and others who believe that this is an appropriate way to undertake research.

Valuable products derived from wasted shrimp shells

Dr. Clive Elson and Dr. Don Davies (Chemistry)

Dr. Elson and Dr. Davies are involved in producing the high value polymer chitin from the wasted shells of shrimps, lobsters and other crustaceans. At present these are disposed of by dumping at sea or in landfills, both of which are expensive and damaging to the environment.

The two chemists, with Dr. Ernie Hayes of Acadia University, have developed a water soluble derivative of chitin which could have many uses. It has been tested by Agriculture Canada as a preservative coating for fruits and vegetables, and is also being evaluated for use in cosmetic and pharmaceutical products.

Almost everything we do impacts upon our fragile environment. This realization is changing the way we think and behave and nowhere more so than in the field of scientific research. Many faculty members at Saint Mary's are already engaged in research which is related to environmental concerns and the formation of a Centre for Environmental Science will form a focus for this research. Listed below is some of the research currently being carried out.

Dr. Elson is also interested in developing new methods of analyzing pollutants in marine sediments. In this research he is collaborating with Dr. Greig Sim of the National Research Council of Canada's laboratory in Halifax. If successful, this research could overcome a problem chemists have had in distinguishing between compounds which have similar chemical composition, but different chemical properties, including toxicity.

Life in acid-stressed rivers

Dr. David Cone (Biology)

Dr. Cone is enthusiastic about the proposed Environmental Science Centre and believes that a number of courses offered by the Biology Department would be appropriate for the proposed undergraduate degree in environmental science. These would include ecology, biostatistics, microbiology, the biology of fishes, the theory of ecosystems and a recently introduced field course.

Dr. Cone's own current NSERC funded research involves the study of parasites of eels in acid-stressed rivers, and he believes that his own research would benefit from the introduction of the centre.

Alternative energy sources

Dr. Larry Hughes (Mathematics and Computing Science)

Dr. Hughes is deeply involved in environmental studies as a sideline to his computing science teaching and research. He has

done research on the application of alternative energy strategies for the Atlantic Provinces and recently gave a paper in Hawaii on the possibility of using hydrogen as a fuel source in the area. Dr. Hughes also gave a paper in Florida recently on Canada's contribution to the greenhouse effect. He presented a paper on an energy efficient public transportation system to replace use of private automobiles by commuters to the Halifax Traffic Task Force and is currently studying the possibility of using wind power in Nova Scotia.

In addition, Dr. Hughes is working with ECOS, the Environmentally Concerned Students society.

Coastline protection

Dr. Douglas Day (Geography)

Dr. Day's research and teaching interests include environmental issues related to ocean and coastal regions. One aspect of his research is the effect of the development of tourism on coastal and marine environments in tropical areas of the world. He is engaged in a study that will help governments in the Caribbean, South Pacific and Indian oceans obtain the kind of environmental information needed to pinpoint the effects of large scale tourism on the coastal environment in tropical regions. This information will help these countries care for the resource on which coastal tourism depends.

Environmental management

Dr. Norman Jones (Geography)

Dr. Jones has expressed an interest in contributing to the Environmental Science Centre in two general areas; environmental management and glacial geomorphology. His research focuses on glaciers, including the analysis of glacial deposits, landforms, movement and chronology. Most of his publications deal with mapping, describing and explaining landscapes of glacial origin, both in today's glaciers and in those of earlier geological times. He has an interest in the relationship between the receding of glaciers and climatic change and has recently expanded his research into the field of environmental management.

Heavy metal pollution

Dr. Jaroslav Dostal (Geology)

Dr. Dostal has expressed an interest in becoming part of the Environmental Science Program. He is considering doing research on heavy metal pollution in the environment which he believes would be very appropriate to the mandate of the Centre and which would stem naturally from his geological research. Dr. Dostal came to Saint Mary's in 1975 as an Assistant Professor, was promoted to Associate Professor in 1980 and to Full Professor in 1987.

Coastal and ocean management

Dr. Peter Ricketts (Geography)

Dr. Ricketts, who holds a teaching position in the Geography Department while also acting as Saint Mary's first research officer, is a physical geographer whose research interests focus on coastal and marine environments. His particular interests include coastal erosion processes, coastal management and the application of Geographic Information Systems in environmental management. Dr. Ricketts has just completed a major research contract with Environment Canada to establish an environmental information and mapping system for the Gulf of Maine and has recently been appointed to the Board of the Nova Scotia Environmental Trust Fund.

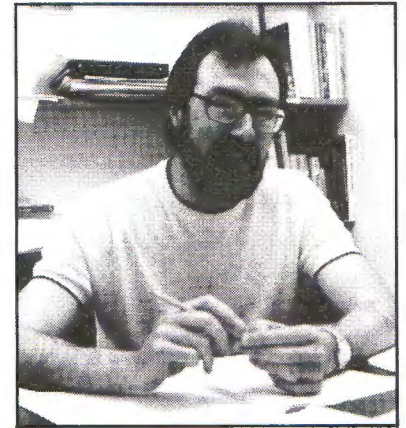

Air pollution

Dr. William Jones (Dean of Science)

Dr. Jones came to Saint Mary's as Dean of Science in 1989. One of his many research interests is in air pollution. He and his research partners have made two studies of gaseous emissions from coal fired power generating stations for Energy, Mines and Resources. These gases may cause damage to the ozone layer, as well as adding to global warming.

Landscape management

Dr. Hugh Millward (Geography)

Dr. Millward's primary expertise is in human geography, but he has experience in resource related planning and management, particularly in connection with agriculture, forestry and mining. He is interested in the way in which people and the environment relate in Nova Scotia, with emphasis on forestry management and landscape evaluation.

Dr. Millward has published work on the impact of coal mining on the landscape, much of it related to Nova Scotia's Sydney coalfield. He is working on a study of public

ON THE NOTION THAT A BIG BUSINESS IS SIMPLY A SMALL BUSINESS THAT SUCCEEDED, WE'D LIKE TO HELP YOU AT THE VERY BEGINNING.

Your Peat Marwick Thorne advisor will help you with cash management, raising financing, and business planning. And that's only the beginning.

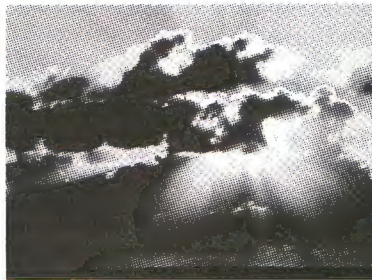

At Peat Marwick Thorne, we know what makes companies grow — and we can put this knowledge to work for your business.

We can help you determine your financing needs, and the mix of debt and equity that is best for your situation.

We can help you present the best possible case for your company to potential lenders.

We can streamline your operation by proposing more efficient cost and budgeting systems.

We can show you how to minimize your corporate and personal taxes.

By preparing your business plan and forecast, we can chart a safe course for future expansion.

We can even help you benefit from the latest computer technology.

We believe in building a long-term relationship with each of our clients.

That's why we'll assign you a Peat Marwick Thorne business advisor, someone who will make sure that your individual needs and concerns receive the attention they deserve.

Through your advisor, you can tap into our extensive network of specialized resources across the country.

*For information on how we can assist you, call:
in Halifax: (902) 492-6000
in Dartmouth: (902) 463-3110*

KPMG Peat Marwick Thorne
Chartered Accountants

Suite 1600, Purdy's Wharf Tower I, 1959 Upper Water Street, Halifax, NS B3J 3N2
Suite 330, Belmont House, 33 Alderney Drive, Dartmouth, NS B2Y 3Y5

accessibility to the countryside, which includes a study of incompatibility between recreational, exploitative and natural uses of land.

Energy conservation

Dr. John O'C. Young (Chemistry and Vice-President, Academic and Research)

Dr. Young is part of an international research project relating to energy conservation in the field of district heating and cooling. This technology involves producing heat and cold at one central point and pumping it to where it is needed through pipelines as hot or cold water. One example of such a scheme would be the use of waste heat from electric power production to heat or cool a network of buildings.

Dr. Young has support from federal and international energy agencies to develop additives which modify the flow properties of the water in these systems. He is developing chemicals which reduce the friction between it and the pipeline walls, thus reducing the cost of pumping, and permitting greater flows through the pipelines. These chemical additives are quaternary ammonium salts which inhibit the formation of energy consuming turbulence in the water.

Nuclear waste storage

Dr. Victor Owen (Geology)

Dr. Owen's interest in environmental science centres on the potential storage of nuclear waste materials underground in various geological formations. Dr. Owen came to Saint Mary's in 1987 as an Assistant Professor of Geology.

Natural insecticides

Dr. Doug Strongman (Biology)

Dr. Strongman is involved in research on microbial insecticides as opposed to chemical controls. He has recently been invited to present a paper at a conference entitled "The Forest Industry and Environmental Quality." Dr. Strongman is attempting to isolate and identify fungi and bacteria that kill insects or produce biochemical compounds that can be used as an alternative to synthetic compounds. Dr. Strongman's work is at the discovery and survey level. His work has two important aspects: to gather data on the effects of fungi in insect populations at present and to seek fungi that may be considered for development as new insect control agents in the future.

Geochemical analysis of environmental problems

Dr. Georgia Pe-Piper (Geology)

Dr. Pe-Piper is a geochemist with broad experience. She hopes to contribute to the Centre as part of a team working on such issues as the weathering of mine tailings, inorganic contaminants in harbours, and problems requiring geochemical analysis techniques. She believes her general geological knowledge will enable her to contribute to other projects with a geological component.

Dr. Pe-Piper believes that much of the work of the Geology Department is indirectly relevant to the environment. She says its mapping work and geochemical studies provide background information for industrial and engineering development. Other studies in the department focus on changes in environments through geological time, as they are recorded in the sedimentary strata of Nova Scotia. She also explains that the course content of the Department has been modified in recent years to emphasize the geological background of environmental problems.

Recyclable Refuse...

Let's try to sort things out.

Environmental Science Centre at Saint Mary's

by Anne West

Scientists at Saint Mary's are doing their bit to save the planet. Dean of Science, Dr. Bill Jones has brought together scientists in a number of disciplines into the Atlantic Canada Centre for Energy and Environmental Science.

Dean Jones says, "I think Saint Mary's needs such a centre because there are a number of people who are individually doing research related to the environment. By creating a centre, we gain a focal point through which we can relate to each other much better, and support each other in environmental research."

The formation of this centre will also provide new opportunities for undergraduate science students. Dr. Jones says, "A number of departments already offer courses related to environmental studies. The centre will provide an opportunity for students to put together a multi-disciplinary program related to the environment." In addition, the creation of the centre will make it possible for more students to become involved in research projects being undertaken by Saint Mary's scientists. At present the departments of Geography, Biology, Geology and Chemistry all offer courses which can be classified as environmental studies and many of the professors who teach these courses are actively engaged in environmental research.

Dean Jones explains that "The protection of the environment is not simply energy conservation or recycling, although such measures are crucial. It must also involve understanding scientific principles and applying them to the management of environmental change and, eventually, the re-establishment of a natural environmental balance." As an example, he says, "You look at how rivers change over a period of time as a result of effluent going into them. Once the effluent is checked, you study how well the river recovers and what we can do to help it recover." He adds, "You also look at the effluent and try to help the producer clean it up before it is discharged into the river."

In creating this new centre, Saint Mary's is becoming part of a global trend. Dr. Jones believes that realization of what the human race is doing to the planet means, "The environment is becoming a more and more important area for research and academic study, particularly in light of the federal government's recently announced Green Plan." ☪

Student spreads "green" word

by Anne West

Thea Wilson-Hammond has seen for herself what happens to the environment when mass consumption gets out of control. The second year arts student says, "My awareness is the result of travelling in Europe and seeing what a greater population in a smaller area has faced." Thea lived for four months in Germany one winter and says, "They have pretty tight regulations as far as emissions are concerned, and a very

good public transit system, but I was shocked at how littered and dirty the towns were. Despite this, she found that Europe is, of necessity, far ahead of North America in recycling, and says, "When you have such a large population, the landfills are going to fill up a lot quicker than ours." She was really impressed by Holland, "The Dutch do not have any land to fill, so they had to figure out an answer. They recycle everything. People collect metals, and pick up old wood and paint cans," she says.

Thea, however, is no born-again environmentalist. Concern for the world was bred into her and reinforced at an early age, ready

to be refined by her own travels and education. Her father came to Canada from England when he was in his twenties and, says Thea, "has been trying to get away from it all ever since." She was born in Toronto, but when she was two the family moved to Clam Harbour, Nova Scotia. "We bought an old hotel with twenty-two rooms and 200 acres of land," she says, "and my father got a fishing boat." The family mythology is full of tales of how her two older brothers had to get up at 5 a.m. to milk the cows. The children have vivid memories of early morning chores. "We did organic farming and composting and my mother re-uses everything. She has piles of things she doesn't want to throw away," says Thea.

After attending Eastern Shore High School, where she confesses she never really worked, Thea came to Saint Mary's from grade 11 in 1986 and enrolled in first year Arts. After a first year which included a lot of switching courses, Thea realized that she was not ready for University, "I did not have any idea what I wanted to study," she says. She also had itchy feet, another inheritance from her father, who passed on to his children tales of his own hitch-hiking adventures in Europe. In 1987 she bought a one-year plane ticket and went to Europe in search of adventure, and to look up the 69 English relatives she had never met. She visited, hitch-hiked, worked a bit and did the things students do in Europe until, "In

October 1987, I went to Ireland for a week and fell so totally in love with the country that I got a job." The job was conducting horse riding tours through the mountains. She became so attached to the people and the countryside that she has worked there every summer since and plans to continue in 1991.

Like all migratory students, Thea came home that first September, but says, "I was not quite ready to go back to school." After Christmas she set off again, and her travels included working in Germany for a family she met on one of her horse tours. She taught the children English and in return, her friends taught her the art of dressage riding and training horses.

"My awareness [of the environment] is the result of travelling in Europe and seeing what a greater population in a smaller area has faced."

Thea came home for Christmas once more in 1989 and the following February decided to dip her toe in the waters of education again. She returned to Saint Mary's and signed up for three credits, one of which was Dr. Stiegman's "Religion and Ecology" course, which proved to be a turning point in her life. "I will never forget it," she says. "He had been in contact with Pugwash (an orga-

nization which is concerned with ethical aspects of science) and had asked for volunteers to get a branch started on campus." Living at home and travelling to classes, Thea wasn't looking for a new challenge at this point. She and two friends discussed the idea, "against my better judgement," she says, and came to the conclusion that they were more interested in starting a society concerned with ecological problems than one based on ethical issues like Pugwash.

From there the group seemed to snowball, reflecting a real concern about environmental matters among students on campus. It met several times and held one public meeting. At that meeting Lois Corbett of the Ecology Action Centre spoke to some 30 students about garbage and sustainable development. "We were so surprised by the numbers," says Thea.

By September 1990, as is the way with student societies, some of the major players had moved on but Thea and Colin Henkelman (Computing Science and Administration) became co-chairpersons of a group they named the Environmentally Concerned Students Society, with the acronym ECOSS. This is an apt title since the Greek word *ecos* which is the root of both ecology and economy, means good housekeeping, literally "to keep the hearth well."

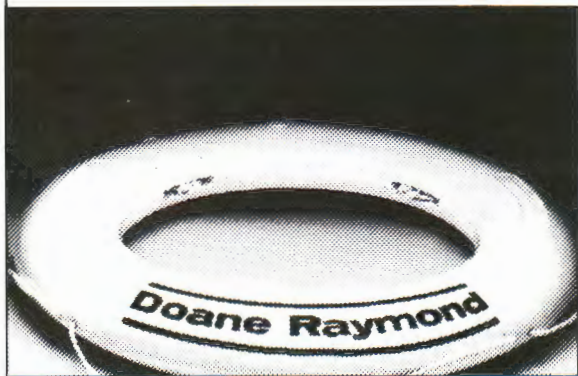

The fall 1990 semester was a busy one for ECOSS. The group held strategy meetings, screened environmental films, and hosted speakers like Dr. Larry Hughes (Mathematics and Computing Science) who spoke to them about Canada's contribution to the greenhouse effect. "He really explained what greenhouse gases are," says Thea.

"We did organic farming and composting and my mother re-uses everything. She has piles of things she doesn't want to throw away. . ."

The group also talked to students with similar concerns from Dalhousie and King's. Thea hopes to travel with this group to a January conference aimed at setting up a national student network on environmental concerns. The final event for 1990 was a special fund-raising party. "We decided we could only have a pot luck, non-alcoholic party because we did not want to spend money on ourselves," says Thea. Despite exams and other problems, this party raised \$200 to plant new trees on campus.

Thea is now taking five honors courses, majoring in Religious Studies, with minors in creative writing and Irish. This program leaves her little time, and co-chair Chris Henkelman is away on a work term for the remainder of the academic year. Despite all this, Thea believes there is a real need for ECOSS and hopes to continue its educational work and raise further funds for trees. She'd really like to see the trees planted before she leaves for Ireland again. ☺

Saint Mary's launches paper recycling program

by Melanie Jollymore

Saint Mary's hopes to save at least 1,000 trees over the next year. The University, which goes through approximately 10 million sheets of paper each year, launched a paper recycling program in October to reduce both its waste and the number of trees felled to supply its paper needs.

Senate task force appointed

The program is the result of six months of work by a Senate task force appointed by Dr. Kenneth Ozmon to investigate ways the University could help the environment. Members of the task force, led by Research Officer Dr. Peter Ricketts, represent a cross-section of the University community: Michael Shook, International Briefing Centre; Dr. Norman Jones, Geography; Sandra Hamm, Library; Peter Weal, Printing Services; Louis Dursi, Physical Plant; Melanie Jollymore, Public Affairs, and Colin Mac-Millan, student. As paper represents nearly 60 percent of the garbage currently disposed of in commercial dumpsters, the task force's No. 1 priority was to set up a paper recycling program.

Tree-planting kicks off program

The task force kicked off the program with a tree-planting ceremony at the beginning of Community Week — a demonstration to the community of the University's interest in the environment. Dr. Ozmon, Dr. Ricketts and Thea Wilson-Hammond, co-president of ECOSS (Environmentally Concerned Students Society), planted the tree, a maple donated by Edmonds Landscape Services. The ceremony was followed by a mass collection of paper, stockpiled by faculty, staff and students for the occasion, and picked up by Hanna Paper Recycling Ltd. of Dartmouth.

"It will be very easy for people in the university community to participate in the program," Dr. Ricketts said at the launch, "because, unlike many companies, Hanna requires only that the paper be separated into two categories: newspaper and corrugated cardboard in one bunch, and everything else in the other, with the exception of a few unacceptable items like fax paper and manila envelopes. They even take glossy and coloured paper — staples, metal coil and all!"

Good Times. Call for the Captain.

Executive Elections

Nominations for Alumni Executive (Two year term commencing May 1991)

**Stan Dalrymple,
BComm '84**

A Chartered Accountant with the Halifax firm of Peat Marwick Thorne, Stan is an avid supporter of Saint Mary's University. For the past two years Stan has served on the Alumni Association's Annual Dinner Committee. Stan enjoys all sports in his spare time, in particular hockey, golf, and softball.

**Krista Harris,
BComm '87**

The Director of Business Affairs at Andrew Cochrane Associates Limited, Krista also teaches accounting part-time at Saint Mary's. Her volunteer activities include committee work for the Alumni Association's Casino Night and Annual Dinner. Krista has agreed to co-chair the Alumni Association 1991 Annual Dinner. She is a member of the Advisory Board to the Accounting Department at Saint Mary's, the Special Olympics Summer Games Committee, and treasurer for the Alexandra Childrens Centre. In her spare time Krista enjoys curling at the Halifax Curling Club and travelling.

**Bill Maden,
BComm '73**

Bill is the owner/operator of Maden Insurance Corporation and well known sports broadcaster with Cable TV in Halifax. He is the host and producer of the Bill Maden Show and the play by play broadcaster for Huskies football and basketball games. At various times Bill has also provided commentary on boxing, volleyball, and lacrosse.

**Mark J. Surette,
MBA '80**

The President of Robertson-Surette Limited, Mark received his BComm from Dalhousie before moving to Saint Mary's to complete his MBA. As a member of the Halifax Club Mark holds positions on the Membership Committee and the Committee of Management. Previous volunteer activities include serving on and chairing various committees with the Royal Nova Scotia Yacht Squadron, the Halifax Board of Trade, the United Way, and the Cancer Society. In his spare time Mark enjoys sailing, skiing, and attending Saint Mary's University football games.

Nominations for Alumni Representatives on the University Board of Governors (Three year term commencing Sept. 1991)

**Robert G. Belliveau, Q.C.,
BA '67**

A Senior Partner in the Halifax law firm, McInnes Cooper & Robertson, Bob graduated with a LLB from Dalhousie in 1970, and a LLM from University College of the University of London, England 1971. He presently serves on the Board of Governors, Saint Mary's, is chairman of the Investment Committee and is a member of the Executive, Advisory, Audit, and Finance Committees. Bob also serves on the President's Advisory Committee on Athletics and Recreation. Outside the University, he is active in volunteer and committee work in various organizations with memberships in the Nova Scotia Barristers' Society, Canadian Bar Association and Association of Trial Lawyers of America, to name just a few. Married, with three children Bob enjoys sailboat racing, family skiing and collecting antique toy trains.

**John E. Garroway,
BComm '73**

A Vice President with the firm Colash Holdings Inc., John is currently an elected member of the Alumni Association Executive where he has served on a number of committees. In a relationship with Saint Mary's that began over 20 years ago John has served three years on student council,

was business manager for the Journal and was on the Dean of Commerce Selection Committee. Apart from volunteer work with Saint Mary's, John is the Chairman of the 15th Dartmouth Boy Scout Group Committee. John spends his spare time with his family, boating, and playing hockey.

**Paul G. Goodman,
BComm '69**

A partner in the Halifax office of Peat Marwick Thorne, Chartered Accountants, Paul is the partner in charge of the Insolvency

Group. Paul is past member of the Saint Mary's Alumni Association Executive and has served as an alumni representative to the Board of Governors. In this capacity, he chaired the University's Investment Committee from 1988 to 1990 and was also a member of the Finance and Executive Committees. He has served the University as a volunteer on the Regional Corporations Committee during the last Capital Campaign and is an active member of the Executive of the Varsity Hockey Club. In addition to his university commitments, Paul is a past president, treasurer, zone governor and director of the Canadian Progress Club, chairman of finance of the Nova Scotia Special Olympics — Summer Games and a member of the Advisory Committee of the Learning Disabilities Association of Nova Scotia. He is the immediate past president of the Institute of Chartered Accountants of Nova Scotia where he has served on Council and various executive positions. He has been a member of the Governing Council of the Canadian Insolvency Association and its Executive, and he is presently the Association's representative on the Council of INSOL International. In his spare time, Paul enjoys curling, boating, skiing and travel as well as his activities with the Halifax minor hockey system.

Saint Mary's Alumni Insurance Plan

This voluntary plan enables you to purchase
TERM LIFE INSURANCE
AND/OR
ACCIDENTAL DEATH AND DISMEMBERMENT
INSURANCE
with the following special benefits:

INEXPENSIVE

Through the Group approach, marketing and administration costs are greatly reduced, so you save by buying at low group rates!

ELIGIBILITY

You and your spouse are both eligible for these special coverages, if you are under age 65.

EASY PAYMENT

The costs of these coverages is very low and you may pay your premiums through the convenience of monthly automatic bank deduction (with no interest or service charges).

COMPLETELY PORTABLE

Your insurance moves with you if you change employers.

The Alumni Insurance Plan is administered by Johnson Insurance Limited. To receive further information on either of these Alumni benefits, please contact the Plan Administration Centre in Halifax at 453-9501 (Toll-free within Nova Scotia).

Blue boxes, bins and barrels

Following the launch, Physical Plant distributed desktop boxes and blue bins to all academic and administrative departments, so everyone could get involved in the program. They put larger barrels in photocopy rooms, computer labs, and other strategic points on campus, which serve as central collection sites for Hanna. Except for an initial refundable deposit on the bins and barrels, and the purchase of the desktop boxes, collection is free. An added bonus: the University saves money on haulage fees for its garbage.

So far, the program seems to be a success, says Dr. Ricketts. "People are putting their paper in the barrels, and its getting picked up. We do, however, need to do a more in-depth assessment into how well it is going in each department, to pinpoint any particular problems and make the necessary adjustments."

Only the beginning

"Paper recycling is just a starting point," emphasizes Dr. Ricketts. "The task force must now turn its attention to other issues, like promoting the importance of reducing and reusing. We would like to publish proper

Dr. Norman Jones, a member of the Recycling Task Force, helps kick off the program by dumping boxes of paper, stockpiled by faculty and staff for several months, into a recycling bin.

HALIFAX SHOPPING CENTRE 454-8654

guidelines on how to reduce paper use early in 1991, and we plan to assess the requirements for recycling aluminum and glass on a large scale."

Another project the task force will look at in 1991 is composting, says Ricketts. "I have met with John Edmonds, president of Edmonds Landscape Services, to talk about composting leaves and grass clippings, which currently end up in the landfill. His company, which looks after the Saint Mary's grounds, could easily build the proper bins then use the composted material on the grounds."

Nova Scotia Environment Trust Board

In addition to his environmental activities on campus, Dr. Ricketts was recently appointed to the Board of Nova Scotia Environment Trust, a trust fund set up by Cabinet. The purpose of the Trust, says Dr. Ricketts, is to raise money to support environmentally-oriented research in Nova Scotia. Faculty members and students at Saint Mary's could potentially benefit from this fund.

Reducing paper use

You can help save more trees by using less paper. Here are some pointers on how to reduce paper use:

- Use the telephone instead of a memo
- If you have to send a memo to several people, send a circulating memo instead of a copy to each person
- Write drafts on the backs of old memos, letters and notices
- Do double-sided photocopying whenever possible
- Use re-usable inter-office envelopes for internal mail within your organization

Atlantic Bowl 1990

by Pat Connolly

The banner in the Halifax Chronicle-Herald on Monday, November 20 ran straight to the heart of the Huskies 1990 football season, "SMU's Atlantic Bowl Victory Will Be Spectacle Forever". In the absence of a Vanier Cup lost five days later in Toronto's Skydome, Saint Mary's last second 31-30 victory over University of Western Ontario Mustangs will be remembered by partisans (and a million or more television viewers) as one of the great spectacles in the history of Canadian university athletics.

The disappointment of defeat, 24-21 to University of Saskatchewan Huskies in the Vanier Cup, will linger until another opportunity at another time, accepted for what it was and that is the pure logic that in a single showdown of well matched teams, one play is often the difference in winning and losing. It's the way it was in both the Atlantic and Vanier classics but, in the years to come,

those of us with selective memories will recall the afternoon of November 17 with greater clarity and detail than the events that followed a week later.

Perhaps that's because a lot of us had conditioned ourselves to believe that Saint Mary's vs. Western was really the marquee event on the 1990 calendar and that anything after that was quite anti-climatic. Perhaps, just perhaps, it was the kind of

"Nobody who paid even slight attention to CIAU activities throughout the fall doubted for a moment that this one was for the unofficial Canadian college football championship. . ."

thinking that seeped like a thief into the Huskies concentration chambers in the Vanier Cup. This is not intended to detract in any way from Saskatchewan's magnificent victory in the national final, simply a suggestion of the difficulties inherent in climbing down from the high cloud to prepare for the next challenge short days later.

The plain truth is that, for the Huskies, the 1990 season was geared in the main to retribution for a 38-33 loss to Western in the 1989 Atlantic Bowl, following which the Mustangs went on to win the Vanier Cup in a year many people thought would belong to Saint Mary's. As the 1990 season began, the Mustangs and Huskies quickly became the 1-2 ranked teams in the nation, on form, and that's where they remained as they swept through their conferences and squared off for the re-match in Halifax on a glorious Saturday afternoon in November.

The 29th Atlantic Bowl was played in the electric atmosphere of Huskies Stadium, with 10,000 paid up devotees jammed into every available space, thousands more observing from privileged positions in residence vantage points and a television audience that stretched from coast-to-coast on TSN. Nobody who paid even slight attention to CIAU activities throughout the fall doubted for a moment that this one was for the unofficial Canadian college football championship because overall performance had made it so.

Continued

The huge crowd fell into a stunned silence when the Mustangs struck for two touchdowns in the first five minutes of the game but the determined Huskies quickly regained their composure and pulled even before taking a 21-14 lead into half time. Chris Flynn had marshalled his forces as he had done so many times over his four-year career as the greatest quarterback in the history of the CIAU. But this time, unlike 1989, the Huskies had developed a running game to complement the established aerial attack. Flynn was still locating receivers like Matt Nealon and Ian MacDonald but he was also mixing his options with outstanding running backs like Anthony Williams, Sean Mongey and Calvin Scott in a more imaginative attack than the Mustangs had seen a year earlier. Offensively Richard MacLean lead an offensive line made over during the year because of injuries. Defensively Trevor (Hit Man) Burke contributed mightily with three interceptions that perhaps changed the tenor of a game that shifted direction again in the third quarter when the Mustangs regained the momentum and the lead which they held, a seemingly secure 30-25 margin and possession of the ball at the Huskies three yard line, with 1:15 left on the clock. That set the stage for the most incredible development of modern times in college playoff competition.

Instead of going for the goal line on the third and three, Western coach Larry Haylor opted to have Frank Jagas kick the field goal,

GHIZ PHOTO

Chris Flynn in action during 1990 Atlantic Bowl. The Huskies defeated number one ranked University of Western Ontario Mustangs 31-30.

he missed, and the Mustangs gave the ball back to Flynn on his own 35 with a shot at the impossible. That's all the great ones

either ask for or need, one last opportunity under pressure and three plays later, the Huskies had the ball on the Mustangs 35, the impossible dream clutched in the right hand of the impossible quarterback. Spinning from the huddle, Flynn peeked at a plethora of Western defenders guarding Nealon and MacDonald in the end zone, then wheeled the ball to Anthony Williams who stepped down on one foot in bounds two inches inside the zone with eight seconds left on the clock. 31-30 Saint Mary's as the Mustangs ran around in confusion and 10,000 frenzied strangers hugged each other in a crowd scene unmatched in the annals of provincial sports.

In what was arguably one of the greatest football games ever played in this country, the Huskies atoned for the disappointment of 1989 in 1990 and the disappointment that followed a week later in Toronto falls under the category of new business in 1991. One at a time, please. 🍀

Chris Flynn

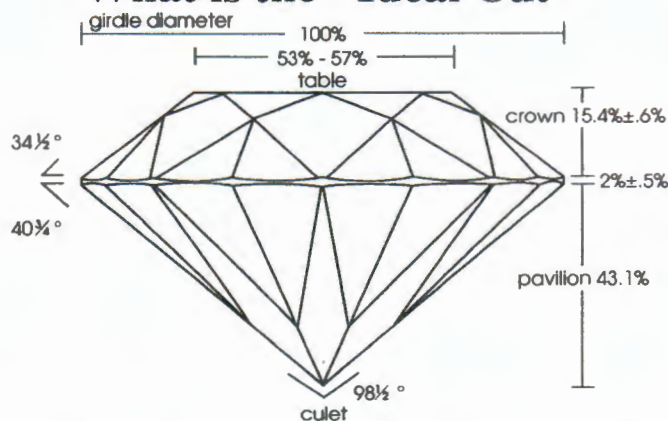

by Pat Connolly -

In the agonizing hours following another opportunity lost to add the Vanier Cup to his lengthy list of credits, the greatest quarterback in Canadian college football history was tormented, now keeping his options open.

While it was generally understood that the all-time, all-star was playing out his university career at Toronto's Skydome November 24, Chris Flynn himself was now dealing with his own reservations, not to mention a

LAZARE DIAMONDS

The Courtyard, Dresden Row, Halifax Telephone 425-0121

Huskies celebrate Atlantic Bowl Victory

plethora of media reporters buzzing around him with questions about his future as a CFL'er. Better they should have been asking the questions of the incompetents currently running the Canadian Football League into bankruptcy while slandering the greatest home grown quarterback extant.

If ever a league, anywhere, needed the presence of one individual to inject native enthusiasm into its product, the CFL needs Chris Flynn, more even than Flynn needs the CFL. Only fools would fail to recognize that basic fact, yet these hired guns from Turkey Bend, Indiana and Cradle Creek, Wyoming

have convinced their Canadian owners that there is no room in our Canadian game for Canadian quarterbacks. Not even one with the incredible skills of Chris Flynn, the kid from Buckingham, P.Q. who had shattered CIAU records passing and running and won the Hec Crighton Award as the nations best player an unheard of three times in a row.

In the wake of this heartbreaking 24-21 loss to Saskatchewan in his third attempt to clutch the Vanier, Flynn considered his options which included returning the snub and putting his CFL aspirations on hold for another year. But it was much more than

spontaneous reaction in the bitter aftertaste of defeat, it was a matter of principles and priorities.

Flynn has consistently regarded his personal records and rewards as secondary to his avowed goal, of bringing a Vanier Cup to Saint Mary's. He said it when he arrived four years ago and repeated it many times since, as recently as November 24th in Toronto. "I still have a couple of credits left after this year", the 24 year old fourth-year arts student reminded his audience, "and there's a good chance I'll be back to finish my career and my degree at Saint Mary's in 1991". The young man on whose shoulders defeat does not rest lightly, delivered a thinly veiled message to the CFL, "get off your high horses and get serious because I'm fed up with the dog dancing".

In his own mind, if not in anybody else's, Flynn still has something to prove, that he won't accept being stuck with the label of the quarterback who couldn't win the big game. He detests unfinished business and that's why he gave himself until early 1991 to decide whether he'll accept a CFL draft on terms that probably dictate him playing another position, or, coming back to Saint Mary's for one last shot at the Holy Grail.

Tugged from one direction and snubbed from the other, Chris Flynn will make the decision from his own playbook. And he'll live with it in the class and dignity that makes him great. 🍷

Alumni back Huskies in bid for Vanier Cup

Alumni support for our Huskies during Vanier Cup weekend was tremendous. At a reception hosted by the Alumni Association on the Friday before the big game over 300 alumni and Huskies' supporters attended. Pictured above at Sightlines Lounge in the Skydome are, left to right, Dean of Arts Mike Larsen, BA '66, George Reardon, '52, and Bob Reardon, BComm '61.

Annual Fund Update

The 1990-91 yearly appeal is well on its way. We are approaching the halfway mark of our ambitious goal of \$350,000 and look forward to a positive response and good results over the remainder of the campaign.

To date, 4000 alumni and 800 new graduates have been contacted using the phone/mail approach. Another 6000 alumni were approached through direct mail. This is also the second year for our Leadership Club which recognizes major benefactors of the Annual Fund. Over the next few months 1200 parents of freshman students will also be contacted through phone/mail.

The Annual Fund wishes to recognize the on-going leadership which our campaign chairpersons are providing. Karen Henderson, BComm '75, MBA '77 is chairing the alumni and leadership appeals and Fred MacGillivray '63, President and General Manager of Bolands Ltd., is chairing the parents appeal.

Participation is the key. Your gift to the Annual Fund is important! You can make a difference!

Thank you to all those who have already participated. ☺

Planned Giving

Designating a life insurance policy, either existing or new, as a gift to Saint Mary's, can have several advantages, according to University Advancement director Don Keleher and Planned Giving consultant Edmund Morris, who expressed the University's appreciation to the volunteer members of the advisory group.

- a significant endowment can be made with comparatively modest initial and periodic premiums, or by prepayment.
- present and future income tax savings can be realized. The University is recognized by government as a registered charity for income tax purposes. As both beneficiary and policy owner, the University issues receipts which may entitle donors to tax credits for premiums paid on account of new insurance policies or for the cash value of paid-up policies signed over to the University.
- for significant donations, life insurance bequests can be arranged whereby Saint Mary's can be the beneficiary and the full donations plus interest are returned to the donor's estate.
- insurance bequests can be so arranged as not to reduce estate amounts otherwise available to the donor's heirs and beneficiaries.
- it may be possible to limit costs of probate or administration.
- the University will gladly cooperate with appropriate memorial designations where desired by benefactors.

Gifts or bequests by will, for general or specific University purposes, may consist of a specific sum of cash, securities or property, joint survivor interest, percentage of a residual estate, or a contingency bequest whereby Saint Mary's is named as beneficiary if, for any reason, a gift cannot be made as originally intended.

Alternatively, an annuity trust can be established so that the donor's beneficiary will receive regular income guaranteed for life with the remainder thereafter going to Saint Mary's.

Gifts and bequests by will are deemed to have been made in the year in which donor's death occurs and tax credit can be used to offset tax owing.

Bequests and endowments at Saint Mary's are maintained and reported as such in financial accounts of the University. They are administered by the University Comptroller in accordance with policies of the investment committee of the Board of Governors.

Alumni Director leaves Saint Mary's

The University recently bid farewell to Alumni Director Tom McDonell, who left Saint Mary's in January to join Computerland as Senior Account Executive.

Tom is an alumnus of Saint Mary's earning a BA in Geography in 1980 and an MBA in 1982. After graduating, he worked at Computerland as store manager and marketing representative for three years. He joined Saint Mary's as Alumni Director in 1985. In the five years since, he has successfully expanded and improved the alumni program. His achievements include revamping this magazine, the Maroon & White, and increasing its frequency from two times a year to three, incorporating the annual Alumni Dinner into Alumni Weekend, increasing efforts in alumni branch development and introducing the Branch of the Year Award.

Not only did Tom improve existing programs, he introduced new ones. These include the alumni merchandising program, whereby alumni can take advantage of travel and insurance programs and an alumni Mastercard (and even purchase Saint Mary's watches!), Alumni Weekend, Casino Night, an alumni hockey game, and the MBA Business Luncheon. And, recognizing that students represent future alumni, Tom initiated the formation of the Student Alumni Association, an alumni orators program and career planning seminars for students.

In 1989-90, Tom worked with the Alumni Association executive to develop its mission statement and strategic plan, and completed initial planning stages of a volunteer recognition program.

At the annual conference of the Canadian Council for the Advancement of Education (CCA) in June 1990, he was elected president of the Association of Canadian Alumni Administrators and a director of CCAE. Following his election to the CCAE Executive Board, he was appointed to the position of secretary.

Through his efforts over five years, Tom strengthened the Alumni Association, and raised its profile both on and off campus. According to Don Keleher, Director of University Advancement, "Tom is well-respected by his fellow alumni directors in Metro and across the country. We'll miss him." ☺

CLARK PHOTOGRAPHIC/GLENDA ROSBOROUGH

Reverend William Pepper, BA, celebrated the 50th anniversary of his ordination on Sunday, September 30, 1990 at St. Thomas More Church in Dartmouth. On hand for the occasion are left to right: Rev. Pepper, former Archbishop James M. Hayes, BA'43, and Rev. Paul Williams, pastor at St. Thomas More.

36

John Dickey, BA, Hon'80, is co-chair of the recently launched capital campaign for the Sacred Heart School on Spring Garden Road in Halifax.

Jim Britten, BA, recently visited campus while on a visit from his home in Ottawa. Jim and his wife Margaret were in town to help celebrate the 50th wedding anniversary of his brother-in-law Jim Kiely and his wife Thelma.

44

Edmund Boyd, BA, recently retired after thirty years in the French Department at Dalhousie University. Edmund spent the last academic year in charge of a group of French students at the Universite de Aux-Provence located in Southern France.

56

James Sawler, BComm, is the new president and chief operating officer of Country Business Inc. Country Business, located in Halifax, will replace Pat King Business Brokers and function as a subsidiary of Pat King Financial Ltd.

55

A. Max Beaton, BComm, is currently on contract with CIDA through Deloitte Touche as the high level management development advisor to the Management Services Board of Zambia. Max was formerly with the United Nations in Bhutan.

61

An Engineer with INCO Ltd., Neil Feeley, DipEng, resides in Sudbury, Ontario. All is quiet in the Feeley home this year as Neil's children John, Colleen and Cathleen are away from home studying at colleges and universities throughout Ontario.

The new Office of Nova Scotia in New England was introduced recently at a reception hosted by the Chamber of Commerce in Portland, Maine. The Agent General for the office, Wendell Sandford, BA, BEd'70, had the opportunity to chat with fellow alumnus Robert Ruotolo, BA, at the reception. Reminiscing about past days at Saint Mary's are left to right: Patricia Ruotolo, Wendell and Robert.

An Executive Vice-President with Digital Consulting Inc. Ronald Gomes, BComm, resides with his wife Mary Lou in Andover, Massachusetts. Ron and Mary Lou are on their own this year as their sons Lance and Chad are away at college.

Scott Moore, BA, MED'69, recently received a permanent appointment to the Guidance Department of the Nova Scotia Community College in Dartmouth, Nova Scotia. Scott, his wife Georgina and their children Christopher and Laura reside in Bedford, Nova Scotia. As a tennis enthusiast, Scott enjoys meeting many alumni at the Waegwoltic Club in Halifax.

67

Bernie Murphy, BA, is the deputy director of the Military Family Support of CFB Halifax. Bernie is currently working with the military community to provide support and community programs to military members, their partners and families. In particular, those involved with Operation Friction, the Canadian Task Force deployed to the Persian Gulf. Bernie is also co-founder of Give Life Canada, a cross Canada volunteer organization.

Congratulations to Marcel Aucoin, DipEng, BSc'68, who has recently been appointed to

the position of regional manager for business development in Atlantic Canada with Lavalin Inc.

Rev. James Richards, BA, after completing his Masters in Liturgical Studies in 1988, was appointed pastor of the Star of the Sea Parish in Terence Bay, Nova Scotia. In addition, Father Richards was also made coordinator of the liturgical program for the Archdiocese of Halifax.

68

Frances Thomas, BEd, MA'88, and her husband Douglas recently returned to Halifax after living in London, England for a year.

A book entitled: "The Uniqueness of Jesus Christ in the Theocentric Model of the Christian Theology of World Religions" by Reverend Gregory H. Carruthers, BA, was recently published by the University Press of America Inc. Father Carruthers, S.J. is a Fellow of the Lonergan Research Institute in Toronto.

David Colville, DipEng, BSc, has been appointed interim chair of the Canadian Radio and Telecommunications Commission (CRTC).

ORDERING TRANSCRIPTS

It is not nearly as difficult as you think to order copies of your academic record from Saint Mary's University.

Official transcripts are sent directly to third parties, i.e. other academic institutions or business/professional organizations. Unofficial transcripts are issued directly to you and are marked "Issued to Student".

Transcripts of records are considered to be privileged information and to that end will not be released to those outside the University without the prior written permission of the student or former student.

To request a transcript you must complete the appropriate form obtainable from the Registrar, or forward a letter of request to the Records Office at the University. It is not possible to accept transcript requests over the telephone. Transcript requests are processed strictly in the order in which they are received. Though the normal processing time is approximately ten working days, additional time will be needed at peak periods of the year, particularly at the end of each semester and around graduation time.

The cost is \$2.00 for the first copy of the transcript and \$1.00 for each copy made at the same time.

For further information please contact Mrs. Betty Fowler, Transcript Secretary, Office of the Registrar/Records at (902) 420-5400 Ext. 2539, or by fax (902) 420-5566.

TRANSCRIPTS

69

Based in Liverpool, Nova Scotia as an Agent with Mutual Life of Canada, **John L. Murray, BA, BEd'70**, has been appointed to the Board of Directors of the Atlantic Canada Opportunities Agency, reporting to the Federal Minister in charge.

THE *worldly* CANADIAN

It is a fact that we Canadians are born travellers. It is equally true that, as one of these worldly Canadians, we fly to more places in this country than any other airline. What's more, we are the only Canadian airline to serve five continents — North America, South America, Europe, Asia and Australia. We even serve the South Pacific.

In fact, when all is said and done, it comes down to this. Every day, somewhere in the world, there is a Canadian leading the way. A spirited, worldly Canadian.

When you want the true Canadian spirit, call your Travel Agent or Canadian Airlines International.

The spirit takes wing.
